4 THE VIDEOGRAPHER: We are now on
5 the record.

6 My name is Jaclyn Duran. I am a
7 videographer on behalf of Golkow
8 Litigation Services.

9 Today's date is May 5, 2021 and
10 the time is 10:09 a.m. This videotaped
11 deposition is being held via remote Zoom
12 in the matter of National Prescription
13 Opiate Litigation. The deponent today
14 is James Tsipakis.

15 All parties to the deposition are
16 appearing remotely and have agreed to
17 the witness being sworn in remotely.
18 All parties are noted on the
19 stenographic record.

20 The witness has been previously
21 sworn in.

22 Counsel, you may proceed.

23 - - -

24 JAMES TSIPAKIS

1 being by me previously duly sworn, as hereinafter
2 certified, deposes and says as follows:

3 CROSS-EXAMINATION (CONT'D.)

4 BY MR. GADDY:

5 Q. Good morning, Mr. Tsipakis. How
6 are you doing?

7 A. Good morning. How are you?

8 Q. I'm doing good. Thanks.

9 As I told you a minute ago, Peter
10 is in trial in West Virginia. So I'm going to
11 finish up the last 45 minutes or so of your
12 deposition this morning, okay?

13 A. Sure.

14 Q. I did have the opportunity to read
15 the first part of your deposition from March. I
16 don't intend to repeat any of that material, but
17 I might refer to some of the things you said
18 just to reorient us, okay?

19 A. Okay.

20 Q. Where I want to start is, one of
21 the things that you told us in March was that
22 threshold reports were one tool that Giant Eagle
23 uses to monitor dispensing of controlled
24 substances.

1 Do you recall that generally?

2 A. Yes.

3 Q. And you told us that your memory
4 was that the threshold reports began to be
5 utilized by Giant Eagle in 2013, but you
6 couldn't remember precisely when within 2013; is
7 that fair?

8 A. Yes.

9 - - -

10 (Tsipakis Deposition Exhibit 3 marked.)

11 - - -

12 BY MR. GADDY:

13 Q. Okay. I want to see if we can
14 drill down into that just a little bit.

15 Let me show you what we'll mark as
16 Tsipakis 3, which is P-HBC-1174, and it's going
17 to be tab 8 in your binder.

18 A. So this binder, the black binder,
19 you sent, tab 8?

20 Q. Yes, sir.

21 A. Okay.

22 MR. KOBRIN: I just -- while we're
23 on the record, I don't think we received
24 this prior to the first portion of this

1 deposition. There are some of the ones
2 in your list, Jeff, that we did receive.
3 I'm not saying they're all missing. But
4 the first two, 1174, and the second one
5 you identified, 1115, I don't have in my
6 boxes.

7 And I don't think we also,
8 therefore, received it even timely if
9 the deadline would have been for this
10 portion of the deposition, which I don't
11 think it was.

12 I think it would have needed to be
13 provided to us 48 hours before the first
14 half of this depo, but we didn't even
15 receive it 48 hours before this second
16 half of the depo. But it's I think
17 disputable pursuant to the protocol.

18 BY MR. GADDY:

19 Q. Are you with me, Mr. Tsipakis?

20 A. Yes, sir.

21 Q. Okay. You see the top of this
22 page -- this is a one-page. It looks like it's
23 a meeting invite.

24 You see at the very top of the

1 page it's an invite from Greg Carlson?

2 A. Yes.

3 Q. And it looks like this is dated

4 November 11, 2013.

5 Do you see that?

6 A. Yes.

7 Q. And if we go down and look at the
8 original message and we see the folks who were
9 invited to this meeting, it looks like it was
10 George Chunderlik, Nathan Hughes,
11 Joseph Millward, Anthony Mollica, Shawn Voyten,
12 and Greg Carlson.

13 Do you see that?

14 A. Yes.

15 Q. A couple of times in your
16 deposition, you've referred to the compliance
17 department or the compliance team.

18 Would these folks listed here in
19 that invite be members of that compliance team
20 or compliance department?

21 A. Some of them, yes.

22 Q. Okay. Are there additional folks
23 who you would say are members of the compliance
24 department or compliance team that we don't see

1 on here?

2 A. I believe these are the main --
3 the main folks.

4 Q. Okay. I know at some point in
5 time, Jason Mullen joined the company?

6 A. Yes.

7 Q. Does that sound familiar?

8 A. Yes.

9 Q. Okay. I don't -- you can tell me
10 if I'm wrong. I don't think he was with the
11 company in 2013. But at some point, he joined
12 the company and became a part of the compliance
13 team; is that accurate?

14 A. Yes, I believe that is accurate.

15 Q. Okay. But since he wasn't with
16 the company yet, these would be the main folks
17 on the compliance team back in 2013, right?

18 A. To the best of my understanding,
19 yes.

20 Q. Okay. And it looks like there
21 were two meeting topics listed here. The first
22 was the "Discussion of the process that has been
23 developed for identifying pharmacies ordering
24 excessive controlled substances."

1 Do you see that?

2 A. Yes.

3 Q. And do you recognize what he's
4 talking about there or what they're intending to
5 discuss here in November of 2013 regarding the
6 "ordering of excessive controlled substances"
7 would be the threshold report that you talked to
8 us about earlier?

9 MR. KOBRIN: Hey, Jeff. I'm going
10 to interpose an objection. This
11 distribution was covered in the
12 December 13, 2018 deposition. And
13 pursuant to the Court's orders, these
14 depositions in Track 3 were not to be
15 duplicative, and this is duplicative of
16 the distribution deposition in December
17 of '18.

18 So we would ask you to move on
19 beyond distribution and interpose this
20 objection to this line of questioning.

21 BY MR. GADDY:

22 Q. Go ahead, Mr. Tsipakis.

23 A. Obviously, I wasn't there. I can
24 only tell you what I'm reading, and certainly

1 what you have up on the screen is what it says.
2 So I'm not sure what they were going to talk
3 about or not, but I can only identify what's
4 written.

5 Q. And my question is whether or not
6 it looks like they're discussing this threshold
7 report that you told us is used by Giant Eagle
8 to monitor controlled substance dispensing.

9 Do you agree that that's what
10 they're discussing?

11 A. Yeah, I follow your question, but
12 I don't see anything listed here about a
13 threshold report or any -- there's no topic that
14 says "threshold report."

15 It just says "pharmacies ordering
16 excessive controlled substances" is what it
17 says, so ...

18 Q. Okay. Are you aware of any other
19 processes that Giant Eagle utilized in this time
20 period for identifying pharmacies ordering
21 excessive controlled substances other than the
22 threshold report?

23 A. As I mentioned before, we did have
24 a system called Supplylogix that we used as

1 well, so ...

2 Q. Do you think they're talking about
3 a Supplylogix program here, or ...

4 A. I couldn't tell you. I don't
5 know.

6 Q. Okay. The next item says the
7 "Discussion of the monitoring and steps to be
8 taken when a pharmacy appears on the above
9 list."

10 Do you see that?

11 A. Yes.

12 Q. Okay. Now, do you have any
13 understanding of the threshold report that Giant
14 Eagle used to monitor controlled substances --
15 controlled substance dispensing being utilized
16 before November of 2013?

17 A. I don't know the exact dates of
18 when it was -- it was an automated report and an
19 automated process that was put in place. I
20 don't know the exact start of it, but I don't
21 have the exact time -- the exact date that that
22 started.

23 Q. Okay. But we see here they're
24 meeting about it in November of 2013 to talk

1 about the process that's been developed and the
2 steps to take when a pharmacy appears on a list.

3 Do you have any reason to believe
4 that they'd be talking about anything other than
5 threshold report here in this November 2013
6 meeting?

7 A. I don't have -- I don't have any
8 basis to say it is or it is not the threshold
9 report.

10 Q. Okay. But your understanding of
11 the threshold report that Giant Eagle uses to
12 monitor controlled substance dispensing is that
13 it generates a list of pharmacies like is being
14 referred to in item number 2 there, correct?

15 A. The threshold report does list
16 pharmacies of -- pharmacies to look at or orders
17 to look at, yes.

18 - - -

19 (Tsipakis Deposition Exhibit 4 marked.)

20 - - -

21 BY MR. GADDY:

22 Q. Okay. I want to look at a couple
23 of examples of how Giant Eagle would react to
24 pharmacies appearing on the threshold report as

1 it relates to their controlled substance
2 dispensing.

3 We're going to go to what we'll
4 mark as Tsipakis Number 4, which is P-HBC-1115,
5 which is in your tab number 6, Mr. Tsipakis.

6 MR. KOBRIN: Again, I just want to
7 insert an objection. I don't think we
8 received this prior to the deposition
9 pursuant to the protocols in the remote
10 deposition, a protocol that was entered
11 by the Court and to which the parties
12 agreed. So I think it's excludable
13 pursuant to that protocol.

14 Q. Let me know when you have it,
15 please, Mr. Tsipakis.

16 A. I'm sorry, Mr. Gaddy?

17 Q. I said let me know when you have
18 it.

19 A. Oh, yes. Yes, sir, I have it.

20 Q. Okay. This looks like a one-page
21 e-mail chain. And what we'll do is we'll start
22 at the bottom of the page so we can read this
23 chronologically, okay?

24 A. Okay.

1 Q. You see it starts down there with
2 an e-mail from Robert McClune on December 17th
3 of 2015.

4 Do you see that?

5 A. Yes.

6 Q. And I think you told us before
7 that Bob McClune was in analytics?

8 A. Procurement analytics, correct,
9 uh-huh.

10 Q. Okay. And the subject of this
11 e-mail is the "Daily HBC Suspicious Purchasing
12 Report." And then it has the date that it looks
13 like that report was run.

14 Do you see that?

15 A. Yes.

16 Q. Okay. And this e-mail came out,
17 it looks like, at 7:30 the following morning
18 after the report was run.

19 Do you see that, 7:32 a.m.?

20 A. Yes.

21 Q. And it says in the body, "We have
22 had three pharmacies exceed the purchasing
23 thresholds for certain controlled products so
24 far this month."

1 And the folks that received this
2 e-mail looks like a lot of the same people we
3 saw on the last meeting invite; Mr. Hughes,
4 Mr. Carlson, Mr. Millward, and Mr. Chunderlik.

5 Do you see that?

6 A. Yes.

7 Q. And you recognize all those folks
8 from the last meeting where they were talking
9 about these types of reports that would list
10 pharmacies that had ordered excessive amounts of
11 controlled substances?

12 A. Yes.

13 Q. Now, a minute ago when we were
14 looking at the last document, you said that the
15 threshold report was an automated report.

16 Is it your understanding that that
17 report would be run every day?

18 A. Yes, I believe every day. So on
19 the weekends when they printed it, if it printed
20 Saturday or Sunday, I'm not sure, but it was
21 automated.

22 Q. Okay. Was it something that the
23 computer ran on its own, or was it something
24 that an analyst like Bob McClune would have to

1 go in and run?

2 A. There would be instances of both,
3 but there was a standing daily report that would
4 run on its own. It was programmed to run.

5 Q. Okay. Okay. Great.

6 So let me ask -- let me ask you
7 this question: Outside of the threshold report,
8 were there any other standing daily reports that
9 were run within Giant Eagle for the purpose of
10 monitoring controlled substance dispensing?

11 A. I'm sorry. Your question is
12 automated reports or --

13 Q. Correct.

14 A. So automated reports would be --
15 would be this one that's listed, unless there
16 was some reason either from loss prevention or a
17 store if they wanted us to run something
18 different, that would be programmed as well, but
19 from what is listed here, it's the main -- the
20 main report that was run every day.

21 I mean, there's other automated
22 reports too, but those could be -- those
23 weren't -- this is the regular report that ran.

24 Q. I think we're saying the same

1 thing, but I just want to make sure. And I
2 understand that there's ad hoc reports and
3 there's other places that you can pull different
4 types of information.

5 But my question is, are there any
6 other automated reports, meaning they run every
7 day regardless of whether somebody asked you to
8 or not, outside of the daily threshold report?

9 A. So this is the main report, yes.
10 But then there would be additions to the report,
11 so if there's different drugs they wanted to be
12 added to it or classes, et cetera. So it's the
13 main vehicle, but it doesn't mean it just stayed
14 static.

15 They could add things to it or
16 subtract things to it as well. So if there was
17 another drug they wanted to add, right, to show
18 up on the report or a different class or
19 parameters, certainly that was adjusted over
20 time.

21 Q. But it was all in the context of
22 the daily threshold report, right?

23 A. Right.

24 Q. Okay. Were there any other

1 automated reports that ran on different
2 frequencies, maybe weekly, monthly, quarterly,
3 outside of the threshold report?

4 A. The compliance department and
5 analysts certainly had the autonomy to run the
6 reporting on things they wanted to look at. And
7 I've seen examples of if they wanted to run
8 reports on cash prescriptions or if they wanted
9 to run reports on, you know, maybe a
10 non-controlled drug that they wanted to look at
11 or a controlled drug, et cetera.

12 So that's where tools like
13 Supplylogix and also just other analytical
14 queries would run, and those could run for a
15 period of time as well, or something that was
16 someone's job to look at that every week or
17 every month or every quarter, so ...

18 Q. Okay. And, again, I understand
19 the ad hoc reports and the reports that you can
20 pull upon request or if you wanted to look into
21 any particular thing. And we'll look in a
22 minute at some of the different items that folks
23 like Jason Mullen would look into, but my
24 question is a little bit different.

1 Anything that was automated, a no
2 questions asked, it's going to show up in your
3 inbox no matter what every week, every month,
4 every quarter, anything like that outside of
5 this daily threshold report?

6 A. So let me try to -- so the answer
7 is this one is the main one that ran its own,
8 but as I mentioned, the analyst or someone that
9 wanted to run a regular report could schedule
10 something for their -- you know, in their inbox
11 to run every quarter or every month, or those
12 kind of things.

13 I believe we're saying the same
14 thing, but this is not -- this is the main
15 report, but people could add to it --

16 Q. Okay.

17 A. -- for themselves, for their own
18 use, right, for their job description or the
19 things that they needed, the things that they
20 were looking at.

21 Like, for example, as you
22 mentioned, the Jason Mullen, there was reports
23 he ran and things that he had created on a
24 cadence.

1 Q. Okay. So I understand that maybe
2 an individual could design something to be sent
3 to them if they wanted to for their particular
4 duties, but anything at the corporate level that
5 was designed to run -- be an automated report
6 other than the threshold report?

7 A. This would be the one. Yes.

8 Q. Okay. So back to the e-mail, it
9 says, "Three pharmacies exceeded the purchasing
10 threshold for certain controlled products so far
11 this month."

12 When we're talking about exceeding
13 the threshold, is the analysis -- the threshold
14 that is triggered here, is it the same threshold
15 when Giant Eagle is evaluating controlled
16 substance dispensing as it is when they're
17 evaluating controlled substance distribution as
18 you testified about in 2018?

19 A. I'm sorry.

20 Q. Does that make sense?

21 A. I'm sorry. Could you repeat that
22 just to make sure I understand exactly the
23 question, please.

24 Q. Sure. What I'm trying to do is

1 make sure that we're talking about the same
2 threshold.

3 So in 2018, you told us that the
4 trigger would be when a pharmacy orders more
5 than three times the average over the previous
6 12 months, that that would cause a pharmacy to
7 trigger and appear on the threshold report for
8 evaluation of distribution related issues.

9 What I'm asking you here is, is
10 that same three times the average formula the
11 same when Giant Eagle is looking at pharmacies
12 on this report for controlled substance
13 dispensing issues?

14 MR. BARNES: Objection to the
15 extent it misstates his December 2018
16 testimony.

17 Further object as repetitive of
18 his December 2018 testimony, and,
19 therefore, move to strike it.

20 A. So the threshold that's used, if
21 you're asking if there's a separate threshold,
22 it's the one that's cast over the dispensing,
23 but it's -- as we've mentioned before in my
24 previous testimony, orders from the warehouse to

1 the stores are pursuant on prescriptions for
2 those items.

3 So from a logical flow
4 perspective, the thresholds would carry through.
5 So I'm not sure if that answers your question,
6 but ...

7 Q. Maybe. And I'm cognizant of Bob's
8 issues, and I promise I'm trying not to
9 re-litigate the same stuff that I asked you
10 about two or three years ago, but I'm just
11 trying to make sure that we have a clean record
12 that the three times threshold -- and again,
13 that's general. We can look back at the old
14 deposition to get the details.

15 But the three times threshold that
16 we talked about in 2018 relating to distribution
17 is the same three times threshold that Giant
18 Eagle is looking at as it relates to dispensing
19 issues; is that correct?

20 MR. BARNES: Objection to the
21 extent you're misstating his December
22 '18 testimony, and, further, that it's
23 repetitive and duplicative, which you're
24 not supposed to do in these Track 3

1 depositions.

2 A. The exact number of the threshold
3 and what the algorithm is set at, I don't
4 remember. I don't recall the exact number. But
5 certainly the threshold is set at the corporate
6 level -- at the chain level, and that's what
7 this report flags as far as anything that would
8 bump against that threshold, which doesn't
9 necessarily say there's an issue, but it
10 definitely tells us things to look at and to
11 clear before those orders -- or before those
12 orders go to the stores, and certainly if
13 there's things that we want to look at from a
14 corporate perspective and from a resource
15 perspective.

16 Q. The threshold that you told us
17 about in your distribution deposition is the
18 same threshold that we're talking about here for
19 dispensing; is that right?

20 A. I'm not -- again, I don't know
21 what the exact number I mentioned or didn't
22 mention, but it would be one and the same as far
23 as the threshold.

24 Q. Okay. If we go back -- if we look

1 up at the next e-mail in the chain, it looks
2 like Mr. Millward responds -- he writes to
3 Darren Evans. He says, "What's going on with
4 Store 71 and buprenorphine?"

5 Are you familiar with that
6 product?

7 A. Yes.

8 Q. And that's an opioid, but it's
9 actually an opioid that's often prescribed in
10 the treatment context, correct?

11 A. Treatment -- I'm sorry? Treatment
12 context? Can you --

13 Q. In the treatment context.

14 A. All drugs are for treatment.
15 Treatment of -- are you saying for detox or
16 what -- I just want to make sure I'm clear on --

17 Q. Yeah. Thanks. Good
18 clarification.

19 It's a drug that's prescribed to
20 treat individuals who are addicted to opioids.

21 A. Yes.

22 Q. Okay. It says, "They are way
23 above the average for the company."

24 Do you see that?

1 A. Yes.

2 Q. And that goes to what you just
3 said a moment ago that the threshold was built
4 on a chain-wide average, not a store-specific
5 average, correct?

6 A. Correct.

7 - - -

8 (Tsipakis Deposition Exhibit 5 marked.)

9 - - -

10 BY MR. GADDY:

11 Q. Okay. Let's turn and look,
12 Mr. Tsipakis, now to what we'll mark as Exhibit
13 Number 5, P-HBC-1018, which is going to be your
14 tab number 5.

15 A. Okay.

16 Q. When you get there, if you would,
17 turn to the back page so we can read this
18 chronologically.

19 A. Okay.

20 Q. You see here it looks like we have
21 another one of these automated type e-mails
22 again from Bob McClune. Again, it goes to this
23 group of folks from the compliance department.
24 It's on January 15th, and it says, "We have one

1 pharmacy exceeding the purchase threshold for
2 certain controlled substance products so far
3 this month."

4 Do you see that?

5 A. Yes.

6 Q. And the -- in order -- the
7 threshold that Giant Eagle is looking at is
8 pharmacies that exceed for controlled substance
9 dispensing purposes, it sets over at the
10 beginning of every month, correct?

11 A. The exact mechanics, as I
12 testified before, would be how the mechanics
13 work. But, yes, I think it resets for the
14 following month. The exact date and how that
15 does it, I'm not -- I'm not familiar with it at
16 this moment, but it does reset.

17 Q. Okay. But on the 15th is when
18 this report goes out.

19 Let's turn the page and look at
20 the response from Mr. Millward.

21 And he says, "Store 54 and, to a
22 lesser extent, 2402 are increasing in
23 buprenorphine products on a daily basis. Jason
24 was able to pull some data together that is

1 potentially concerning."

2 Do you see that?

3 A. Yes.

4 Q. Again, we're seeing this is
5 related to buprenorphine products, which we know
6 is an opioid, but is one that is often
7 prescribed to folks being treated for OUD, or
8 opioid use disorder, correct?

9 A. One of these is, yes.

10 Q. It goes on to say, "The store did
11 not exceed the purchase threshold last month.
12 This is a new trend at the Somerset stores. I
13 need you to intercede with the store to find out
14 what they perceive to be the trend."

15 Do you see that?

16 A. Yes.

17 Q. In the next paragraph, he says,
18 "Some research shows that the Rx" -- the
19 scripts -- "are coming from prescribers who are
20 being investigated based on news articles."

21 Do you see that?

22 A. Yes.

23 Q. How does -- if at all, how does
24 Giant Eagle communicate to its pharmacists that

1 they may be filling prescriptions for doctors
2 who are being investigated?

3 A. Well, certainly, as I've testified
4 before, we have a very robust loss prevention
5 department. And certainly our head of our loss
6 prevention is very well established with local
7 law enforcement, DEA, FBI as well.

8 So, certainly, we have a really
9 good program where there's information that is
10 shared amongst the agencies on ongoing
11 investigations. There are certainly things for
12 us to look at and things we help them with.

13 So from reading -- all I can tell
14 is from what I'm reading here is what
15 Joseph Millward has said something about news
16 articles. But as far as what investigations or
17 what he's using to base that, I couldn't tell
18 you, but I'm just reading what it says.

19 Q. Okay. Well, the compliance
20 department, it looks like, has looked into this
21 and determined that this pharmacy, this Giant
22 Eagle pharmacy, is filling prescriptions for
23 opioids for prescribers who are being
24 investigated.

1 That's what they've determined
2 here so far, right?

3 A. That's what it says, yes.

4 Q. Okay. You agree that that's a red
5 flag, that pharmacists should be on the lookout
6 for a prescriber who's being investigated?

7 A. Certainly it's a data point to
8 consider, sure.

9 Q. It goes on to say -- it says, "The
10 Rx's are coming from prescribers who are being
11 investigated, based on news article, and plastic
12 surgeons."

13 Do you see that?

14 A. Yes.

15 Q. Okay. While a plastic surgeon may
16 prescribe an opioid after a medical procedure,
17 do you agree that it would be a red flag for a
18 plastic surgeon to be prescribing opioid use
19 disorder treatment drugs?

20 MR. BARNES: Objection; calls for
21 a medical opinion. He's not here as an
22 expert, in any event.

23 But go ahead and answer, Jim.

24 A. Certainly a plastic surgeon is a

1 fully authorized physician, M.D., that can --
2 that has legal rights to write for
3 prescriptions. And certainly if they have a DEA
4 license for that drug that they're dispensing in
5 that particular class, they have authority to
6 prescribe those medications as they see being
7 fit in their professional judgment.

8 Q. My question is a little bit
9 different.

10 Do you agree that it would be a
11 red flag for a plastic surgeon to be writing
12 prescriptions for opioid treatment drugs?

13 A. It would be something to consider,
14 yes.

15 Q. Okay. And then it goes on to say,
16 "for other prescribers who may be outside of
17 their normal course of professional practice."

18 Do you see that?

19 A. Yes.

20 Q. Then it says, "Some of the
21 prescribers are from outside of the normal
22 service area for the stores."

23 Do you see that?

24 A. Yes.

1 Q. Do you agree that that is also a
2 red flag, filling prescriptions for doctors who
3 are outside of the normal service area of the
4 store?

5 A. It's a data point to consider,
6 yes.

7 Q. But despite all these red flags,
8 you agree that these prescriptions were getting
9 filled?

10 A. I can't ascertain if they got
11 filled or didn't fill. Certainly I can read the
12 dialogue here that is stating that they were
13 filled and certainly the correspondence between
14 the individuals on this e-mail string, but
15 that's what they're suggesting, yes.

16 Q. Okay. Well, what we know is that
17 they were at least using enough of this product
18 that they were flagging on Giant Eagle's three
19 times threshold report by the 15th of the month,
20 correct?

21 A. What I ascertain from this string
22 is that there was -- the month before, these
23 drugs did not show up on a flag for these
24 stores. The following month they did, which

1 would mean that there was a change in
2 prescribing habits, which changed dispensing
3 habits from our side, which then shows us
4 picking that up and investigating that trend.

5 Q. And Mr. Millward goes on to say,
6 "I suggest that we shut off the buprenorphine
7 products to the two stores," and he underlines
8 that.

9 Do you see that?

10 A. Yes.

11 Q. And what's happening here is the
12 compliance department -- based on these
13 prescriptions being filled with the red flags
14 the compliance department saw, that they made
15 the decision that they wouldn't even ship any
16 more of this product to the store, correct?

17 A. What I see is they suggest that
18 they stop shipping this product to the stores
19 until they have a chance to look at it further
20 and investigate further.

21 Q. Okay. Well, he doesn't really say
22 "investigate." He says, "Until you have a
23 chance to visit, investigate, and retrain the
24 team members on the controlled substance

1 dispensing guidelines and red flags."

2 Do you see that?

3 A. Yes.

4 Q. And if you look up at the next --
5 well, sorry. Let's read the next sentence.

6 He says, "We'll then evaluate your
7 findings and determine if the pattern is
8 suspicious and if the DEA should be notified."

9 Do you see that?

10 A. Yes.

11 Q. Do you know whether or not the DEA
12 was notified about this?

13 A. I do not.

14 Q. Okay. If we go up to the next
15 e-mail in the chain, it looks like two minutes
16 later, from 12:53 from the one we were just
17 looking at to 12:55, Mr. Millward then sends an
18 e-mail blocking buprenorphine products from
19 those pharmacies.

20 Do you see that?

21 A. I do, yes.

22 Q. If you go to the first page of the
23 document and start at the bottom. It looks like
24 here Mr. Evans forwards this e-mail chain to the

1 pharmacist at Stores 54 and 2402.

2 Do you see that?

3 A. Yes.

4 Q. Okay.

5 MR. BARNES: Hey, Jeff. I'm going
6 to interpose an objection. I don't see
7 any evidence that this has anything to
8 do with any of the drugs at issue in the
9 case or Lake and Trumbull County.

10 Can you clarify that?

11 BY MR. GADDY:

12 Q. Go up to the next e-mail, please,
13 Mr. Tsipakis. And you see that one of the
14 pharmacists writes back, and he says, "Hi,
15 Darren. We are now getting all of Medicine
16 Shoppe's scripts. Just got off the phone to
17 confirm that they are no longer stocking at all.
18 We've had so many calls on this product."

19 Do you see that?

20 MR. BARNES: Same objection;
21 irrelevant, outside the jurisdictions at
22 issue, and does not involve any of the
23 drugs at issue in the case.

24 Q. Do you see that, Mr. Tsipakis?

1 A. I'm sorry. Can you just -- yes, I
2 see that. Yep.

3 Q. Okay. And if we go up to the next
4 e-mail in the chain, it looks like Mr. Millward
5 again writes -- and takes off the pharmacist,
6 but just writes to his compliance team.

7 Do you see that in the "to" line,
8 in the "CC" line?

9 MR. BARNES: Same objections.

10 A. The compliance team and the loss
11 prevention team.

12 Q. Correct. He says, "Darren, why is
13 the Medicine Shoppe refusing to fill these
14 prescriptions? Do they believe the
15 prescriptions are not legitimate to fill? What
16 is the store documenting on the image notes or
17 hard copies as evidence of their due diligence
18 on the legitimacy of the prescriptions?"

19 Do you see that?

20 A. Yes.

21 Q. He then goes on to say, "They seem
22 to be laced with red flags."

23 Right?

24 A. Yes.

1 Q. And we've already looked at some
2 of those flags. Doctors being investigated,
3 correct?

4 A. What was written before, yes.

5 Q. Filling for doctors without a
6 specialty that was relevant to the treatment
7 drugs being dispensed?

8 MR. BARNES: Same objections.

9 Q. Correct, Mr. Tsipakis?

10 A. Certainly I can see what was
11 written on -- what was written in the e-mail,
12 yes. As far as -- I'm not the pharmacist there
13 that was filling the prescriptions, so I can't
14 comment on what they were looking at and what
15 they were filling and what information they had.

16 Q. And they were also filling for
17 doctors outside of the area according to this,
18 correct?

19 MR. BARNES: Same objections.

20 Same objections.

21 A. Whether they filled there or
22 didn't fill, I don't have -- I can't answer
23 that. I can only answer what's in this e-mail
24 string.

1 Q. Okay. Well, Mr. Tsipakis, you
2 agree it would not be a good thing for
3 Giant Eagle pharmacists to be filling controlled
4 substance prescriptions that are laced with red
5 flags?

6 MR. BARNES: Same objection.

7 A. A pharmacist, if they're -- if
8 they're confronted with prescriptions that have
9 red flags, they have a duty and a corresponding
10 responsibility to clear those red flags and to
11 be comfortable with those red flags, and either
12 they'll make a decision to proceed or not
13 proceed on filling those prescriptions. It's
14 what they do every day.

15 Q. Okay. But if they're filling
16 prescriptions that are laced with red flags,
17 you'll agree that's not a good thing?

18 MR. BARNES: Objection; misstates
19 not only his testimony but this
20 document.

21 A. The pharmacists in their
22 professional judgment would get a prescription,
23 do their diligence on that prescription, and if
24 there's anything that they feel is a red flag

1 concerning that prescription, they would proceed
2 accordingly to their professional judgment.

3 Q. Yes or no, Mr. Tsipakis. Should
4 they be filling prescriptions laced with red
5 flags or not?

6 MR. BARNES: Objection; asked and
7 answered twice.

8 You can try it one more time, Jim.

9 If your answer is the same, you can just
10 say it's the same answer.

11 A. So if a pharmacist has a
12 prescription and they determine there's a red
13 flag, if they filled the prescription, there
14 would be no more red flag. They would have
15 cleared the red flag. Otherwise, they wouldn't
16 have filled the prescription.

17 - - -

18 (Tsipakis Deposition Exhibit 6 marked.)

19 - - -

20 BY MR. GADDY:

21 Q. Let's look at what we'll mark as
22 Exhibit Number 6, P-HBC-1017. It's going to be
23 tab number 4 in your binder.

24 And this is going to be the

1 same -- not the same, but similar e-mail chain.

2 If we go to the bottom of the
3 second page, you'll see the e-mail from Millward
4 that we already looked. And I just want to show
5 you Jason's response.

6 So look at the bottom of page --

7 A. Is that the bottom --

8 Q. I'm sorry?

9 A. I'm sorry. Tab 4, right? Tab 4.

10 Q. Correct. And then look at the
11 bottom of page 2, and you'll see the Millward
12 e-mail that we looked at just a moment ago.

13 I just want you to orient yourself
14 real quick.

15 A. Yeah. Thank you. Just give me
16 one minute just to read from the back here just
17 so I get my chronological order here, so ...

18 Okay. I'm sorry. Page -- the
19 second page bottom was the same e-mail. Okay.
20 I see that.

21 Q. Okay. Now, let's flip to the
22 first page and look at Jason's response and his
23 analysis, okay?

24 A. I'm sorry. First page, right?

1 Q. Yep. Middle of the page, the
2 e-mail from Jason Mullen.

3 Do you see that?

4 A. On Friday, January 15th?

5 Q. Yes, sir.

6 A. Okay. Yep, I have it. Let me
7 just read that.

8 That's what you want me to read,
9 correct?

10 Q. We're going to read it together.

11 A. Oh, okay.

12 Q. He says, "I apologize for the
13 lengthy e-mail. Below is my analysis and the
14 attached spreadsheet goes in more depth on the
15 actual data." He says, "14 docs have prescribed
16 since the beginning of December, and three of
17 the doctors, Clark, El-Attrache and Harika,
18 previously had their medical license sanctioned
19 by the state."

20 Do you see that?

21 A. Yes.

22 Q. You agree that would be a red flag
23 for the pharmacist to look into, correct?

24 MR. BARNES: Objection. We are

1 continuing on with an incident involving
2 none of the drugs at issue, involving
3 neither jurisdiction at issue. So we
4 object and move to strike any testimony
5 related to this.

6 Q. Go ahead, Mr. Tsipakis.

7 A. Could you repeat your question?

8 Q. You'll agree the fact that three
9 of the doctors that these pharmacies were
10 filling prescriptions for, the fact that they
11 had their medical license sanctioned by the
12 state should be a red flag that the pharmacist
13 should look into a little bit further?

14 A. If they're aware of those, yes.

15 Q. Well, it's something that they
16 should have the ability to become aware of,
17 right, when they're filling controlled substance
18 prescriptions?

19 A. Well, I guess I'm trying to
20 understand the question.

21 So if someone is sanctioned,
22 depending on what they got sanctioned for, I
23 mean, they're still a legally authorized
24 practitioner to prescribe medication. If there

1 was -- if they were sanctioned for something
2 egregious involving their ability to prescribe
3 prescriptions, they wouldn't be able to
4 prescribe prescriptions.

5 Q. Well, Mr. Tsipakis, it was
6 important enough that Giant Eagle's compliance
7 department made a note of it when they were
8 investigating these prescriptions that caused
9 these pharmacies to pop on the threshold report,
10 right?

11 A. All I can read here is that
12 certainly from Mr. Mullen, he mentions that they
13 were previously sanctioned. I don't know what
14 they were sanctioned for. I can't make the
15 determination of the materiality of their
16 sanction. All I know is what he has stated
17 here, the "previously had their medical license
18 sanctioned."

19 Q. Okay. So you'll agree that's why
20 it would be a red flag that you would want your
21 pharmacist to look into a little bit further
22 before just filling this prescription for a
23 controlled substance, right?

24 MR. BARNES: Objection; asked and

1 answered already.

2 Q. Right, Mr. Tsipakis?

3 A. Sure.

4 MR. BARNES: Same objection.

5 Q. Okay. It says, "The other doctor,
6 Teet, is being criminally prosecuted for witness
7 tampering and falsification of records in a DEA
8 investigation about his buprenorphine
9 prescribing habits."

10 Do you see that?

11 A. Yes.

12 Q. Okay. I would assume that's a
13 little bit easier for you. That's definitely a
14 red flag, right?

15 MR. BARNES: Same objections.

16 A. Yeah.

17 Q. Mr. Tsipakis?

18 A. Yes. It's certainly a data point
19 to consider, yes.

20 Q. Okay. It goes on to say that this
21 Dr. Teet is predominantly practicing as a
22 plastic surgeon. And you already told us that
23 that would be a red flag to look into, the fact
24 that a plastic surgeon is writing prescriptions

1 for drugs used to treat opioid use disorder?

2 MR. BARNES: Objection; misstates
3 his prior testimony. That's not what he
4 said.

5 Q. Is that right, Mr. Tsipakis?

6 A. Again, what I'm reading here, it's
7 saying Dr. Teet is predominantly practicing as a
8 plastic surgeon. This is from Jason Mullen.

9 Again, he's a medical physician
10 with sanctioned authority to treat patients and
11 to prescribe medication, and -- I guess I don't
12 understand the particular question.

13 Q. I'm asking you whether or not it
14 should be a red flag that you have a plastic
15 surgeon writing prescriptions for drugs that are
16 used to treat people with opioid use disorders,
17 whether or not that's something that you would
18 want your pharmacists at Giant Eagle to look
19 into a little bit further?

20 MR. BARNES: Objection; asked and
21 answered.

22 A. Sure. It's a data point they
23 should look at and consider. If they're
24 presented with it and they have it, of course,

1 sure.

2 Q. Okay. Below that, Jason notes,
3 "Additional findings of note."

4 On the second bullet point there,
5 he says, "Several patients reside at the same
6 address."

7 Do you see that?

8 A. I'm sorry. I was under the line,
9 "The analysis with a date range to present" --
10 I'm sorry. Are you further down or -- oh, okay.

11 Q. It's highlighted on the screen in
12 front you, too, if you want to look at that.

13 A. Oh, okay. Yep. Thank you. So
14 it's the paragraph below. Okay. "Additional
15 findings of note."

16 Q. You see, "Several patients reside
17 at the same address"?

18 A. Yes.

19 Q. Okay. You'll agree that that's a
20 red flag that a pharmacist should look into
21 further?

22 A. Yes.

23 Q. And then it says, "Three
24 practitioners." And it lists them there --

1 represent almost 60 percent of the buprenorphine
2 business at the one pharmacy.

3 Do you see that?

4 A. Yes.

5 Q. Do you agree that when you have
6 doctors writing such a high volume of controlled
7 substances, that that's a red flag that you
8 would want your pharmacists to look into a
9 little further?

10 MR. BARNES: Same objections.

11 A. I mean, they would become familiar
12 and you would know that. But, sure, yes, it's a
13 data point to consider.

14 Q. If you go to the last section, it
15 says, "Based off analysis for Store 54."

16 Do you see that?

17 A. Yes.

18 Q. Do you see it's looking at the
19 types of payment?

20 And it says in the first bullet
21 point, "24 patients have paid cash." And the
22 second bullet point, "22 patients have used
23 third-party payments or insurance."

24 Do you see that?

1 A. Yes.

2 Q. And do you agree the fact that
3 over half of the prescriptions are being paid
4 for in cash is yet another red flag that you
5 would want your pharmacists to look out for and
6 do a little bit more investigation before
7 filling these prescriptions for opioids that are
8 being paid for in cash?

9 MR. BARNES: Same objections.

10 A. Certainly a data point to
11 consider, yes.

12 Q. If we turn to the next page, they
13 talk a little bit about the distance. And they
14 show that as far as the distance between the
15 pharmacy and the doctor, it's as high as
16 82 miles away and an average distance of about
17 45 miles away.

18 Do you see that?

19 A. Yes.

20 Q. Again, do you agree those are red
21 flags that you would want your pharmacists to
22 look into and investigate a little bit further
23 before they fill these prescriptions?

24 MR. BARNES: Same objections.

1 Q. I'm sorry. Mr. Tsipakis, if you
2 answered -- y'all are speaking over each other.

3 A. Yes.

4 Q. Okay.

5 A. A data point to consider. Yes.

6 Q. Okay. And then in the next two
7 blocks, you see the distance between the patient
8 and the pharmacy was as high as 30 miles,
9 average of 13.5, and distance from the patient
10 to the doctor is as high as 81 miles, an average
11 of almost 50 miles.

12 You'll agree that those are also
13 red flags that you would want your pharmacists
14 to look into before filling these prescriptions?

15 MR. BARNES: Same objections.

16 A. Certainly data points to consider.

17 Q. Now, when Mr. Millward said in the
18 last e-mail that these prescriptions looked like
19 they were laced with red flags, that was before
20 he had a lot of this additional information
21 about the percentage of cash payments and the
22 specific distances that patients were traveling
23 to see these doctors and to get to these
24 pharmacists, correct?

1 A. I'm sorry. The question was, was
2 this e-mail after his e-mail before? Yes. It
3 was exact -- I'm just trying to see the time if
4 it's the same day or next day, but ...

5 I believe it was after, yes.

6 Q. Now, where is Jason able to pull
7 this type of information from?

8 MR. BARNES: Jeff, I'm showing the
9 45 minutes have lapsed.

10 Can we get a confirmation of that
11 from the videographer?

12 THE VIDEOGRAPHER: Yeah, it just
13 started, 45 minutes.

14 MR. BARNES: He just hit it?

15 Okay.

16 We have a redirect examination I'd
17 like to move into.

18 MR. KOBRIN: Bob?

19 MR. BARNES: Yeah?

20 MR. KOBRIN: Hold on one sec. I
21 just want to -- we don't need to take a
22 break or anything, but I do want to just
23 quickly -- I'm just going to give you a
24 call, if I can, about documents we might

1 want.

2 We can all stay on if we want.

3 I'm just going to leave my office for a
4 second.

5 MR. BARNES: Let's take a
6 five-minute break in between the end of
7 the direct and my cross, okay?

8 Off the record for five minutes.

9 THE VIDEOGRAPHER: The time is
10 10:55 a.m.

11 Off the record.

12 (Recess taken.)

13 THE VIDEOGRAPHER: The time is
14 11:10 a.m.

15 Back on the record.

16 - - -

17 REDIRECT EXAMINATION

18 BY MR. BARNES:

19 Q. Good afternoon, Mr. Tsipakis.

20 A. Good afternoon.

21 Q. As you know, I'm Robert Barnes. I
22 represent Giant Eagle.

23 You were deposed by Peter Mougey
24 back on March 17th of 2021 and today by Jeff

1 Gaddy.

2 I have some follow-up questions
3 from both depositions since we didn't have an
4 opportunity to question you back in March. So
5 some of the stuff, we haven't heard today, but
6 since this is a continuance of March, it's fair
7 game to go into.

8 Do you recall being asked a lot of
9 questions about Giant Eagle's controlled
10 substance dispensing guidelines which was
11 Exhibit 1 to your prior deposition?

12 A. Yes.

13 Q. And do you have those exhibits
14 nearby from the prior deposition? There were
15 only two exhibits. One was the dispensing
16 guidelines, and one was an unpublished
17 controlled substance manual.

18 Do you remember those?

19 A. Yes. I have them.

20 Q. Okay. Now, with respect to the
21 guidelines, one portion of the guidelines that
22 was not covered in your last deposition was on
23 page 4 called "Giant Eagle's Promise of
24 Support." And it begins, "Giant Eagle supports

1 the professional judgment of each pharmacy team
2 member."

3 Do you see that?

4 A. Yes.

5 Q. What is the significance of that
6 portion of the guidelines?

7 A. The significance is that
8 Giant Eagle as a corporation stands behind the
9 professional judgment of our pharmacists, and we
10 act ready to give them not only the support but
11 whatever resources they need to do their job.

12 Q. It says, "Giant Eagle will support
13 the decision of the pharmacist."

14 Whatever -- does that mean that
15 Giant Eagle will support whatever decision the
16 pharmacist comes to after they exercise whatever
17 due diligence they deem appropriate and decide
18 to fill or not fill the prescription?

19 A. Yes.

20 MR. GADDY: Objection to form.

21 Q. So either way, Giant Eagle is
22 going to support the professional judgment of
23 the pharmacists, fill or not fill?

24 A. Yes.

1 Q. And are you aware of circumstances
2 in which Giant Eagle pharmacists have refused to
3 fill prescriptions?

4 A. Yes, absolutely.

5 Q. Does that happen on a regular
6 basis?

7 MR. GADDY: Objection to form.

8 A. It happens, yes.

9 Q. Okay. But why would a pharmacist
10 care if the company that employs him or her is
11 going to be supportive of their decision?

12 I mean, why care one way or the
13 other?

14 A. It's important --

15 MR. GADDY: Objection to form.

16 A. It's important for the pharmacist
17 to know that they're allowed to practice and to
18 make decisions based on their professional
19 judgment and they'll have support from their
20 company. And if they don't feel comfortable
21 filling a prescription, then the company will
22 support that decision and not force them to fill
23 a prescription or to coerce them to fill a
24 prescription. It's 100 percent support of their

1 judgment.

2 Q. And you're a professional
3 pharmacist; is that correct?

4 A. Yes.

5 Q. And you actually have experience
6 filling prescriptions in stores?

7 A. Many years. Yes.

8 Q. Okay. And can you tell us, in
9 terms of looking at a prescription in hindsight,
10 is it possible to look at the data only and
11 determine whether the pharmacist made a good or
12 bad judgment?

13 A. It's impossible to do that
14 retrospectively. When you're the pharmacist at
15 the counter, you're using your judgment. You
16 have the data points and circumstances in front
17 of you. You have the patient in front you. You
18 have the physician interactions. There's a
19 whole plethora of data points that are used to
20 either fill or not fill a prescription.

21 And just by looking at the data,
22 it would be impossible to second-guess or come
23 to a conclusion one way or the other if you
24 weren't there.

1 Q. Okay. And are you aware of any
2 organization, say, for example, PDMP programs,
3 including OARRS, suggesting or requiring that
4 pharmacies identify and apply red flags to
5 prescriptions?

6 A. Requiring, no.

7 Q. Okay. Now, you were asked a lot
8 of questions in both your prior March deposition
9 and today about red flags.

10 Can you clarify for the record
11 what in your experience as a professional
12 pharmacist -- what does the term "red flag" mean
13 to you?

14 And more specifically, what does
15 it mean in terms of whether or not it is any
16 indication of whether or not a prescription is
17 legitimate or not legitimate?

18 A. Sure. A red flag is certainly
19 something to consider when you're filling a
20 prescription. A red flag could be a lot of the
21 things that we discussed, but certainly a red
22 flag could be dosage that's out of the ordinary.
23 A patient's age contraindication, an OTC
24 indication. A red flag is not only about

1 suspicious activity, it's also about a clinical
2 red flag.

3 So a red flag to me is a piece of
4 information that's important, when you're about
5 to fill a prescription and counsel a patient on
6 a particular medication and therapy, to take all
7 that into consideration and then come to a
8 conclusion on either to fill a prescription or
9 how to counsel a patient or how to watch a
10 patient for continual support in therapy, et
11 cetera.

12 Q. All right. Is the filling of a
13 prescription -- is that -- do you consider that
14 a health care decision?

15 MR. GADDY: Objection to form.

16 A. Could you either repeat the
17 question or -- it would help, please.

18 Q. Sure, sure. Do you consider your
19 role as a professional pharmacist to be part of
20 a health care -- part of our health care system?
21 Are you a health care professional?

22 A. Yes, absolutely.

23 MR. GADDY: Form.

24 Q. And so when filling a

1 prescription, is it in your mind part of the --
2 is it a health care determination as to whether
3 or not this patient should get this medication
4 at this point in time?

5 MR. GADDY: Objection to form.

6 A. So from a pharmacist's perspective
7 and a pharmacy perspective, we're not
8 diagnosticians. We don't have the education or
9 training to diagnose. So our role is not to
10 second-guess whether a prescription is the
11 proper medical prescription for a patient or
12 not.

13 Our role is to make sure the --
14 from a therapy that has been prescribed by a
15 licensed practitioner, to be checking for drug
16 interactions, to be checking for the DURs that
17 we do, to check for legitimacy of a prescription
18 being issued by a licensed and authorized
19 prescriber, and then also helping the patient,
20 counseling the patient on how to use that
21 medication, side effects of the medication.

22 So the fact that our training and
23 also limited information that we have at the
24 pharmacy counter, we're not diagnosticians and

1 doing anything with the diagnosis of the
2 patient. That's the physician's primary -- or
3 whoever the practitioner is who treated the
4 patient's responsibility.

5 Q. Is the pharmacist supposed to make
6 any medical judgment in filling a prescription?

7 MR. GADDY: Objection to form.

8 A. Medical judgment, no.

9 Q. And is that because you have no
10 medical training in terms of medical school,
11 residencies, all the things that doctors do?

12 A. Yes. We're not equipped to make
13 those type of decisions, and not authorized to
14 prescribe either.

15 Q. I see. But doctors, they're
16 licensed to prescribe medications for their
17 patients; is that correct?

18 A. Correct. And trained to as well,
19 yes.

20 Q. And you were asked some questions
21 earlier by Mr. Gaddy about doctors being
22 suspended or investigated.

23 Have you ever been trained or
24 advised that the fact that a doctor is being

1 investigated means that he cannot issue a
2 prescription?

3 A. No, just because they're being
4 investigated -- unless their -- unless their
5 prescribing powers or ability to prescribe
6 medications either from the medical board or
7 from the DEA are taken away, they are authorized
8 to write prescriptions and to effectuate
9 prescriptions.

10 Q. Does the pharmacist or the
11 pharmacy have any ability to revoke or suspend a
12 doctor's license to prescribe?

13 A. Absolutely not.

14 Q. Getting back to this whole idea of
15 red flags, are you aware of any state
16 regulations that list or require the application
17 of red flags in the dispensing process?

18 A. No.

19 Q. To your knowledge, has the Ohio
20 Board of Pharmacy ever issued regulations that
21 said, "Here are the red flags that you must
22 follow when filling a prescription"?

23 A. No.

24 Q. Why do pharmacists even use the

1 term "red flags" if it's not in state
2 regulations or in DEA regulations?

3 A. They're used as things to look
4 for, data points. Certainly through
5 pharmacists' training, continuing education, et
6 cetera, there's things that come up that are
7 good to know and certainly to reinforce from a
8 practical and a training perspective. But,
9 again, it comes to the pharmacist's professional
10 judgment on the prescription dispensing process.

11 Q. And do pharmacists in the exercise
12 of their professional judgment in filling
13 prescriptions sometimes dispense medications
14 even if there had been a red flag?

15 A. Absolutely. Yes.

16 Q. And why is that? Why wouldn't a
17 pharmacist just say, "I'm not filling your
18 prescription because, for example, you drove
19 36 miles, and I think that's too far"?

20 A. It would be irresponsible and
21 dangerous for pharmacists to just blanket not
22 fill prescriptions. Obviously they were issued
23 from a medical practitioner that in their
24 judgment believed that this patient needs this

1 medication for treatment and therapy.

2 And for us to just make a blanket
3 determination, that would be very dangerous to
4 the patient and certainly to the care of that
5 patient.

6 Instead, our -- the expectation
7 will be for the pharmacist to have whatever they
8 need to look at for that particular
9 prescription, any red flag, whether it be
10 distance or something else, to clear those red
11 flags or to understand those red flags or
12 discuss any concerns with the prescriber or
13 patient or certainly a family member, whatever
14 needs to happen before they dispense that
15 prescription to make it not a red flag anymore
16 for that -- for that prescription or certainly
17 that pharmacist.

18 Q. Can you tell whether or not in
19 hindsight by looking at data if a prescription
20 is legitimate or not?

21 MR. GADDY: Asked and answered.

22 A. No.

23 Q. With respect to how pharmacists go
24 about clearing red flags and specifically with

1 respect to documenting what they did with red
2 flags, are you aware of any requirement either
3 in the state or the federal regulations that
4 requires a pharmacist to write anything down
5 when filling a prescription and clearing red
6 flags?

7 A. There is no such requirement. No.

8 Q. Why do pharmacists sometimes write
9 things down then?

10 A. It's the pharmacist's discretion
11 on whether they need to document, whether they
12 need to communicate to another pharmacist,
13 whether they need to put something on the
14 prescription for insurance purposes or other
15 reasons, so certainly it depends.

16 Pharmacists have that discretion
17 and judgment on when they would need to document
18 something or if it wasn't important to document
19 or needed to be documented.

20 Q. To your knowledge, has the DEA or
21 the Ohio Board of Pharmacy ever advised
22 Giant Eagle that it had to write anything down
23 with respect to its pharmacists' due diligence?

24 A. No, never.

1 Q. And are Giant Eagle pharmacists
2 and their stores in regular and constant contact
3 with the Board of Pharmacy and their
4 investigators and agents?

5 A. Yes.

6 MR. GADDY: Objection to form.

7 A. Yes, often.

8 Q. In what way? Can you describe the
9 ways in which Giant Eagle and its employees and
10 pharmacists are in such contact, constant
11 contact, with the Board of Pharmacy.

12 A. Sure. Absolutely.

13 We have regular inspections that
14 the state and certainly the DEA do with our
15 stores; some announced, some unannounced. We
16 also have Ohio regulations on if there's
17 concerns around a controlled substance or loss
18 of a controlled substance, we need to notify the
19 board.

20 As part of investigations, folks
21 from the board or DEA may come in to get
22 information from us or ask us questions.

23 Also, as mentioned earlier and
24 testified earlier, we have a very robust loss

1 prevention department lead by Rick Shaheen, who
2 has long-standing relationships with the
3 Attorney General, DEA, FBI from his previous
4 employ.

5 So there's a lot of conversations
6 between him and the Board of Pharmacy, him and
7 our stores. So it's a constant open
8 communication amongst law enforcement, our
9 pharmacists, and our corporate resources.

10 Q. All right. Going back to the
11 Giant Eagle dispensing guidelines, these were
12 issued I believe in 2013 I think was your prior
13 testimony.

14 Do you recall that?

15 A. Yes, that's correct.

16 Q. The fact that they were issued --
17 there's a date on the bottom. This is
18 Exhibit 1, "Created 7/22/2013." Would I be
19 correct or incorrect if I read that to mean that
20 Giant Eagle had no dispensing guidelines before
21 these written guidelines were issued in July of
22 '13?

23 A. That would be incorrect.

24 Q. What did Giant Eagle have before

1 these 2013 guidelines were issued, either
2 written or unwritten?

3 A. Certainly the pharmacies had
4 things that we had on our intranet portal of
5 our -- where the resources are. They had the
6 pharmacist manual at each pharmacy from the DEA,
7 various Board of Pharmacy rules and regs, and
8 certainly any things -- education, training, or
9 things that were provided from the board or
10 other sources.

11 So there was a multitude of things
12 that were available and certainly disseminated
13 to the stores.

14 Q. You mentioned the DEA pharmacist's
15 manual in your answer. Is that a manual used in
16 the industry by pharmacists in their day-to-day
17 practice?

18 A. Yes. Absolutely.

19 Q. In fact, do you have experience as
20 a professional pharmacist using the DEA
21 pharmacist's manual in your dispensing
22 experience?

23 A. Yes.

24 Q. And is that manual -- is it your

1 testimony that that manual was always available
2 to Giant Eagle pharmacists during the time
3 period we're talking about, which is basically
4 2006 to 2019?

5 A. Yes.

6 Q. Okay. Now, the dispensing
7 guidelines for Giant Eagle have several sections
8 called "Appropriateness of Controlled Substance
9 Prescriptions (red flags)."

10 Why issue this to your pharmacists
11 and pharmacies if they already have the DEA
12 pharmacist manual? What's the purpose of
13 sending this out and calling these guidelines
14 and telling your pharmacies and pharmacists
15 about these red flags?

16 A. So it's important to continue as
17 part of any licensed practitioner, and certainly
18 in the pharmacist perspective, there's
19 continuing education, there's training, there's
20 things that change in the marketplace and things
21 to be aware of.

22 What was important here is around
23 this time, the DEA was more vocal about red
24 flags and things to consider based on the

1 prescribing by practitioners and things that was
2 in the marketplace.

3 So it was just a good idea to make
4 sure that all these things continue to be top of
5 mind for our pharmacists, which already were,
6 certainly, but adding it -- adding it for them
7 to consider, which they already consider these
8 things as well, but, again, continuing to
9 reinforce information.

10 Q. Now, are red flags -- do they
11 apply across the board to every patient, or are
12 they individualized by patient?

13 A. They're individualized by patient.
14 There is no one size fits all red flag.

15 Q. Okay. Now, in your last
16 deposition in March, you were asked a lot of
17 questions about so-called physical security
18 controls.

19 Do you recall that line of
20 questioning?

21 A. Yes.

22 Q. I want to follow up a little bit
23 with that.

24 Are all Giant Eagle pharmacies

1 located inside Giant Eagle grocery stores?

2 A. Yes.

3 Q. And does that have anything to do
4 with security in a good way or a bad way or any
5 way?

6 A. Certainly from a security
7 perspective, we're inside of a bigger, larger
8 business. Many of our stores have -- all of our
9 stores have security and loss prevention. Some
10 have armed security, local police departments
11 and armed security, depending on the store and
12 location and volume of the stores.

13 There's more management staff.
14 There's more employees in the stores. Certainly
15 being in a location in the store usually
16 typically to the back or to the side,
17 certainly -- we're within a larger business.

18 Q. Okay. And wherever the pharmacy
19 is in the grocery stores, are there physical
20 segregations or security systems that prevent
21 just grocery customers from accessing the
22 pharmacy or even grocery employees, for example?

23 A. Yes, absolutely. The pharmacy is
24 a separate department with barriers and

1 barricades. And certainly after hours, all that
2 is locked up and secured.

3 All of the pharmacies have
4 state-of-art monitoring systems, camera systems,
5 alarm systems that monitor all the activity of
6 the pharmacy, both from the employee level on
7 the interior of the pharmacy or anyone outside
8 of the pharmacy, including any of the back areas
9 that are adjacent to the pharmacy.

10 Q. Can grocery employees or grocery
11 customers gain access to the pharmacy?

12 A. They cannot.

13 Q. Is the access to the pharmacy
14 limited in some way?

15 A. The access to the pharmacy is
16 absolutely limited to the employees of the
17 store -- of the pharmacy rather, and limited
18 access for members of management only when a
19 pharmacist is present and has allowed them to
20 enter.

21 Q. Now, with respect to how the
22 pharmacies handle controlled substances,
23 including opioids, are there special procedures
24 and policies that Giant Eagle has implemented

1 and follows to specially handle controlled
2 substances?

3 A. Yes. Absolutely. We follow all
4 of the policy and procedures certainly in
5 regards to controlled substances that the DEA
6 has set forth.

7 And we go above and beyond with
8 our own policy and procedures on how we handle
9 controlled substances, how they're received, how
10 they're unpacked, how they're stored, who has
11 access to keys to access the locked safes and
12 cabinets that the controlled substances are in.
13 All that is documented and all of that is under
14 surveillance at all times.

15 Q. You mentioned how controlled
16 substances are received. Let's take it a step
17 back.

18 When a pharmacist enters an order
19 for a controlled substance, that either goes to
20 the Giant Eagle distribution warehouse or to
21 either McKesson -- McKesson at the time; is that
22 right?

23 A. At the time it was McKesson.
24 Currently it's Cardinal, yes.

1 Q. It's currently Cardinal.

2 And when a pharmacist enters an
3 order for a controlled substance, is there --
4 are there controls and oversight over that
5 process? Can a pharmacist, for example, order,
6 you know, 100 bottles of OxyContin willy-nilly
7 without any oversight?

8 A. They cannot. An order can be
9 placed, but that order is scrutinized for
10 validity and for volume and from a threshold
11 perspective, that if they order more than we --
12 more than a threshold allows, that order will be
13 kicked out and not effectively filled.

14 Q. Okay. That threshold system you
15 mentioned, I think you testified that that began
16 in 2013; is that right?

17 A. The automated threshold system,
18 yes.

19 Q. Okay. Was there some other
20 non-automated threshold system before then?

21 A. Certainly there was folks in the
22 compliance department and employees whose sole
23 job was to monitor activities at the store,
24 orders. Our own warehouse, too, monitoring

1 orders that left the warehouse for the stores,
2 folks from corporate certainly on the same
3 orders and certainly the prescriptions that were
4 dispensed. So there was always supervision.

5 Q. Now, did the DEA approve and
6 inspect prior to opening and after opening both
7 of Giant Eagle's drug warehouses, the HBC and
8 the GERx facilities?

9 A. Yes.

10 Q. Now, HBC and GERx never operated
11 simultaneously with respect to controlled
12 substances; is that correct?

13 A. That is correct.

14 Q. And, in fact, Giant Eagle didn't
15 even distribute any controlled substances until
16 November of 2009; is that right?

17 A. That is correct.

18 Q. And then the license that it had
19 for the HBC warehouse was a Schedule III, IV, V
20 license; is that right?

21 A. That is correct.

22 Q. And HBC never had a Schedule II
23 license; is that right?

24 A. Correct.

1 Q. And some of the most prominent
2 drugs in this case are Schedule II opioids; is
3 that right?

4 MR. GADDY: Objection to form.

5 A. There were Schedule III opioids
6 that were reclassified to Schedule II in October of
7 2016.

8 Q. Right. But you're aware that in
9 this case, the focus is on Schedule II opioids;
10 is that right?

11 MR. GADDY: Objection; form.

12 A. Yes.

13 Q. And my point is that HBC's license
14 never permitted it to distribute any Schedule II
15 opioids; is that correct?

16 A. That is correct.

17 Q. Okay. But with respect to the HBC
18 warehouse, in order to be licensed, it had to
19 apply and be approved and be inspected by the
20 DEA; is that right?

21 A. Yes.

22 Q. And in order to maintain its
23 license, it had to go through random inspections
24 where the DEA agents would show up and demand to

1 see records and inspect the warehouse and things
2 of that nature, correct?

3 A. Correct.

4 MR. GADDY: Object to form.

5 Bob, you objected all throughout
6 my questioning about distribution
7 related issues, and you're asking him
8 about a warehouse being licensed. This
9 has nothing to do with dispensing.

10 Q. Are you familiar with that,
11 Mr. Tsipakis?

12 A. Yes.

13 Q. Okay. The inspections prior to
14 2013 of the Giant Eagle HBC facility, were you
15 aware that the DEA looked at Giant Eagle's
16 operations, including its SOM system, suspicious
17 order monitoring system, prior to 2013?

18 MR. GADDY: Form and scope. This
19 is not included in any of the topics of
20 the 30(b)(6) notice that deals with
21 dispensing issues.

22 Q. You can answer, Jim.

23 A. Yes.

24 Q. All right. And are you aware in

1 2013 of the DEA -- well, 2009 through 2013, the
2 DEA inspections all concluded full compliance
3 with Giant Eagle's and full compliance with all
4 DEA regulations?

5 A. Yes.

6 MR. GADDY: Form, scope, misstates
7 the evidence.

8 Q. Was that a yes, Mr. Tsipakis?

9 A. Yes.

10 MR. GADDY: Same objections.

11 Q. Now, in 2013, are you aware that
12 the DEA as part of its inspection in 2013 made a
13 recommendation that Giant Eagle add an automated
14 system -- a threshold system to all of its other
15 internal controls as a recommendation to improve
16 their controls?

17 MR. GADDY: Form, scope,
18 misstates.

19 A. Yes.

20 Q. Okay. And to your understanding,
21 is that -- was that the trigger for the creation
22 of the threshold report in 2013, the automated
23 report?

24 MR. GADDY: Form, scope.

1 A. Yes.

2 Q. Okay. And even without the
3 automated threshold report, was it your
4 understanding or is it your understanding that
5 the DEA had concluded Giant Eagle was in full
6 compliance with all DEA regulations, including
7 SOM regulations, even without an automated
8 threshold report?

9 MR. GADDY: Form; scope;
10 misstates. Colosimo said they were not
11 in full compliance.

12 MR. BARNES: Actually, your
13 objection misstates, if anything.

14 A. The answer is yes.

15 Q. Okay. So was the automated
16 threshold report an add-on control to an already
17 fully compliant system at the HBC warehouse?

18 MR. GADDY: Form, scope,
19 misstates.

20 A. Yes. It was our intent of
21 continual improvement, continuous improvement.

22 Q. Okay. So getting back to at the
23 pharmacy level. So a pharmacist enters an order
24 for a controlled substance, and it either goes

1 to HBC at the time -- which couldn't take any
2 Schedule II orders, so it would have to go to
3 McKesson, correct?

4 A. Correct.

5 Q. But then later for GERx, the GERx
6 facility had a Schedule II license, right,
7 beginning in about March of 2016?

8 A. That is correct.

9 Q. Okay. And that facility also had
10 to go through DEA application, pre-open
11 inspection, post-open inspections, et cetera,
12 correct?

13 MR. GADDY: Form, scope.

14 A. Yes. Absolutely.

15 Q. And is it your understanding that
16 the DEA had similarly concluded that the GERx
17 facility met all the requirements, including the
18 SOM regulations?

19 MR. GADDY: Form, scope,

20 misstates.

21 A. Yes. And actually even on the
22 controlled substance vault, the C-II vault that
23 we had, they commented on how well that was put
24 together and actually even above what was

1 required, so yes.

2 Q. Okay. So getting back to the
3 placement of an order.

4 So a pharmacist decides to fill in
5 his professional judgment a controlled substance
6 prescription, and if it's during the HBC time,
7 if it's a Schedule II, that has to go to --
8 excuse me -- it has to go to McKesson, correct?

9 A. Correct.

10 Q. If it's Schedule III, IV, V, it
11 could go to HBC, correct?

12 A. Correct.

13 Q. All right. And are you aware of
14 any controls at those facilities on the order?

15 Let's first -- let's pretend it's
16 a Schedule II and it has to go to McKesson.

17 To your knowledge, did McKesson
18 implement and enforce controls on Giant Eagle
19 pharmacy orders going to McKesson?

20 A. Yes.

21 MR. GADDY: Form, scope.

22 Q. Now, with respect to the -- if it
23 went to the HBC facility because it wasn't a
24 Schedule II -- and, therefore, had nothing to do

1 with this case -- let's say, if it was for some
2 product, say, an opioid Schedule III, were there
3 controls at the warehouse over that order that
4 would make sure that the pharmacist was entering
5 a legitimate order?

6 A. Yes.

7 MR. GADDY: Form, scope.

8 A. Yes. Absolutely.

9 Q. Okay. And you already covered in
10 your 2018 deposition all the controls at the
11 warehouse. And I don't want to repeat any of
12 that other than to say, did you generally
13 describe all of those controls in your
14 December 2018 deposition?

15 A. Yes, I did.

16 Q. Okay. So what controls occur --
17 once an order goes in and it goes through either
18 a McKesson review or an HBC review, are there
19 corporate level controls over those orders in
20 addition to those two levels of control?

21 MR. GADDY: Objection to form.

22 Objection to scope. This is supposed to
23 be a dispensing deposition, not talking
24 about distribution related controls.

1 Q. Go ahead, Jim.

2 A. Yes.

3 Q. Okay. And what are some of the
4 corporate level controls over those orders in
5 addition to the warehouse or McKesson level
6 controls?

7 MR. GADDY: Can I get a standing
8 objection to all the questions regarding
9 distribution and warehouses and controls
10 on ordering of controlled substances as
11 opposed to dispensing?

12 MR. BARNES: You asked a lot about
13 threshold reports.

14 MR. GADDY: I'm just asking if I
15 can get a standing objection so I don't
16 have to interrupt you every time.

17 MR. BARNES: Yep.

18 MR. GADDY: Thank you.

19 BY MR. BARNES:

20 Q. So, Jim, go ahead. Corporate-type
21 controls over orders.

22 What did some of those controls
23 include?

24 A. Sure. So we had corporate

1 compliance individuals who were monitoring those
2 orders. We had internal auditors that if there
3 were concerns about orders, we could dispatch.
4 We had our pharmacy district managers who were
5 dispatched if there were things that we wanted
6 them to look at. Reports that were regularly
7 run on things that we wanted to keep an eye on
8 and abreast of.

9 We also had an open dialogue on a
10 communication of things, whether from a loss
11 prevention side on things for us to keep an eye
12 on, or external things that were happening at
13 other chains or other places that we would get
14 information on that we would act on, and
15 proactively prepare for and screen for.

16 So, really, it was a system of
17 multiple touch points all working for the same
18 purpose, to make sure that all of our orders
19 were scrutinized and being handled in the
20 appropriate fashion.

21 Q. All right. And when the
22 controlled substances arrived at the pharmacy,
23 were there controls over those incoming
24 controlled substances such that they were

1 maintained differently than other stock, for
2 example?

3 A. Yes. Absolutely. They would come
4 in different identifiable totes. Pharmacists
5 only would be allowed to open those totes. They
6 would be required to check in those products for
7 any shortages or any -- making sure that the
8 product arrived intact.

9 And it was their responsibility if
10 there was any discrepancies, to immediately flag
11 those discrepancies, saving those invoices,
12 signing off on those invoices, and then properly
13 putting that inventory into stock and updating
14 any on-hand quantities related to those drugs.

15 Q. And where were, say, Schedule II
16 controlled substances kept? Were they kept with
17 the regular stock, or were they segregated?

18 A. They were segregated in a locked
19 safe. And the products would come in on a
20 secured tote. Pharmacists only would be allowed
21 to open that tote, would check in the product,
22 and then immediately put that product into the
23 safe adding it to the current inventory on hand.

24 Q. Meanwhile, you testified back in

1 December of '18 about the inventory management
2 system that the warehouse had.

3 Was the inventory management
4 system used at Giant Eagle, was it monitoring
5 the flow of product from the warehouse to the
6 pharmacies?

7 A. Yes.

8 Q. And so not only was there a
9 physical check-in process, was the computerized
10 inventory system updating itself to show the
11 arrival of the product at the pharmacies?

12 A. Yes.

13 Q. Now, when the controlled
14 substances were put in the safes, what was the
15 next movement of that product? Was it a filling
16 of a prescription?

17 A. That product would not come out of
18 the safe unless it was pursuant to a
19 prescription that needed to be dispensed or
20 counted during our monthly narc audits.

21 Q. Now, is a monthly narc audit -- by
22 "narc," do you mean a Schedule II controlled
23 substance, or is it broader than that?

24 A. Schedule II product, yes.

1 Q. Okay. Does the DEA or the Ohio
2 Board of Pharmacy require a monthly narc audit?

3 A. They do not.

4 Q. Why does Giant Eagle do it every
5 month?

6 A. It's important for us to make sure
7 that we have a proper control -- actually,
8 better than required control on our controlled
9 substances to make sure that with everything --
10 with the dispensing and with the pharmacists,
11 that the counts are reflective to what we say we
12 have on hand.

13 Q. And that occurred on a monthly
14 basis throughout this entire time period?

15 A. Correct.

16 Q. Now, did there come a point in
17 time when the controlled substances went on a
18 perpetual inventory system?

19 A. Yes.

20 Q. Such that product was updated
21 constantly every time it was moved, the
22 inventory was updated?

23 A. Yes.

24 Q. Do you know when approximately

1 that occurred?

2 A. I think it -- I believe it started
3 somewhere about 2015, I believe.

4 Q. Is that something that the DEA or
5 the Ohio Board of Pharmacy required, a perpetual
6 controlled substance inventory?

7 A. No. That was us in our quest for
8 continual improvement and continual progress
9 that we chose to do that.

10 Q. So once you went perpetual, were
11 you able to track on a second-by-second basis
12 the flow of controlled substances through your
13 pharmacies?

14 A. In realtime, yes.

15 Q. In realtime. And the legal
16 requirement, as you understood it from the DEA,
17 is just count it once every two years?

18 A. During the biennial inventory,
19 which is the only requirement, yes, from the
20 DEA.

21 Q. So rather than wait every two
22 years, you were counting it in realtime?

23 A. Correct. For Schedule IIs, yes.
24 Correct.

1 Q. Okay. And so the -- what about
2 the movement? If a pharmacist then gets a
3 prescription for a controlled substance, say,
4 for 30 pills of some opioid, let's say Vicodin,
5 would they have to then -- he or she have to
6 access that safe -- what types of controls would
7 govern that process of filling that Vicodin
8 prescription?

9 A. Per our policy, only pharmacists
10 have access and keys to the safe. Keys are not
11 left out. The pharmacist on his or her person
12 have those keys to that safe for their shift,
13 and only they have ability to go into that safe,
14 remove the product that they need to fill
15 pursuant to that prescription.

16 Q. Is there any special handling of
17 that product while it's outside of the safe in
18 terms of taking the 30 pills out for that fill
19 and counting -- making sure that the counts are
20 correct?

21 A. It's in complete control of the
22 pharmacist at all times, and it's also double
23 counted and notated that it's been double
24 counted.

1 Q. What do you mean by "double
2 counting"? What does that mean?

3 A. So, say, it's a prescription for
4 30, the pharmacist will count it the first time,
5 the 30 pills, and then they'll make sure again
6 that it's 30 pills.

7 Q. What about any counting of what's
8 left in the bigger bottle from where the 30 came
9 from?

10 A. Yeah. It's our process of
11 backcounting as we call it. So for -- as an
12 illustrative example, let's say there's a bottle
13 of 100 pills of an opiate, let's say Vicodin in
14 a bottle, we dispense 30 of it. The pharmacist
15 is counting the original 30 for the
16 prescription. And then the 30 minus 100, there
17 should be 70 left in the original stock bottle,
18 so counting to make sure there's 70 left in that
19 bottle before it goes back into the safe.

20 Q. Is that something that's required
21 by the DEA or the Ohio Board of Pharmacy?

22 A. It is not.

23 Q. Well, why do it?

24 A. It's -- it was an improvement

1 for -- as a chain and for us as a continual
2 double check to make sure that all product -- we
3 were aware where the product was, what the
4 on-hands were, and an ability for us to identify
5 any discrepancies in realtime.

6 Q. Okay. You mentioned a pharmacy
7 loss prevention department with Rick Shaheen
8 several times in the last deposition and today.

9 Why does Giant Eagle have a
10 separate pharmacy loss prevention department?

11 A. It's important for us to have a
12 separate resource, a dedicated resource that's
13 not just another department where they're
14 checking on the whole store and this is just an
15 added -- we felt very strongly that it was
16 important to have an independent, fully
17 resourced department to help assist and have
18 oversight of our pharmacies from a physical
19 security, a drug security, and certainly
20 controlled substance security.

21 Q. Rick Shaheen -- is he in charge of
22 that department?

23 A. He is.

24 Q. And is he experienced in pharmacy

1 diversion?

2 MR. GADDY: Objection to form.

3 A. Extremely experienced. His
4 pedigree is many years at the attorney general's
5 office working with the DEA as well, and
6 certainly as a prosecutor helping in the
7 attorney general's office in a prosecution of
8 cases exactly on diversion and criminal
9 activity.

10 Q. Okay. You were asked some
11 questions about the tools that Giant Eagle
12 provides for its pharmacists.

13 One of the tools I wanted to ask
14 you about is what type of dispensing software
15 does Giant Eagle use in its pharmacies or has it
16 used going all the way back to 2006?

17 A. Giant Eagle pharmacies utilize a
18 pharmacy dispensing software from the PDX --
19 it's PDX Corporation. And it's one of the gold
20 standard, state-of-the-art system, that's
21 available on the market and still is available
22 on the market.

23 Q. All right. And are there things
24 that the pharmacist is forced to go through when

1 filling a prescription when using that PDX
2 dispensing software?

3 A. There's a certain workflow that
4 they need to go through, yes.

5 Q. Does this software include things
6 like patient profiles and drug utilization
7 reviews?

8 A. Yes. Absolutely.

9 Q. The software dispensing system
10 that Giant Eagle used, was it subjected to
11 repeated Ohio Board of Pharmacy inspections and
12 audits?

13 A. Yes. Absolutely. Continual
14 check-ins on it. And certainly as we rolled out
15 new modules or improvements on the system, that
16 was -- at the next inspection, was highlighted
17 or looked at from the board, certainly.

18 Q. To your knowledge, did the Board
19 of Pharmacy ever criticize or suggest to Giant
20 Eagle that it should -- it needed better
21 dispensing software than what it was using?

22 A. Never.

23 Q. Are you familiar with something
24 called rx.com?

1 A. Yes.

2 Q. What is it?

3 A. Rx.com is basically the central
4 database that the pharmacy software in the
5 stores use to communicate with each other.
6 Basically the central prescriber database, if
7 you will, or where the data resides.

8 Q. Is that something that's required
9 by either the DEA or the Ohio Board of Pharmacy?

10 A. No.

11 Q. But is it something that
12 Giant Eagle added onto its software system to
13 provide more information to its pharmacists?

14 A. Yes.

15 Q. And so using the PDX software with
16 the rx.com, were Giant Eagle pharmacists able to
17 view a patient's prescription history across the
18 entire chain?

19 A. Yes.

20 Q. And was that something that would
21 come up as part of the workflow modules in the
22 PDX dispensing software?

23 A. It would be part of the DUR
24 process, yes.

1 Q. Okay. The -- we mentioned the
2 OARRS database. Were Giant Eagle pharmacists
3 provided access to the OARRS database from the
4 time it was created through the time period at
5 issue?

6 A. Yes.

7 Q. And did there come a point in time
8 that OARRS was embedded in the software
9 dispensing system?

10 A. Yes.

11 Q. And why -- why did Giant Eagle go
12 through that process of embedding the OARRS
13 access right in the software system?

14 A. As was -- as our history, we were
15 trying to make things easier for our
16 pharmacists, and certainly instead of them
17 having to leave the screen that they were on to
18 log in to a separate window or a separate
19 website, we embedded it within the workflow
20 process to make it that much easier for them to
21 be able to get the information efficiently and
22 effectively versus having to -- basically like a
23 single sign-on versus them requiring to spend a
24 lot of time digging, hunting, and pecking for

1 the information right at their fingertips.

2 Q. And when approximately was the
3 OARRS access embedded in the software as opposed
4 to being an independently accessible database?

5 A. The exact date I can't remember,
6 but I believe it was somewhere around 2016,
7 2017, the beginnings of it.

8 Q. What is your understanding of what
9 the OARRS database provides to the pharmacists
10 at the point of dispensing? What kind of
11 information does it provide?

12 MR. GADDY: Objection to form.

13 A. It provides information on a
14 particular patient, controlled substances and
15 medications that have been filled across any
16 store or any provider.

17 Q. In your experience as a
18 pharmacist, are these PDM programs helpful
19 pieces of information in making a professional
20 judgment to fill or not fill a prescription?

21 A. Yes, absolutely helpful data
22 point.

23 Q. Does OARRS restrict the
24 pharmacist's access in any way? In other words,

1 can a pharmacist go in and just roam around the
2 OARRS database and see what he or she feels
3 like?

4 A. The OARRS database is a restricted
5 database. There's only certain views the
6 pharmacist can see and are allowed access to.

7 Q. And is it primarily this
8 patient -- the activity of this patient in front
9 of him?

10 A. Yes. It's that particular patient
11 with that date of birth and activity related to
12 that patient in the query or the search. Yes.

13 Q. And are you familiar that OARRS is
14 a branch of the Ohio Board of Pharmacy?

15 A. Yes, I am.

16 Q. And do you know that OARRS takes
17 in information from every pharmacy in the state,
18 every prescription filled by every pharmacy in
19 the state on a daily basis?

20 A. Yes.

21 Q. Now, Giant Eagle certainly doesn't
22 have the access to that kind of information; is
23 that correct?

24 A. To the OARRS information? No.

1 Q. Right. And my point is that Giant
2 Eagle knows what its pharmacies are doing, but
3 it doesn't know what all the other pharmacies
4 are doing; is that right?

5 A. Correct. Yes.

6 Q. All right. And then do you know
7 whether OARRS -- besides taking in the
8 information, whether or not OARRS has
9 investigators and agents and analysts that
10 analyze that information?

11 A. OARRS is a multi-faceted tool.
12 There's the face of the tool that the
13 pharmacists access for the information that was
14 just described on a particular patient and
15 medication history across any store in the
16 state. But certainly loss prevention, DEA,
17 others use the back end of that to do their
18 queries and investigative searches. They have
19 more ability to access other information that we
20 do not.

21 Q. Do you know, for example, does
22 OARRS -- when taking in every pharmacist's
23 prescription activity, do they look for things
24 like doctor shoppers and, you know, patients

1 moving from doctor to doctor or abusing the
2 system, drug seeking --

3 MR. GADDY: Objection.

4 Q. -- drug seeking behavior?

5 MR. GADDY: Objection to form.

6 A. My understanding is that the OARRS
7 database, the back end of that, the Board of
8 Pharmacy and law enforcement use that to
9 identify patterns or places that they want to
10 investigate or things that they want to
11 investigate.

12 That is information that they
13 typically use -- for example, it's not uncommon
14 for a law enforcement to show up on our
15 pharmacy, and say, "I need these prescriptions"
16 or "I need information on this patient."

17 And where they get that
18 information is from an OARRS type database that
19 gives them the ability to look for things they
20 want to look at. And then they follow up
21 accordingly to where they want to look at.

22 So traditionally that's how they
23 would end up at our pharmacy for a prescription
24 or more information.

1 MR. GADDY: Bob, I'm sorry to
2 interrupt. I didn't -- I made a mistake
3 and didn't assume you were going to go
4 this long. If you've got more than five
5 or ten minutes, do you mind if we take a
6 quick bathroom break?

7 MR. BARNES: You want to take a
8 bathroom break now or five or ten
9 minutes from now?

10 MR. GADDY: If you're going to be
11 done in five or ten minutes, I can
12 probably make it, but if you've got more
13 than that then ...

14 MR. BARNES: No, no. We better
15 take a break then.

16 MR. GADDY: Okay. Thanks.

17 MR. BARNES: Okay.

18 THE VIDEOGRAPHER: The time is
19 12:00 p.m. Off the record.

20 (Recess taken.)

21 THE VIDEOGRAPHER: The time is
22 12:10 p.m. Back on the record.

23 BY MR. BARNES:

24 Q. Mr. Tsipakis, we were talking

1 about how -- the tools provided for pharmacists
2 by Giant Eagle. We talked about the pharmacy
3 dispensing system, rx.com and/OARRS.

4 Is there a method for Giant Eagle
5 pharmacists to check on the status of a doctor's
6 license before they issue a prescription or fill
7 a prescription?

8 A. Yes. That's integrated into the
9 pharmacy software. Yes.

10 Q. And is that updated on a continual
11 basis by a third-party vendor?

12 A. Yes.

13 Q. So if a doctor's license is
14 revoked, is it your experience that the software
15 will pick that up pretty quickly?

16 MR. GADDY: Objection to form.

17 A. Yeah. I don't even know the
18 exact, but it's hours. It would pick it up in
19 hours, yes.

20 Q. And what about if a doctor is
21 suspended, in the industry, is any notation made
22 that the doctor's license has been suspended in
23 some way?

24 A. No.

1 Q. Okay. Is that something that you
2 have to find out indirectly?

3 A. Usually if it's similar, like, to
4 how even pharmacy -- they'll show a notation on
5 the website that says "sanctioned" or "fined" or
6 something, but it won't tell you why or any of
7 the details behind that action.

8 Q. Did the DEA or the Ohio Board of
9 Pharmacy ever advise Giant Eagle that it needed
10 to do anything more than check the status of the
11 doctor's license as part of its software
12 dispensing system?

13 A. Never.

14 Q. Are you familiar with something
15 called a BOLO, B-O-L-O?

16 A. Yes. Be on the lookout, yes.

17 Q. What is that exactly?

18 A. So that is a moniker that our --
19 Rick Shaheen in our loss prevention use. BOLO
20 short for "be on the lookout."

21 Q. And did Giant Eagle corporate,
22 including its loss prevention personnel, advise
23 pharmacies, Giant Eagle pharmacies, chain-wide
24 to be on the lookout for certain things like

1 drug rings or forgery rings or bad doctors,
2 things of that nature?

3 MR. GADDY: Objection to form.

4 A. Yes. Absolutely. Either if there
5 was information that our stores themselves had
6 information, loss prevention, or corporate had
7 from whatever source that came in, whether it
8 was from an investigative source, FBI, DEA,
9 Board of Pharmacy, there would be an e-mail
10 communication sent out to all stores. And the
11 stores check their e-mails often, and they would
12 be flagged that there was a message. Then they
13 would read that message and disseminate that
14 information.

15 Q. And did the Giant Eagle
16 pharmacists go through regular training and have
17 regular meetings with other pharmacists in the
18 chain?

19 MR. GADDY: Objection; form.

20 A. Yes.

21 Q. What kind of training? What kind
22 of meetings did they go through?

23 A. So pharmacists are required to go
24 through a continuing education process, and

1 certainly as a corporation, we had a continuous
2 quality improvement process, so there's
3 quarterly meetings we do. There's calls that we
4 do with the districts.

5 There's annual meetings that we
6 have where we bring all the pharmacists together
7 pre-COVID, and there's multiple touch points
8 with our pharmacists and our management from our
9 management down to our pharmacists and our
10 technicians.

11 Q. And does Giant Eagle employ
12 district leaders called pharmacy district
13 leaders or PDLs?

14 A. We do, yes.

15 Q. And are they responsible for
16 multiple stores in a region, and do they travel
17 from store to store?

18 A. Yes. We have the pharmacy
19 district leader that's in place to support a
20 number of stores that they're responsible for to
21 help them lead and practice the profession of
22 pharmacy, support the pharmacy, and make sure
23 that they have everything that they need, and
24 also follow up with anything we need them to

1 follow up on.

2 Q. And do the PDLs do quality audits
3 when they visit the pharmacies?

4 A. Regularly, yes.

5 MR. GADDY: Object to form.

6 Q. Does that include making sure that
7 the pharmacists are following Giant Eagle
8 policies and procedures?

9 A. Yes. Absolutely. They have a
10 checklist of things that they look for, and that
11 is definitely one of the top things that they
12 look for on that checklist.

13 Q. And how about the pharmacy loss
14 prevention personnel, Rick Shaheen and others
15 that work under him, are they in the stores a
16 lot?

17 MR. GADDY: Objection to form.

18 A. They're in the stores doing audits
19 regularly, and then certainly they come in
20 unannounced, or certainly if we have a concern
21 that we would -- either a concern from store
22 level or a concern from corporate level, we
23 dispatch them to follow up, yes.

24 Q. And at the corporate level, does

1 Giant Eagle monitor its pharmacies to look for
2 things like high volumes of controlled
3 substances being dispensed, things of that
4 nature?

5 A. Yes.

6 Q. Are you aware of any Giant Eagle
7 pharmacy throughout the entire chain dispensing
8 excessive amounts of controlled substances?

9 A. We're dispensing prescriptions
10 that were pursuant to a legally authorized
11 prescription that was presented to us.

12 Q. Right. But are you familiar with
13 so-called pill mills and things of that nature
14 where there's large amounts of, if not
15 exclusively, controlled substances being
16 dispensed, things of that nature?

17 A. No.

18 Q. You're not familiar with that?
19 Okay.

20 But my question, Mr. Tsipakis, is,
21 does Giant Eagle watch its pharmacies to ensure
22 that there are not large amounts of -- unusual
23 amounts of controlled substances being
24 dispensed?

1 MR. GADDY: Objection to form.

2 A. We absolutely monitor, and if
3 there's a concern or something we want to
4 investigate in further detail, we absolutely do
5 that.

6 Q. Does Giant Eagle watch to make
7 sure that what's going into the stores is going
8 out properly through prescription filling?

9 A. Yes. Absolutely. And we monitor
10 what comes into the pharmacy, what leaves the
11 pharmacy, and what should be left on the
12 pharmacy counter.

13 Q. Okay. Are you familiar with the
14 term "controlled records box, controlled
15 substance records box" at Giant Eagle?

16 A. Yes.

17 Q. What is it?

18 A. It's a box similar to a banker's
19 box or a file folder box where it's basically
20 one place that all the information around
21 controlled substances can be neatly organized
22 and kept, which includes the pharmacist
23 manual -- the DEA pharmacist manual was in
24 there, any Board of Pharmacy regulations, all

1 our controlled substance invoices, our 222 forms
2 are kept in there.

3 Everything is in a nice organized
4 place that -- whether it's for our own employees
5 or certainly during inspections, routine
6 inspections that DEA, law enforcement, et
7 cetera, it's nice and neatly organized and
8 accessible.

9 Q. Would you look at the file folder
10 that has these manila folders numbered 1 through
11 43.

12 MR. BARNES: Jeff, these were sent
13 to you separately.

14 MR. GADDY: Thanks, Bob.

15 - - -

16 (Tsipakis Deposition Exhibit 7 marked.)

17 - - -

18 BY MR. BARNES:

19 Q. And I want to have you pull out
20 41, 42 and 43.

21 And for file 40, we'll mark this
22 Tsipakis Exhibit 7.

23 Can you identify Exhibit 7,
24 Mr. Tsipakis.

1 A. Sure. It's entitled "Controlled
2 Records Box."

3 Q. And is this a Giant Eagle business
4 record?

5 MR. GADDY: Object to form.

6 A. Yes.

7 Q. The second page on the flip side
8 appears to be a photograph of a 2011 pharmacy
9 controlled drug records box; is that correct?

10 A. Correct.

11 Q. Is this what the controlled record
12 box looks like at the pharmacies?

13 A. Yes.

14 Q. And does this documentation show
15 what's in these controlled records boxes -- I'll
16 just flip through it.

17 Section 1 is C-III through V
18 invoices; is that right?

19 A. Correct.

20 Q. Section 2 is the C-II invoices and
21 executed DEA Form 222s.

22 Do you see that?

23 A. Correct. Yes.

24 Q. And these are the DEA ordering

1 forms for Schedule II controlled substances; is
2 that right?

3 A. Correct.

4 Q. And then Section 3 is the
5 unexecuted 222s?

6 A. Correct.

7 Q. Section 4 is outdated controlled
8 drug return documentation?

9 A. Correct.

10 Q. Section 5, power of attorney
11 forms.

12 MR. GADDY: Bob, is this a
13 document that you've produced? Mine
14 doesn't have a Bates number on it.

15 MR. BARNES: I believe so, yeah.

16 MR. GADDY: Do you have the Bates
17 number for this document?

18 MR. BARNES: It's at the front.

19 MR. KOBRIN: It's Bates number
20 it's the native -- it's a PowerPoint.
21 So the Bates number is GE_TL00012826.

22 MR. BARNES: It's on the front
23 page, Jim.

24 MR. GADDY: Okay. Thank you.

1 BY MR. BARNES:

2 Q. Section 5, power of attorney;
3 Section 6, biannual controlled drug inventory.

4 Do you see that, Mr. Tsipakis?

5 A. Yes.

6 Q. Is that Section 6 -- is that the
7 every two-year inventory that the DEA requires
8 that you previously testified to?

9 A. The DEA requires every two years.
10 We do it annually on top of our others, yes.

11 Q. But this Section 6 is for the one
12 that the DEA requires, not for the monthly or
13 perpetuals?

14 A. Correct.

15 Q. Okay. Section 7 are the
16 technician protocols.

17 Does Giant Eagle have protocols
18 that its pharmacy technicians must follow in its
19 pharmacies?

20 A. Yes.

21 Q. And are they overseen by
22 pharmacists?

23 A. They are, yes.

24 Q. Section 8 is past inspection

1 reports. This would be Ohio Board of Pharmacy
2 type inspections of that pharmacy; is that
3 right?

4 A. Correct. And DEA. Sure. Yes.

5 Q. And finally, Section 9 is pharmacy
6 regular regulatory materials. Would that
7 include the DEA manual that you testified
8 earlier to?

9 A. Yes.

10 - - -

11 (Tsipakis Deposition Exhibit 8 marked.)

12 - - -

13 BY MR. BARNES:

14 Q. All right. Go to file 41. We'll
15 call this Tsipakis Exhibit 8.

16 Can you identify Exhibit 8, sir?

17 A. Exhibit 8 starts with -- it looks
18 like a presentation -- "Controlled Drug Records
19 Box Instructions."

20 Q. Is this a business record of Giant
21 Eagle?

22 MR. GADDY: Objection to form.

23 A. Yes, it is.

24 Q. And does this show what the

1 contents of the controlled record box should be
2 as of 2019?

3 A. Yes.

4 Q. And does that include in
5 Section 13 pharmacy regulatory materials
6 including the DEA pharmacy manual?

7 A. Yes.

8 - - -

9 (Tsipakis Deposition Exhibit 9 marked.)

10 - - -

11 BY MR. BARNES:

12 Q. All right. Go to file 42, sir.
13 We'll call this Exhibit 9.

14 A. This is the pharmacist manual, the
15 DEA manual.

16 Q. Is this the manual that was
17 available to and accessible to the Giant Eagle
18 pharmacies at all times?

19 A. Yes.

20 - - -

21 (Tsipakis Deposition Exhibit 10 marked.)

22 - - -

23 BY MR. BARNES:

24 Q. And, lastly, Exhibit 10 will be

1 from file 43. It's captioned "Controlled Drug
2 Box Memo 2012." It appears to have contents for
3 the controlled substance box or similar to the
4 last two exhibits; is that correct?

5 A. That is correct.

6 Q. Is this another business record of
7 Giant Eagle?

8 A. Yes, it is.

9 Q. Okay. You were asked by
10 Mr. Mougey back in March some questions about
11 the pharmacists being the so-called last line of
12 defense.

13 Do you recall that questioning?

14 A. Yes, I do.

15 Q. With respect to the role of --
16 let's start with the doctor.

17 What is your understanding of how
18 the term "last line of defense" interplays with
19 the role of the doctor?

20 MR. GADDY: Objection to form.

21 A. Certainly from a health care --
22 from a patient's treatment and care, there's a
23 team of folks that are all working together for
24 the treatment and the care of that patient.

1 It all starts in the primary
2 individual and the practitioner -- the physician
3 or nurse practitioner or physician's assistant.
4 So it could be an M.D., or it could be a
5 different level provider.

6 But, regardless, it's the main --
7 the main interaction is with a caregiver who has
8 the patient's diagnosis, medical condition,
9 labs, all the other information that they have
10 to care for that patient and treat that patient.
11 Certainly there could be some other mid-level
12 providers involved in that interaction.

13 If that interaction requires a
14 prescription to be issued, then that
15 prescription will either come to us
16 electronically or by the patient themselves, and
17 that will present itself to our pharmacy
18 counter. Our pharmacy, I should say.

19 Q. Stop right there, because I'll
20 break that next step down.

21 But a doctor or nurse practitioner
22 or physician's assistant, are these folks that
23 have prescribing authority; is that correct?

24 A. Yes. Correct.

1 Q. Under their doctor's license or
2 nurse practitioner license or PA license; is
3 that right?

4 A. Correct. Yes.

5 Q. And is it -- at the point of
6 issuing the prescription, is that where the
7 medical judgment comes in? There's a medical
8 judgment made by the doctor or these other
9 licensed personnel?

10 A. Yes.

11 Q. Is that right?

12 A. Correct.

13 Q. And are these -- I'll call them
14 doctors, but I mean all prescribers, but I'll
15 use the term "doctors."

16 The doctors, before they issue a
17 prescription, are they supposed to check for red
18 flags?

19 A. Yes.

20 Q. In fact, the doctors are the ones
21 that have the physician-patient relationship; is
22 that correct?

23 A. That is correct.

24 Q. And it's the doctors that know the

1 medical history of the patient and do the
2 examinations and make the diagnoses and come up
3 with a treatment plan; is that correct?

4 MR. GADDY: Objection; form.

5 A. Correct.

6 Q. Okay. And is it the doctor then
7 that makes the risk-benefit type determination
8 for, say, an opioid prescription after doing
9 those exams and making those medical judgments;
10 is that correct?

11 MR. GADDY: Objection to form.

12 A. Yes, that is correct.

13 Q. All right. So by the time the
14 patient leaves their doctor's office with their
15 prescription, a medical judgment and evaluation
16 has been made and red flags have been analyzed.

17 Is that your understanding as a
18 pharmacist?

19 MR. GADDY: Objection to form.

20 A. And they're required to look at
21 the same OARRS system that our pharmacists look
22 at as well, yes.

23 Q. All right. So by the time the
24 patient brings it in or it's electronically sent

1 to the pharmacist, is it your understanding as a
2 pharmacist that those medical judgments and
3 risk-benefits and examinations and evaluations
4 have already been made?

5 MR. GADDY: Objection to form.

6 A. Yes.

7 Q. And is it your role as the
8 pharmacist to reevaluate, reexamine,
9 reinterpret, or second-guess the medical
10 judgment of the issuing prescribers?

11 MR. GADDY: Objection to form.

12 A. No, it is not.

13 Q. Are you supposed to rereview the
14 medical history of the patient at the time of
15 dispensing?

16 A. No. We're not qualified -- I
17 don't have the medical training or experience to
18 do that, no. We wouldn't do that. We wouldn't
19 have that ability as a pharmacist.

20 Q. Okay. And in your experience,
21 have you found that most doctors issue their
22 prescriptions in good faith intending to provide
23 legitimate treatment for a legitimate patient?

24 A. Yes.

1 MR. GADDY: Objection to form.

2 Q. Pardon me?

3 A. Yes.

4 Q. So then now let's focus in. With
5 all those parameters, now you're the pharmacist
6 and all these medical judgments have been made
7 and all these things have been weighed, you're
8 presented with a prescription. What's your
9 role?

10 MR. GADDY: Objection to form.

11 A. So our role is to take in that
12 prescription, certainly have the information we
13 need about the patient's, you know, gender,
14 weight, medical -- the medical history was done
15 from the physician's office, but for our
16 purpose, we know looking at what prescriptions
17 they are currently on, what OTCs they take, so
18 from our perspective, we're looking for the drug
19 that was prescribed, if there's any
20 contraindications and dosing of that particular
21 prescription, anything that it counteracts with,
22 anything that they're currently taking from a
23 disease state perspective.

24 We're also doing a DUR -- and that

1 all is part of the DUR process, drug utilization
2 review.

3 We're also looking for the
4 legitimacy of that prescription in the case of a
5 controlled substance, was it issued by a doctor
6 or a practitioner that is authorized to write
7 for that prescription. So we're assessing all
8 those pieces of information.

9 And then if there's any concern in
10 follow-up we need from the physician's office,
11 let's say, we would do all that, if there's any
12 more information that we need.

13 And then finally it gets to the
14 point of dispensing that particular prescription
15 and going over the prescription with the patient
16 so that they understand how to use that
17 medication, what are the important things for
18 them to know about the medication, side effects,
19 potential side effects, about the prescription,
20 and basically counseling the patient on how to
21 use that medication to be part of their care
22 plan.

23 Q. Okay. Does the pharmacy's role
24 include looking for forgeries and, you know,

1 that type of alter -- or other alterations of a
2 prescription?

3 A. Sure. That's part of the
4 legitimacy of the prescription. But, yes, we're
5 looking to make sure that the prescription was
6 authorized by an authorized practitioner, it has
7 not been altered or changed, or if it's a forged
8 prescription, yes.

9 Q. And are you familiar with state
10 regulations such as the Ohio Board of Pharmacy
11 issuing regulations for how a prescription is
12 supposed to be filled?

13 A. Yes.

14 Q. And does Giant Eagle make sure
15 that when it's filling prescriptions, it's in
16 compliance with those regulations?

17 MR. GADDY: Objection to form.

18 A. Yes.

19 Q. And the Ohio regulations, the
20 so-called manner of processing prescriptions, do
21 they include things like having a patient
22 profile?

23 A. Yes.

24 Q. And does Giant Eagle have a

1 patient profile in its software system?

2 A. Absolutely. Yes.

3 Q. And does it include doing a drug

4 utilization review?

5 A. Yes.

6 Q. And does Giant Eagle software

7 system include a drug utilization review?

8 A. Yes.

9 Q. And does that include, when

10 necessary or appropriate, checking the OARRS

11 database as prescribed in the regulations or

12 when to check the OARRS database?

13 A. Yes.

14 Q. And do the manner of processing

15 regulations for Ohio, do they further provide --

16 besides the patient profile and a DUR, do they

17 provide for labeling the prescription properly?

18 A. Yes.

19 Q. And does Giant Eagle have a system

20 for making sure its filled prescriptions are

21 properly labeled?

22 A. Yes, we do.

23 Q. And, further, do those manner of

24 processing regulations have a fourth step, which

1 is provide counseling, at least a counseling
2 opportunity, to the patient?

3 A. Yes.

4 Q. And does Giant Eagle provide such
5 counseling or an opportunity for counseling?

6 A. Yes. Absolutely.

7 Q. And the final -- the fifth step of
8 the manner of processing regulations include
9 proper recordkeeping, keeping the hard copy of
10 the prescription or the electronic prescription
11 available for certain periods of time.

12 Are you familiar with that?

13 A. Yes.

14 Q. And does Giant Eagle follow those
15 regulations in terms of keeping those
16 prescriptions, hard copy or electronic copy, as
17 appropriate?

18 A. Yes, we do.

19 Q. Now, once the prescription is --
20 I'm sorry.

21 Are you aware of any other step to
22 the Ohio regulations for filling a regulation
23 besides -- or filling a prescription besides
24 those five steps?

1 A. No.

2 Q. To your knowledge, do they include
3 anything about certain types of red flags and
4 stopping the prescription and not filling the
5 prescription if any one or more of the red flags
6 are present?

7 A. They do not, no.

8 Q. Do they require the documentation
9 of any due diligence by the pharmacist?

10 A. No, they do not.

11 Q. Okay. Now, what about -- besides
12 the doctor's role and the pharmacist's role,
13 what about the patient's role? Does the patient
14 have any role in preventing diversion of a
15 prescription given to them at a pharmacy?

16 A. Yes, they do. Ultimately the
17 prescription is dispensed to the patient. The
18 patient then would use that medication, would
19 need to store that medication and make sure that
20 it's issued. And right on the bottle of a
21 controlled substance, it federally says
22 there's -- right on there that this is intended
23 for the person that it's prescribed for, not to
24 be given or transferred to anyone else.

1 So the obligation and certainly
2 the expectation is for us to dispense that
3 prescription to a patient and for only that
4 patient to use that prescription and provide
5 that prescription as well.

6 Q. Does the pharmacist or the
7 pharmacy have any role in tracking the patients
8 to make sure that they're safeguarding their
9 medications and using them for only their
10 intended purpose?

11 A. No.

12 Q. Has the Board of Pharmacy or the
13 DEA ever suggested that Giant Eagle have any
14 role in making sure patients safeguard their
15 medications after they've been dispensed to
16 them?

17 A. No.

18 Q. You were asked in your last
19 deposition some questions about audit controls,
20 and you mentioned inventory and audit controls.
21 I wanted to follow up just a little bit on that.

22 And I think you mentioned a few
23 minutes ago that Giant Eagle has an internal
24 audit department where they have internal

1 auditors that conduct audits at the pharmacies;
2 is that right?

3 A. Yes, that's correct.

4 Q. Okay. Is that another layer of
5 controls that Giant Eagle has at the pharmacies?

6 A. Yes, it is.

7 Q. And you also mentioned the PDL
8 quality control audits. Is that another form of
9 corporate control of the pharmacies?

10 A. Yes, it is.

11 Q. Are you aware of the Board of
12 Pharmacy or the DEA ever asking Giant Eagle or
13 requiring Giant Eagle to provide data to its
14 pharmacists across the chain, for example, the
15 board -- has the board ever suggested that store
16 number 1 needs to know what store number 2 is
17 doing above and beyond what's already in the
18 Giant Eagle software system?

19 A. No, they have not.

20 Q. But is somebody doing that if
21 Giant Eagle is not doing that? Is there another
22 agency that's looking at these prescriptions and
23 analyzing the data and looking for things like
24 pattern prescribing and doctor shopping?

1 A. Yes. Certainly behind the scenes,
2 there's agencies and certainly within that use
3 the OARRS data similar to the CSOS data that the
4 DEA uses.

5 So there's absolute -- the
6 agencies have the data and use that data however
7 they use it to come up with their investigative
8 directives.

9 Q. Okay. With respect to what the
10 Giant Eagle pharmacist can see through its
11 software system, including rx.com, can a
12 Giant Eagle pharmacist see what the patient in
13 front of him or her has filled at all Giant
14 Eagle stores in the chain at the point of
15 dispensing?

16 A. Yes.

17 Q. To your knowledge, do the Ohio or
18 the federal regulations require Giant Eagle
19 pharmacists to investigate or look for pattern
20 prescribing or doctor shopping or things of that
21 nature?

22 MR. GADDY: Objection to form.

23 Q. Go ahead, Jim.

24 A. No, they do not.

1 - - -

2 (Tsipakis Deposition Exhibit 11 marked.)

3 - - -

4 BY MR. BARNES:

5 Q. You were asked a lot of questions
6 by Mr. Mougey in your last deposition about
7 examples of corporate level type controls. And
8 if you go back to the file we sent you, the
9 files 1 through 39. I'm going to start with
10 exhibit -- file number 2. And this will be
11 Exhibit 11.

12 A. Okay.

13 Q. Do you recognize this as a
14 business record of Giant Eagle?

15 MR. GADDY: Objection; form.

16 A. Yes, I do.

17 Q. And can you tell us in summary
18 what this business record reflects in terms of
19 Giant Eagle anti-diversion controls?

20 A. This is a communication between
21 one of our stores to Rick Shaheen, head of our
22 loss prevention department, basically following
23 up on a phone call. This looks like this was a
24 documentation to a phone call that had happened,

1 a written follow up to a phone call that
2 happened on a bad prescription or a fake
3 prescription that was attempted to be presented
4 at one of our pharmacies.

5 And the details are listed about
6 the individual involved, the prescriptions
7 involved, the police being contacted, and
8 basically also leading to the arrest and
9 apprehension of the suspect that actually tried
10 to pass the phoney prescription to us.

11 And then the follow up from Rick
12 basically complimenting the store and telling
13 them they did a great job on the diligence that
14 they provided, and also that he was going to
15 follow up with in this case the Brentwood Police
16 Department on any follow ups from that case.

17 Q. Is this an example of something
18 that occurs at the Giant Eagle pharmacies from
19 time to time in terms of pharmacists exercising
20 due diligence with respect to prescriptions
21 attempting to be passed for drugs like oxycodone
22 here. This is oxycodone 15, number 90;
23 oxycodone, 30 milligrams, number 90; and
24 Klonopin.

1 Those are opioids, correct?

2 MR. GADDY: Objection to form,
3 scope.

4 A. Yes. The oxycodone is an opiate,
5 yes.

6 Q. All right. So is this an example
7 of a Giant Eagle pharmacist detecting a forgery
8 and refusing to fill an oxycodone prescription?

9 MR. GADDY: Same objections.

10 A. Yes, it is.

11 Q. Are there other -- to your
12 knowledge, has this occurred on multiple
13 occasions and this is an example of it
14 occurring?

15 MR. BARNES: Same objections.

16 A. Yes.

17 Q. All right. In that type of a
18 circumstance, are you familiar with the term of
19 "refusal to fill" situation where a pharmacist
20 is presented a prescription, goes through this
21 process and says, "I'm not filling it"?

22 A. Yes, I'm familiar with that. Yes.

23 Q. Does Giant Eagle refuse to fill
24 opioid prescriptions? Has that happened?

1 MR. GADDY: Objection to form.

2 A. Yes, we do.

3 Q. And this is an example of that?

4 A. Yes, it is.

5 - - -

6 (Tsipakis Deposition Exhibit 12 marked.)

7 - - -

8 BY MR. BARNES:

9 Q. Go to file 3, which will be
10 Exhibit 12.

11 Can you identify Exhibit 12 as a
12 business record of Giant Eagle?

13 MR. GADDY: Objection to form.

14 A. Yes, it is.

15 Q. And can you tell us in sum and
16 substance what this is showing in terms of --
17 it's labeled "Forged Prescription." Is this an
18 example of a Giant Eagle pharmacist detecting a
19 forged prescription from a so-called
20 Philadelphia prescription ring?

21 MR. BARNES: Form and scope.

22 A. Yes. It's a -- it's a -- yes.

23 Q. And in this circumstance, did the
24 Giant Eagle pharmacist bring in law enforcement

1 and refuse to fill this oxycodone prescription?

2 MR. BARNES: Same objections.

3 A. Yes. It was information that our
4 pharmacist used that was successful in combating
5 a forged prescription, which then led to an
6 arrest of 22 people involved in this forgery
7 ring, so a pretty significant -- a pretty
8 significant apprehension of suspects in the ring
9 from Philadelphia. And our pharmacist was
10 involved in helping apprehend these suspects.

11 Q. The end of the e-mail at the
12 bottom references due diligence and following
13 the controlled substance dispensing guidelines.

14 Do you see that?

15 A. Yes.

16 Q. Is this an example of the
17 Giant Eagle pharmacies following the guidelines
18 and exercising due diligence in combating
19 criminal diversion of opioids?

20 A. Yes, it does.

21 - - -

22 (Tsipakis Deposition Exhibit 13 marked.)

23 - - -

24

1 BY MR. BARNES:

2 Q. Go to the next file, number 4.

3 We're going to call it Exhibit 13.

4 Is this a business record of
5 Giant Eagle?

6 MR. GADDY: Form.

7 A. Yes, it is.

8 Q. And does it show the operation of
9 corporate controls over the pharmacies?

10 MR. GADDY: Object to form, scope.

11 A. Yes, it does.

12 Q. And what type of controls are
13 being exercised here, and what is the corporate
14 headquarters looking at in this example?

15 A. So in this example, we have a
16 pharmacy, one of our pharmacies, contacting the
17 PDL in this case. We're following up with the
18 compliance department about a concern on a
19 physician and basically alerting corporate on
20 what they're seeing at store level, and then
21 also a validation from corporate that they're
22 monitoring this particular doctor, and
23 validating the monitoring for scripts from this
24 doctor.

1 - - -

2 (Tsipakis Deposition Exhibit 14 marked.)

3 - - -

4 BY MR. BARNES:

5 Q. Okay. Go to file number 5, which
6 we'll call Exhibit 14.

7 Do you recognize this as a
8 business record of Giant Eagle?

9 A. Yes.

10 Q. This looks very similar to the
11 last Exhibit 13; is that correct?

12 A. It is.

13 Q. Just more in the chain of the
14 corporate monitoring of this Dr. Veres,
15 V-e-r-e-s?

16 A. Yes. It's a continuation of the
17 previous e-mail string, and then more
18 information being passed between the store and
19 corporate in follow up.

20 - - -

21 (Tsipakis Deposition Exhibit 15 marked.)

22 - - -

23 BY MR. BARNES:

24 Q. Okay. Go to file 6, which we'll

1 mark as Exhibit 15.

2 Do you recognize Exhibit 15 as a
3 business record of Giant Eagle?

4 A. Yes.

5 Q. And does it show the exercise of
6 corporate controls over prescriptions being
7 issued by a Dr. Veres?

8 MR. GADDY: Objection to form,
9 scope.

10 A. Yes, it does.

11 Q. Is this something that the
12 corporate compliance department looked at in
13 terms of monitoring doctors and their
14 prescription habits?

15 A. Yes. It's an example -- yes,
16 absolute example.

17 - - -

18 (Tsipakis Deposition Exhibit 16 marked.)

19 - - -

20 BY MR. BARNES:

21 Q. Go to file 7. We'll call it
22 Exhibit 16.

23 Do you recognize Exhibit 16 as a
24 corporate business record of Giant Eagle?

1 A. Yes.

2 Q. And does it represent or show the
3 corporate oversight of the narc audits going on
4 at the pharmacies?

5 A. Yes.

6 MR. GADDY: Objection to form.

7 Q. And in this circumstance, this was
8 for Vicodin prescriptions across multiple stores
9 in the chain, monitoring those types of
10 prescriptions?

11 A. Correct. Yes.

12 Q. Is this something the corporate
13 compliance did on a regular basis in terms of
14 monitoring opioid prescriptions across the
15 entire chain?

16 MR. GADDY: Object to form.

17 A. Yes.

18 - - -

19 (Tsipakis Deposition Exhibit 17 marked.)

20 - - -

21 BY MR. BARNES:

22 Q. Go to file 8, which we'll mark
23 Exhibit 17. I think we've seen this earlier
24 this morning. Mr. Gaddy asked you some

1 questions about this.

2 Is this a business record of Giant
3 Eagle, Exhibit 16 -- or I'm sorry -- Exhibit 17?

4 A. Yes, it is.

5 Q. And this involved buprenorphine at
6 store number 54.

7 Do you know that store number 54
8 is located in Pennsylvania?

9 A. Yes, I do.

10 Q. And buprenorphine, is that a
11 Schedule II or some other schedule opioid?

12 A. A Schedule III.

13 Q. A Schedule III. And it's an
14 opioid treatment, correct? It's not a -- it's
15 something you take to try and get off opioids;
16 is that right?

17 A. Correct.

18 Q. All right. And in this
19 circumstance, is this an example of the
20 corporate level threshold report triggering an
21 investigation in Pennsylvania for this
22 Schedule III buprenorphine, including looking at
23 things like distances and where are these
24 prescriptions coming from? Is that right?

1 A. Yes, that's correct.

2 Q. Do you know whether this activity
3 resulted in the reporting of a suspicious order
4 to the DEA involving this matter?

5 A. This interaction and this
6 investigation did result in a suspicious order
7 identification and letter to the DEA.

8 - - -

9 (Tsipakis Deposition Exhibit 18 marked.)

10 - - -

11 BY MR. BARNES:

12 Q. And I'm going to mark -- it's one
13 of the documents sent to you by e-mail. It's
14 marked -- it's HBC -- the last five numbers are
15 74072.

16 Do you have that, Mr. Tsipakis?

17 A. Yes, I have it.

18 Q. And is this the suspicious order
19 you just testified to that came out of this
20 investigation of these Schedule III
21 buprenorphine prescriptions in Pennsylvania?

22 A. Yes. It was sent to the DEA.

23 Yes. The suspicious order was flagged to the
24 DEA.

1 Q. And do you know if the DEA did
2 anything with the suspicious order after it was
3 sent to them on 1/21 of '16?

4 A. They never responded.

5 Q. All right. I meant to mark that
6 Exhibit 18, that suspicious order report to the
7 DEA dated 1/21 of '16. So if you could just put
8 an 18 on there.

9 And is this a corporate business
10 record of Giant Eagle, this Exhibit 18?

11 MR. GADDY: Objection; form.

12 A. Yes, it is.

13 Q. Was Giant Eagle -- did Giant Eagle
14 view this as an example of controls working or
15 not working?

16 MR. BARNES: Objection; form.

17 A. Controls working.

18 - - -

19 (Tsipakis Deposition Exhibit 19 marked.)

20 - - -

21 BY MR. BARNES:

22 Q. Okay. Go to file 9, which we'll
23 mark as Exhibit 19.

24 Do you recognize Exhibit 19 as a

1 corporate business record of Giant Eagle?

2 A. Yes.

3 MR. GADDY: Object to form.

4 Q. And can you tell us what this is
5 an example of or shows in terms of corporate
6 controls?

7 MR. GADDY: Objection to form,
8 scope.

9 A. This shows an interaction between
10 pharmacists on a prescription and showing
11 that -- utilizing the OARRS system and getting
12 the information from the OARRS system and a
13 prescription that was filled at another pharmacy
14 and using the determination on ultimately
15 whether to fill or not fill a prescription.

16 Q. Okay. Is this an example of the
17 type of activity that occurred at the pharmacies
18 with these types of prescriptions?

19 A. Yes.

20 MR. GADDY: Form, scope.

21 - - -

22 (Tsipakis Deposition Exhibit 20 marked.)

23 - - -

24

1 BY MR. BARNES:

2 Q. Go to file 10, which we'll mark as
3 Exhibit 20.

4 Do you recognize Exhibit 20 as a
5 business record of Giant Eagle, Mr. Tsipakis?

6 A. Yes.

7 Q. Is this -- this relates to
8 oxycodone being dispensed at certain stores. Is
9 this a corporate type oversight or control
10 occurring involving this type of drug at
11 Giant Eagle corporate headquarters?

12 MR. GADDY: Object to form, scope.

13 A. Yes.

14 Q. Is this a comparison of what the
15 store ordered in terms of oxycodone versus what
16 it dispensed?

17 A. Yes.

18 Q. And why even look at that? Why
19 exercise that kind of a control?

20 A. It's an effective control to
21 understand that based on the prescriptions that
22 are being prescribed at that store, there's an
23 amount of product that is being needed to fill
24 those prescriptions and then what is being

1 ordered.

2 So if there's a pattern where
3 there's more product being requested than is
4 being required of demand from the prescriptions
5 authorized by prescribers, then it would show a
6 potential concern of the ins and outs being --
7 for lack of a better term, the ins and outs not
8 matching or being close. They should -- they
9 should be within -- within reason.

10 Q. There's references to McKesson
11 being involved in this investigation here.

12 Do you see that on the bottom of
13 page 1 --

14 A. Yes.

15 Q. -- McKesson.

16 Was this triggered by McKesson
17 exercising controls over these oxycodone orders?

18 A. Yes. This was -- it originated
19 from a concern from McKesson shutting off --
20 basically requesting more information on the
21 amount of product being shipped to the store.

22 Q. Okay. And when McKesson would
23 exercise its oversight over its order
24 fulfillment to Giant Eagle pharmacies, would

1 corporate headquarters at Giant Eagle get
2 involved?

3 A. Yes. We would -- we would be
4 notified immediately from McKesson, which would
5 kick off an investigation and a review on the
6 facts involved, why is there an increase being
7 asked for.

8 Q. All right. And is this an example
9 of that, Giant Eagle corporate employees
10 investigating a McKesson threshold being tripped
11 and making sure that it was appropriate?

12 A. Yes, it is.

13 - - -

14 (Tsipakis Deposition Exhibit 21 marked.)

15 - - -

16 BY MR. BARNES:

17 Q. Go to file 11, which we'll call
18 Exhibit 21.

19 Do you recognize Exhibit 21 as a
20 corporate business record of Giant Eagle?

21 MR. GADDY: Form.

22 A. Yes, I do.

23 Q. And there's a reference to a red
24 flag video being circulated by

1 George Chunderlik; is that correct?

2 A. Yes, that is correct.

3 Q. Was this part of his corporate
4 compliance, pharmacy compliance duties?

5 A. Yes, it was.

6 Q. And was he asking all of the
7 pharmacy members to rewatch a video relating to
8 drug diversion?

9 A. Yes. It's an e-mail string asking
10 if they should watch the video again, and George
11 affirmatively saying yes, they're going to watch
12 the video again.

13 Q. All right. Was that something
14 that the Giant Eagle compliance department
15 typically did get information out to the
16 pharmacy team, things like videos from the Board
17 of pharmacy, things of that nature?

18 MR. GADDY: Object to form.

19 A. Yes.

20 - - -

21 (Tsipakis Deposition Exhibit 22 marked.)

22 - - -

23 BY MR. BARNES:

24 Q. Go to file 12, which we'll mark

1 Exhibit 22.

2 Do you recognize 22 as a corporate
3 business record of Giant Eagle?

4 MR. GADDY: Form.

5 A. Yes.

6 Q. There's a reference to this
7 Supplylogix. You've referenced that a couple
8 times in your deposition. Is that a
9 computerized software system that manages and
10 provides information about orders?

11 A. Yes. It's a -- it's a tool that
12 helps us manage our orders and our order points
13 and also a tool we can use to drill into
14 information that we want to look at on the
15 prescriber basis or on the -- the prescriber
16 basis or the store basis or dispensing basis.

17 Q. Now, is Supplylogix -- does it
18 provide routinely written reports, or is it more
19 of a dashboard -- electronic dashboard type
20 system?

21 A. It's more of a dashboard and a
22 querying system.

23 Q. So does it have the capacity to
24 analyze orders in different ways for different

1 purposes?

2 MR. GADDY: Objection; form.

3 A. Yes.

4 Q. Okay. And in this example, it
5 says, "Supplylogix is starting to raise flags
6 into the dispensing of oxymorphone,
7 hydrochloride at Store 4008."

8 Is this an example of Giant Eagle
9 corporate headquarters using the Supplylogix
10 tool to identify and investigate opioid
11 prescriptions?

12 A. Yes, it is.

13 Q. And in this circumstance, in the
14 middle paragraph, it says, "Supplylogix is
15 indicating that 59.38 percent of the
16 prescriptions are coming from a pain clinic ran
17 by Ashraf Razzak."

18 Is this an example of what the
19 corporate compliance team would look at using
20 Supplylogix?

21 A. Yes.

22 Q. Okay. Did you find Supplylogix to
23 be a valuable tool at the corporate level in
24 terms of looking at orders and making sure that

1 orders and dispensing were appropriate?

2 A. Yes.

3 - - -

4 (Tsipakis Deposition Exhibit 23 marked.)

5 - - -

6 BY MR. BARNES:

7 Q. Go to file 13. We'll call it
8 Exhibit 23.

9 Do you recognize Exhibit 23 as a
10 corporate business record of Giant Eagle?

11 MR. GADDY: Form.

12 A. Yes.

13 Q. Now, is this an example of Giant
14 Eagle's corporate headquarters looking at orders
15 of buprenorphine for a specific store?

16 A. Yes, it is.

17 Q. And does that analysis include
18 looking at where the prescriptions were coming
19 from, where the patients were coming from, and
20 distances and things -- use of cash, things like
21 that?

22 A. Yes, it is.

23 Q. Now, is that something that the
24 corporate compliance department would do in its

1 investigations when drilling down into orders
2 for whatever purpose, they had the capacity and
3 the ability to look at the location where the
4 patients were coming from, how they were paying,
5 in cash or insurance, things of that nature?

6 A. Yes.

7 Q. And is this an example of that,
8 how the corporate compliance team would review
9 at a corporate level opioid prescriptions at
10 specific stores?

11 A. Yes, it is.

12 - - -

13 (Tsipakis Deposition Exhibit 24 marked.)

14 - - -

15 BY MR. BARNES:

16 Q. Go to file 14, which we'll mark as
17 Exhibit 24.

18 Do you recognize Exhibit 24 as a
19 corporate business record of Giant Eagle?

20 MR. GADDY: Form.

21 A. Yes.

22 Q. And it's similar to the last
23 exhibit. Is this an example of corporate
24 exercising oversight and control over

1 buprenorphine prescriptions at a specific store?

2 MR. GADDY: Objection; form.

3 A. Yes, it is.

4 Q. And did these types of things
5 occur on a regular basis at Giant Eagle in terms
6 of corporate oversight in monitoring opioid
7 prescriptions at the stores?

8 MR. GADDY: Object to form.

9 A. Yes.

10 - - -

11 (Tsipakis Deposition Exhibit 25 marked.)

12 - - -

13 BY MR. BARNES:

14 Q. Go to file 16, which we're going
15 to mark as Exhibit 25.

16 A. Okay.

17 Q. Do recognize Exhibit 25 as a
18 corporate business record of Giant Eagle?

19 MR. GADDY: Object to form.

20 A. Yes, I do.

21 Q. And can you tell us what this
22 communication is about? It's captioned
23 "Meeting, Script Ring."

24 MR. GADDY: Form, scope.

1 A. So this is a communication with
2 our head of our loss prevention department,
3 Rick Shaheen, and the FBI, so local special
4 agent Robert Warner of the Pittsburgh FBI
5 office. And it involves meeting to discuss a
6 ring of forgeries in the area.

7 Q. It indicates in the middle
8 paragraph that "Six UPMC physicians were being
9 victimized by this forgery ring involving
10 oxycodone forgeries."

11 Is that right?

12 MR. GADDY: Scope.

13 A. Yes, that is correct.

14 Q. And you mentioned earlier that
15 Rick Shaheen and the pharmacy loss prevention
16 often worked with agencies like the FBI and the
17 DEA.

18 Is this an example of
19 Giant Eagle's personnel working closely with the
20 FBI to prosecute opioid criminals?

21 A. Yes, it is.

22 - - -

23 (Tsipakis Deposition Exhibit 26 marked.)

24 - - -

1 BY MR. BARNES:

2 Q. Go to file 17, Exhibit 26.

3 Do you recognize 26, sir, as a
4 corporate business record of Giant Eagle?

5 MR. GADDY: Form.

6 A. Yes, I do.

7 Q. And can you tell us if this
8 represents or shows more corporate oversight of
9 opioid dispensing, including focusing on
10 specific doctors and locations?

11 A. Yes, it is.

12 Q. The bottom paragraph on the first
13 page references methadone being prescribed for
14 sleep and not being appropriate and the
15 pharmacist reaching out to the prescribing
16 physician on numerous occasions to get the
17 dosage changed for the oxymorphone, and the
18 office doesn't want to change it.

19 Is this an example of Giant Eagle
20 pharmacists testing the legitimacy of opioid
21 prescriptions?

22 A. Yes, it is.

23 MR. GADDY: Form.

24 Q. And does this further show that

1 the Giant Eagle pharmacist reached out to
2 corporate headquarters for assistance with how
3 to respond to these types of prescriptions and
4 what to do?

5 MR. GADDY: Object to form.

6 A. Yes, it is.

7 Q. And does this reference -- does
8 this evidence Giant Eagle advising the
9 pharmacist to exercise their professional
10 judgment and don't fill the prescription if they
11 think it's inappropriate?

12 MR. GADDY: Form.

13 A. Yes, it does.

14 - - -

15 (Tsipakis Deposition Exhibit 27 marked.)

16 - - -

17 BY MR. BARNES:

18 Q. Go to file 18, Exhibit 27.

19 Do you recognize this as a
20 corporate business record of Giant Eagle?

21 A. Yes, I do.

22 MR. GADDY: Form.

23 Q. And is this another example of
24 Giant Eagle corporate headquarters analyzing the

1 prescribing habits of a specific doctor for
2 specific controlled substances?

3 MR. GADDY: Form, scope.

4 A. Yes, it is.

5 Q. Is this something that corporate
6 headquarters did on a routine basis in terms of
7 looking at doctors who were sending patients to
8 Giant Eagle pharmacies?

9 MR. GADDY: Objection; form.

10 A. Yes.

11 - - -

12 (Tsipakis Deposition Exhibit 28 marked.)

13 - - -

14 BY MR. BARNES:

15 Q. Go to file 19, Exhibit 28.

16 Do you recognize Exhibit 28 as a
17 corporate business record of Giant Eagle?

18 A. Yes, I do.

19 Q. Is this an example of what we've
20 seen before, which is Giant Eagle corporate
21 headquarters looking at purchases by specific
22 stores and dispensing by specific stores?

23 Do you see that?

24 MR. GADDY: Form and scope.

1 A. Yes, it is.

2 Q. Okay. In this circumstance, this
3 is for oxycodone; is that correct?

4 A. Yes, that is correct.

5 - - -

6 (Tsipakis Deposition Exhibit 29 marked.)

7 - - -

8 BY MR. BARNES:

9 Q. Go to file 20, Exhibit 29.

10 Do you recognize Exhibit 29 as a
11 business record of Giant Eagle?

12 MR. GADDY: Form.

13 A. Yes, I do.

14 Q. And is this an example of
15 Giant Eagle corporate headquarters looking at
16 certain types of dispensing activity for
17 controlled substances, including the use of cash
18 or discount card payments for certain time
19 periods for opioid prescriptions?

20 A. Yes, it is.

21 Q. Is this the type of -- another
22 example of the type of oversight for opioid
23 prescriptions Giant Eagle headquarters exercised
24 over its pharmacies?

1 MR. GADDY: Objection to form.

2 Q. Did you answer that, Mr. Tsipakis?

3 A. Yes. The answer is yes.

4 - - -

5 (Tsipakis Deposition Exhibit 30 marked.)

6 - - -

7 BY MR. BARNES:

8 Q. Okay. Go to file 21, Exhibit 30.

9 Do you recognize Exhibit 30 as a
10 business record of Giant Eagle?

11 MR. GADDY: Form.

12 A. Yes, it is.

13 Q. And is this an example of
14 corporate oversight looking at specific stores
15 and how they compare to the dispensing numbers
16 for other stores in the chain?

17 A. File 30 you said, right,
18 Mr. Barnes?

19 Q. No. File 21, Exhibit 30. Sorry.

20 A. Okay. Sorry. Wrong one. Excuse
21 me.

22 Q. I should have used the term
23 "file." File 21 is going to be Exhibit 30.

24 A. Yeah, I have it. I have it.

1 Q. Is this a business record of
2 Giant Eagle?

3 A. Yes, it is.

4 Q. And is this an example of the type
5 of corporate oversight that occurred, including
6 looking at specific stores dispensing versus
7 other stores in the chain?

8 A. Yes, it is. Comparing stores,
9 uh-huh.

10 - - -

11 (Tsipakis Deposition Exhibit 31 marked.)

12 - - -

13 BY MR. BARNES:

14 Q. Go to file 22. We'll call it
15 Exhibit 31.

16 Do you recognize Exhibit 31 as a
17 business record of Giant Eagle?

18 MR. GADDY: Form.

19 A. Yes.

20 Q. You mentioned earlier the term
21 "BOLO," be on the lookout. Is this a BOLO?

22 A. It is. It's communication from
23 our loss prevention department to all our
24 stores.

1 Q. And does it reference a forged
2 oxycodone prescription?

3 A. Yes, it does.

4 Q. And was this forgery detected by
5 somebody -- I guess this is a communication from
6 the FBI and the DEA about a forgery?

7 MR. GADDY: Object to form.

8 A. This is an example of information
9 we received that we passed on to our stores to
10 keep a lookout for it, yes.

11 Q. Okay. What I was getting at is
12 whether or not the forgery was detected at a
13 Giant Eagle store or not, and that's why I was
14 confused.

15 A. It says in there, "I provided the
16 FBI and DEA valuable information based on the
17 assistance from stores" -- which would be our
18 stores -- "to help get some of these people
19 arrested."

20 - - -

21 (Tsipakis Deposition Exhibit 32 marked.)

22 - - -

23 BY MR. BARNES:

24 Q. Okay. All right. Go to file 23.

1 It will be Exhibit 32.

2 Is this a business record --

3 Exhibit 32, is it a business record of

4 Giant Eagle?

5 A. Yes, it is.

6 Q. There's a reference to "Controlled

7 Substance Research," and the first paragraph

8 mentions "General outline of the research that

9 Jason does when a pharmacy is flagged in the HBC

10 threshold report."

11 Do you see that?

12 A. Yes, I do.

13 Q. And the next couple of pages are

14 an outline of steps taken once the flag occurs.

15 Do you see that?

16 A. Yes, I do.

17 Q. And looking over these steps, is

18 that your understanding of what Giant Eagle

19 corporate compliance did in response to a

20 threshold being triggered either in the

21 Giant Eagle system or in the McKesson system?

22 A. Yes, it is.

23 Q. There's a reference to multiple

24 tools being available on the second page of this

1 document. Supplylogix certainly is one of them,
2 monthly purchasing and dispensing information in
3 number 4)a, narc audits in 4)a.i, on-hand
4 changes, reports, things of that nature.

5 Are these all tools that corporate
6 compliance used once the threshold had been
7 triggered?

8 A. Yes, they are.

9 - - -

10 (Tsipakis Deposition Exhibit 33 marked.)

11 - - -

12 BY MR. BARNES:

13 Q. Okay. Go to file 24, which would
14 be Exhibit 33.

15 Do you recognize Exhibit 33 as a
16 corporate business record of Giant Eagle?

17 A. Yes, it is.

18 Q. And is this an example of
19 corporate looking at the prescribing habits of a
20 Dr. Joseph Joseph?

21 A. Yes, it is.

22 Q. All right. And the first page
23 lists various factors that the corporate
24 compliance looked at, including the distances

1 for when the scripts were filled, patients
2 coming from West Virginia, patients traveling
3 together. Was this something corporate
4 compliance would evaluate when looking at the
5 doctor prescribing habits?

6 MR. GADDY: Objection; form.

7 A. Yes, it is.

8 Q. And is this an example of -- just
9 an example of these types of investigations run
10 by Giant Eagle corporate?

11 A. Yes, it is.

12 - - -

13 (Tsipakis Deposition Exhibit 34 marked.)

14 - - -

15 BY MR. BARNES:

16 Q. Go to file 25, Exhibit 34.

17 Do you recognize Exhibit 34 as a
18 business record of Giant Eagle?

19 A. Yes, I do.

20 Q. And there's a reference on the
21 bottom of page 1 to theft of a prescription pad.

22 Is that a problem that pharmacies
23 confront from time to time, that criminals steal
24 doctors' prescription pads?

1 A. Yes, it is.

2 Q. And is this an example of
3 Giant Eagle corporate compliance looking into a
4 theft of a prescription pad for certain doctors,
5 Dr. Sheldon Stryker and Dr. Matthew Paulson?

6 A. Yes, it is. It was information we
7 received from a dental office telling us about
8 the theft of the prescription pad and then us
9 reacting to that and searching in our systems
10 for those doctors, and then the information
11 being passed to the stores, yes.

12 Q. Kind of a -- almost like a
13 BOLO-type report, be on the lookout for these
14 types of things?

15 A. Yes.

16 - - -

17 (Tsipakis Deposition Exhibit 35 marked.)

18 - - -

19 BY MR. BARNES:

20 Q. Go to file 26, which we'll call
21 Exhibit 35.

22 Is 35 a business record of
23 Giant Eagle?

24 MR. GADDY: Form.

1 A. Yes, it is.

2 Q. Is this an example of Giant Eagle
3 corporate compliance getting involved with
4 pharmacists who are triggering further
5 investigation for customers coming from out of
6 town locations?

7 A. Yes, it is.

8 Q. And in this example, this is
9 triggered by a pharmacy team leader saying,
10 "Rick, I had two customers come in tonight with
11 Youngstown, Ohio addresses, both new customers
12 with tramadol prescriptions from this
13 podiatrist.

14 "I called 1435, and they ran an
15 OARRS for me. Both had history of lots of
16 tramadol. My tech called Belmont Avenue, and
17 they verified he is someone we don't want to
18 fill prescriptions from. Just wanted to let you
19 know."

20 Is this an example of a
21 Giant Eagle pharmacist refusing to fill
22 prescriptions by people coming from unusual
23 locations asking for opioids?

24 A. What this shows is a pharmacist

1 getting a data point or a flag, and even with a
2 system limitation of not being able to look at a
3 PDMP, asking another store to get the
4 information they needed to follow up and not
5 fill a prescription. Yes.

6 Q. Okay.

7 - - -

8 (Tsipakis Deposition Exhibit 36 marked.)

9 - - -

10 BY MR. BARNES:

11 Q. All right. Go to file 27,
12 Exhibit 36.

13 Do you recognize Exhibit 36 as a
14 business record of Giant Eagle?

15 A. Yes, I do.

16 Q. Is this another BOLO being issued,
17 this time about two Ohio stores and a certain
18 type of drug?

19 A. Yes, it is.

20 Q. Again, more communication across
21 the chain regarding things to look for, be on
22 the lookout?

23 A. Yes, it is.

24 - - -

1 (Tsipakis Deposition Exhibit 37 marked.)

2 - - -

3 BY MR. BARNES:

4 Q. Go to file 28, Exhibit 37.

5 Do you recognize Exhibit 37 as a
6 business record of Giant Eagle?

7 A. Yes.

8 Q. If you look at the bottom of this
9 e-mail chain, it appears that it was triggered
10 by some inquiries by a Giant Eagle pharmacist
11 concerning a prescription for Percocet or
12 generic Percocet. It begins, "Hi, Angela."

13 Was Angela the pharmacy team
14 leader's PDL?

15 A. It's our pharmacy district manager
16 for the store, correct. Yes.

17 Q. It says, "I spoke with a doctor
18 regarding a patient who has continually
19 exhibited red flags regarding prescriptions.
20 One of the flags that the patient exhibits, and
21 I explained to the doctor, was he in the past
22 asked for 512 brand of generic Percocet. The
23 doctor asked that we do not dispense the 512
24 brand which is our preferred brand of generic

1 Percocet.

2 "During my conversation, the
3 doctor -- she stated that he had asked for brand
4 name Percocet from her, and she felt as though
5 the patient was diverting the medication and
6 asked that we change the quantity from 30 to 20
7 tabs, which I did document on the Rx mainly
8 because the doctor did not want the patient to
9 return to the office to pick up another hard
10 copy.

11 "The patient became very upset
12 when I explained this to him and wanted the
13 prescription back, which I was not comfortable
14 doing since we documented the changes on the Rx
15 and note to not dispense the 512 brand.

16 "Knowing that the doctor feels as
17 though the patient is diverting their
18 medication, I am not comfortable at all
19 dispensing the prescription with another
20 manufacturer from the 512 brand.

21 "Unfortunately, in this situation,
22 the patient has been restricted to Giant Eagle
23 pharmacy by the Ohio Medicaid Pharmacy
24 Coordinated Service Program Information for

1 Pharmacies.

2 "Are we able to completely refuse
3 to fill a prescription even with a different
4 manufacturer and hand the prescription back to
5 the patient even with the documented changes?

6 "Is it possible to contact the
7 state and opt out of the program for being the
8 preferred pharmacy knowing that he may be
9 diverting controlled substances."

10 Does this strike you as an unusual
11 circumstance --

12 A. Yes.

13 Q. -- in any way, Mr. Tsipakis?

14 How so?

15 A. It's unusual from a standpoint of
16 the pharmacist identifies a red flag, is
17 uncomfortable about the red flag, discusses it
18 with the physician. The physician agrees with
19 the concern that the pharmacist has, but still
20 authorizes the prescription or still is okay
21 with the prescription being filled and putting
22 the pharmacist in a difficult position of what's
23 described there, and then the follow up with --
24 above it with our district manager and

1 conferring with our loss prevention department
2 on next steps.

3 Q. And what did the PDL, Angela
4 Garofalo tell this pharmacist who was put in
5 this position with a doctor saying, "I issued
6 the prescription, but I think the patient is
7 diverting?" She asks around, and what is she
8 told by Giant Eagle higher-ups?

9 A. She's told, "Regarding the Ohio
10 State Board of Pharmacy rules, you can deny
11 filling a prescription for a patient," and
12 basically tells her to use her judgment. She
13 absolutely can refuse to fill this prescription.

14 Q. Okay. And then up above, it says,
15 "After speaking with Rick Shaheen, we have
16 determined that we have a responsibility to
17 reach out to the State Board of Pharmacy agent
18 and provide him with all of this information.

19 "My concern is that if the M.D.
20 feels the patient may be diverting meds, why are
21 they still writing them scripts? Please contact
22 your local board agent, Trey Edwards."

23 And then up above, it says, "The
24 doctor did mention this would be the final

1 prescription, but I was a little weary that she
2 was still allowing this one filled."

3 So in this circumstance, the
4 doctor is saying, "I've issued the script all
5 right, but the patient is diverting it, but
6 please go ahead and fill it."

7 Why does that put the pharmacist
8 in a bad position?

9 A. It puts the pharmacist in a bad
10 position because for the -- we have no evidence
11 that they're diverting or not diverting, and
12 also drastically cutting someone off of an
13 opiate, it poses a safety concern to the
14 patient, which my assumption is why the
15 physician is trying to give them one more
16 prescription in their medical judgment.

17 But it puts us in the position of
18 not having an aligned front between us and the
19 prescribing physician and then having to
20 basically go to a higher level to report this.
21 And basically it's the pharmacist reporting the
22 physician, which obviously creates an
23 uncomfortable situation.

24 Q. And so in this circumstance, it

1 appears that Ohio -- or I'm sorry -- Giant Eagle
2 contacted the Ohio Board of Pharmacy agent Trey
3 Edwards?

4 A. Yes.

5 Q. Do you know how this was resolved
6 after this?

7 A. I do not.

8 Q. You don't? Okay.

9 - - -

10 (Tsipakis Deposition Exhibit 38 marked.)

11 - - -

12 BY MR. BARNES:

13 Q. Go to file 29, Exhibit -- we'll
14 call it Exhibit 38.

15 Is this a business record of Giant
16 Eagle?

17 MR. GADDY: Object to form.

18 A. Yes.

19 Q. And does this evidence an incident
20 in which a Giant Eagle pharmacist detected a
21 prescription that was written for a deceased
22 patient?

23 A. Yes, it is.

24 Q. There's a reference in the second

1 paragraph to the third party rejected. Is that
2 the insurance rejection?

3 A. Yes. That's my assumption. Yes.

4 Q. Do the insurance companies have a
5 role in the dispensing process in terms of
6 exercising control on their own independent of
7 anybody else?

8 MR. GADDY: Form, scope.

9 A. It's an added control. It's
10 certainly an added data point. If that
11 prescription had -- if a prescription for the
12 same item has been filled somewhere else, the
13 insurance would reject paying twice for the same
14 medication. So it would reject.

15 Q. Okay. So here the insurance
16 rejected, and the e-mail appears to be
17 summarizing what the pharmacist did in terms of
18 insisting upon identification, calling a
19 Rite Aid pharmacy, letting them know the
20 situation and then calling the Warren police?

21 A. Yes, that is correct.

22 Q. Okay. Is this an example of a
23 pharmacist exercising due diligence on a
24 prescription and refusing to fill it?

1 A. Yes, it is.

2 - - -

3 (Tsipakis Deposition Exhibit 39 marked.)

4 - - -

5 BY MR. BARNES:

6 Q. Go to file 30, which we'll call
7 Exhibit 39.

8 A. 30. Okay.

9 Q. This is Exhibit 39. Is this a
10 business record of Giant Eagle?

11 MR. BARNES: Object to form.

12 A. Yes, it is.

13 Q. And is this a --

14 MR. KOBRIN: This is the one we
15 wanted to supplement, Jim, an e-mail
16 from earlier with additional
17 information. So this is the other
18 e-mail document I sent you, Jeff. Does
19 that make sense?

20 MR. GADDY: Okay.

21 MR. BARNES: Just to be sure, this
22 is a three-page document with writing on
23 all pages except the last one,
24 double-sided, beginning with Bates stamp

1 GE00835 on all three pages.

2 MR. GADDY: Mine is a five-page.

3 THE WITNESS: Yeah, mine is too.

4 It starts with pharmacy hot sheet,

5 Giant Eagle pharmacy hot sheet.

6 MR. GADDY: The first page of mine

7 is an e-mail from a pharmacy team lead

8 to Rick Shaheen, "Subject: Fake

9 Prescriptions."

10 MR. BARNES: Right, right.

11 BY MR. BARNES:

12 Q. Jim, your pharmacy hot sheet is my

13 last page. Do you have other pages?

14 A. Yeah, it might be jumbled on how

15 it was printed, so I apologize.

16 MR. KOBRIN: I'm not sure we all

17 have the same page order in the same

18 document.

19 MR. BARNES: Page 1 is going to be

20 the e-mail from 1405 pharmacy team

21 leader, 10:41, to Rick Shaheen,

22 "Subject: Fake Prescriptions."

23 MR. KOBRIN: Let's take like a

24 two-minute break and make sure we have

1 this right. Is that all right?

2 MR. GADDY: It should just be in
3 the order of the Bates numbers on the
4 bottom right-hand corner; 53, 54, 55,
5 56, 57, if that makes sense.

6 THE WITNESS: Yes. I mean, I have
7 the -- I have it. It's just -- mine is
8 cut off in the corner, and I can't see
9 the Bates, the last digits.

10 BY MR. BARNES:

11 Q. Jim, so the cover of Exhibit 39
12 will be this e-mail.

13 A. Yep, I have it. I have it.

14 Q. The second page is two
15 prescription copies.

16 A. Yep.

17 Q. The third page is a fax cover
18 sheet. The fourth and fifth pages are a
19 prescription cover and then a pharmacy hot
20 sheet.

21 A. Yes, I have it.

22 Q. All right. All together, those
23 are -- that's Exhibit 30.

24 Do you recognize these as

1 corporate business records of Giant Eagle?

2 A. Yes, I do.

3 Q. And does this reference

4 Rick Shaheen and a pharmacy team leader

5 communicating about a fake prescription?

6 MR. GADDY: Object to form.

7 A. Yes, it is.

8 Q. And is this an example of a

9 Giant Eagle pharmacist exercising due diligence

10 spotting a fake prescription and calling

11 Rick Shaheen and the local police?

12 A. Yes, it is.

13 Q. That's all I have on Exhibit 39.

14 - - -

15 (Tsipakis Deposition Exhibit 40 marked.)

16 - - -

17 BY MR. BARNES:

18 Q. File 31, Exhibit 40.

19 Do you recognize Exhibit 40 as a

20 corporate business record of Giant Eagle?

21 A. Yes, it is.

22 Q. Is this another example of a be on

23 the lookout fraudulent promethazine with codeine

24 scripts?

1 A. Yes, it is.

2 - - -

3 (Tsipakis Deposition Exhibit 41 marked.)

4 - - -

5 BY MR. BARNES:

6 Q. Okay. Go to file 32, Exhibit 41.

7 Is this a business record of Giant
8 Eagle?

9 MR. GADDY: Form.

10 A. Yes, it is.

11 Q. Another example of a be on the
12 lookout, Phenergan with codeine forged
13 prescriptions in the area, be on the lookout?

14 A. Yes, it is.

15 MR. GADDY: Scope.

16 - - -

17 (Tsipakis Deposition Exhibit 42 marked.)

18 - - -

19 BY MR. BARNES:

20 Q. File 33, Exhibit 42.

21 Do you recognize Exhibit 42 as a
22 business record of Giant Eagle?

23 MR. GADDY: Form.

24 A. Yeah, I do.

1 Q. And what does this Exhibit 42
2 reference, Mr. Tsipakis?

3 MR. GADDY: Form, scope.

4 A. So this shows an e-mail
5 communication actually following up on a case
6 that we had provided information. So it's a
7 link to the case that we gave information to the
8 DEA and FBI over a year ago, and basically
9 applauding the efforts of our teams for the
10 BOLOs that we put out and utilizing our due
11 diligence in resulting in getting this
12 individual or individuals arrested.

13 A large supplier of oxycodone,
14 this person named Barry Dorsey, that was the
15 head of an oxycodone ring in our Pittsburgh
16 area, and basically congratulating our efforts
17 in leading to those arrests and getting him and
18 those drugs off the street.

19 Q. It references Giant Eagle
20 providing video to the federal agents as part of
21 this prosecution; is that correct?

22 MR. GADDY: Scope.

23 A. It does, yes.

24 Q. Okay.

1 A. Basically it all started with us
2 getting a call from the store about a bad script
3 that led all the way up to -- for over a year,
4 to the prosecution of these actors.

5 - - -

6 (Tsipakis Deposition Exhibit 43 marked.)

7 - - -

8 BY MR. BARNES:

9 Q. Okay. Go to file 34, which we'll
10 call Exhibit 43?

11 Is Exhibit 43 a business record of
12 Giant Eagle?

13 MR. GADDY: Form.

14 A. Yes, it is.

15 Q. Does this reference the summary of
16 the efforts of the pharmacy loss prevention
17 department for fiscal year 2018?

18 A. Yes, it does.

19 Q. Down below it says, "Loss
20 Prevention Wins." Second to last bullet point,
21 "Continued working partnership with the DEA, AG,
22 FBI, Ohio Pharmacy Board, local and state
23 police, U.S. attorney, and FBI acknowledge our
24 efforts in drug diversion cases."

1 Is that your understanding, that
2 Giant Eagle's pharmacy loss prevention
3 department worked with all of those law
4 enforcement agencies on a continual basis to
5 combat diversion, including diversion of
6 opioids?

7 MR. GADDY: Objection to scope.

8 A. Yes. We have a strong
9 collaboration with all those agencies and
10 continue to have strong collaboration with them
11 today.

12 Q. Up above in the second paragraph,
13 there's a reference to electronic perpetual
14 controlled substance II logs that helps identify
15 when those drugs are missing or short.

16 Is that another type of control
17 that Giant Eagle had, electronic perpetual
18 inventories for controlled substances,
19 Schedule IIs, to constantly monitor those
20 products?

21 MR. GADDY: Objection to form.

22 A. Yes. That's part of our
23 continuing -- our continuous improvement
24 process. And not what's required. This is

1 above and beyond what is required. But our
2 efforts to simplify things for our pharmacies
3 and certainly continue to keep a pulse on our
4 controlled substances, so an effort to continue
5 improving the diligence.

6 - - -

7 (Tsipakis Deposition Exhibit 44 marked.)

8 - - -

9 BY MR. BARNES:

10 Q. All right. Go to file 36, which
11 we'll call Exhibit 44.

12 Do you recognize this as a
13 corporate business record of Giant Eagle?

14 MR. GADDY: Objection to form.

15 A. Yes, I do.

16 Q. And what does this record -- this
17 business record evidence?

18 MR. GADDY: Form, scope.

19 A. It summarizes an interaction
20 between one of our pharmacy team leaders and the
21 DEA investigator. It memorializes the
22 conversation that was had.

23 Q. Is that an important event for
24 Giant Eagle when one of its pharmacists meets

1 with a DEA investigator?

2 MR. GADDY: Form and scope.

3 A. Yes, it is.

4 Q. And in this circumstance on the
5 bottom of page 1, there's a reference to
6 "Doctors were upset that the pharmacies, Giant
7 Eagle, CVS, Rite Aid mentioned, and that
8 pharmacists were refusing to fill
9 prescriptions."

10 Is that something that Giant Eagle
11 experienced when it refused to fill
12 prescriptions, people would complain, like
13 doctors and patients?

14 MR. GADDY: Form and scope.

15 A. Yes. Certain doctors would get
16 very upset with us questioning and asking for
17 more information, and in some cases would file a
18 complaint, which it appears to be this is
19 pursuant to a complaint that the doctor filed
20 against Giant Eagle and its pharmacists.

21 Q. And at the very end of this
22 summary of this meeting with this DEA agent,
23 what does this memorialize the DEA agent advised
24 the Giant Eagle pharmacist to do?

1 MR. GADDY: Form and scope.

2 A. It basically says that -- in
3 reading this and summarizing this, he did his
4 investigation pursuant to what he needed to do.
5 He said that "Things take many months to happen
6 and that facts on this particular case may be
7 something that will proceed to court and to keep
8 doing what you're doing. Keep fighting the good
9 fight."

10 Q. And what was Giant Eagle's
11 response to that when a DEA agent says, "Keep
12 doing what you're doing"? What did Giant Eagle
13 take that to mean?

14 MR. GADDY: Objection to form and
15 scope.

16 A. We took this as this was a
17 positive meeting reinforcing that our efforts
18 and how our pharmacists are acting and
19 continuing in our safeguards and controls and --
20 are working, and, in essence, being applauded by
21 the investigators in question.

22 - - -

23 (Tsipakis Deposition Exhibit 45 marked.)

24 - - -

1 BY MR. BARNES:

2 Q. Okay. Go to file 37, Exhibit 45.

3 Is this a business record of Giant
4 Eagle, Exhibit 45?

5 A. Yes, it is.

6 Q. And does it reference a Giant
7 Eagle pharmacy detecting what it believed were
8 fraudulent prescriptions for promethazine and
9 Norco?

10 A. Yes, it is.

11 Q. Down at the bottom, there's an
12 indication that the pharmacist detected that the
13 address and phone numbers for the alleged
14 prescriber were not on the hard copy. The
15 correct phone number is as indicated, but a
16 different number was on the script, and further
17 recognizing that this was an OB-GYN for out of
18 town doctors.

19 Is this an example of Giant Eagle
20 pharmacists exercising due diligence to detect
21 fraudulent prescriptions?

22 MR. GADDY: Form and scope.

23 A. Yes.

24 Q. Now, is it your experience,

1 Mr. Tsipakis, that the mere fact that a
2 pharmacist may detect and think that there's a
3 red flag, but it actually turns out that there's
4 not a red flag, that the prescription is
5 actually legitimate?

6 A. Yes, that does happen.

7 MR. BARNES: Object to form.

8 Q. In fact, that's exactly what
9 happened here, right? Up above it says that
10 local police were contacted. They did an
11 investigation. It turned out it wasn't a
12 forgery, correct?

13 A. That is correct.

14 Q. So this is an example of a red
15 flag being totally wrong. It was actually a
16 legitimate prescription.

17 Correct?

18 A. This was a legitimate
19 prescription. After all the diligence was done
20 and all the investigation, it was found to be,
21 yes, the prescriber actually did write this
22 prescription.

23 Q. Is that something that the
24 pharmacist has to take into account that what he

1 may think is a red flag is actually not a red
2 flag and it's actually a totally legitimate
3 prescription?

4 A. It's a consideration, yes.

5 - - -

6 (Tsipakis Deposition Exhibit 46 marked.)

7 - - -

8 BY MR. BARNES:

9 Q. Go to file 38, which we'll call
10 Exhibit 46.

11 A. Sorry. Which number, Mr. Barnes?

12 Q. File 38. We're going to call it
13 Exhibit 46.

14 A. Okay.

15 Q. Is this a corporate business
16 record of Giant Eagle?

17 A. Yes, it is.

18 Q. And is this another example of the
19 pharmacy loss prevention department summarizing
20 its activities for 2019?

21 MR. GADDY: Objection to form,
22 scope.

23 A. Yes, it is.

24 Q. Again, emphasizing they're working

1 with multiple law enforcement agencies, various
2 task force, constant communications with the
3 Board of Pharmacy, and the Attorney General
4 offices.

5 Am I reading these correctly?

6 MR. GADDY: Same objections.

7 A. Yes. You are reading them
8 correctly. And of note -- and I remember in
9 particular near the bottom, it talks about
10 individuals being arrested in our parking lot
11 for selling their Percocet to other individuals.
12 So an example, as we testified earlier, of
13 prescriptions being dispensed and then patients
14 diverting those and then getting arrested.

15 Q. Was that an investigation and were
16 those arrests the result of Giant Eagle calling
17 in law enforcement?

18 A. Yes, it was.

19 MR. GADDY: Form.

20 A. It was a multi-month, if not
21 years, of investigation that led to an arrest.

22 Q. There's references to Giant Eagle
23 working on providing information to the federal
24 drug task force investigating cases regarding

1 the opioid crises.

2 Do you see that?

3 A. Yes.

4 Q. It says, "As a result, several
5 licensed medical practitioners have been
6 arrested for either overprescribing or medically
7 unnecessary controlled substances."

8 So does that indicate that
9 Giant Eagle's loss prevention department was
10 actively working with the federal drug task
11 force investigating the opioid crisis?

12 MR. GADDY: Objection; form and
13 scope.

14 A. Yes, we were actively involved.

15 Q. And do you know, Mr. Tsipakis, at
16 any time Giant Eagle was working on a federal
17 drug task force investigating the opioid crisis
18 whether anybody on that task force or any other
19 law enforcement agency challenged Giant Eagle's
20 participation and said, "Well, you guys don't
21 deserve to participate because you're doing
22 something wrong at your own pharmacies"?

23 MR. GADDY: Objection to form and
24 scope.

1 A. No, never.

2 Q. And for that matter, in all of the
3 contacts with law enforcement and Board of
4 Pharmacy, police that we've seen, did anybody
5 from Lake or Trumbull County law enforcement or
6 otherwise ever complain about Giant Eagle's
7 dispensing practices?

8 MR. GADDY: Form and scope.

9 A. No, never.

10 - - -

11 (Tsipakis Deposition Exhibit 47 marked.)

12 - - -

13 BY MR. BARNES:

14 Q. Go to file 39, which we'll call
15 Exhibit 47.

16 Is this a business record of
17 Giant Eagle?

18 A. Yes, it is.

19 Q. Is this another example of the be
20 on the lookout notification sent out by
21 Rick Shaheen, Giant Eagle's pharmacy loss
22 prevention department, and in this example, fake
23 prescriptions attempting to being passed in a
24 certain area?

1 MR. GADDY: Form, scope.

2 A. Yes, it is.

3 Q. Okay. Now, Mr. Tsipakis, in
4 Giant Eagle's circumstance, it has control over
5 both the distribution from its own warehouses
6 and dispensing from its own pharmacies; is that
7 correct?

8 MR. GADDY: Objection to form,
9 scope.

10 A. Yes.

11 Q. Was that a yes, Mr. Tsipakis?

12 A. Yes, that is correct.

13 Q. Okay. And so product that came
14 out of the Giant Eagle warehouses were in
15 constant control of Giant Eagle even when they
16 arrived at the pharmacy and all the way to the
17 point of dispensing; is that correct?

18 A. Yes, that is correct.

19 Q. And, Mr. Tsipakis, I think you
20 testified a little bit about this, but the Ohio
21 Board of Pharmacy inspected the Giant Eagle
22 pharmacies in Ohio hundreds of times.

23 Are you aware of that?

24 MR. GADDY: Form and scope.

1 A. Yes, I am aware of that.

2 Q. And was Giant Eagle ever
3 suspended -- was its license ever suspended or
4 revoked for any alleged violation of the Ohio or
5 federal drug laws?

6 MR. GADDY: Same.

7 A. No.

8 Q. As a result of those inspections
9 or otherwise?

10 MR. GADDY: Same objections.

11 A. No, never.

12 Q. You were asked some questions in
13 your last deposition about so-called cocktail
14 drugs.

15 Do you remember that,
16 Mr. Tsipakis?

17 A. Yes.

18 Q. In your experience, are cocktail
19 drugs written for legitimate medical reasons by
20 doctors?

21 MR. GADDY: Objection; form.

22 A. Yes.

23 Q. Are those types of prescriptions
24 evaluated as part of the DUR process?

1 A. Yes. Absolutely.

2 Q. You were asked some questions in
3 your last deposition about how busy are
4 Giant Eagle stores. Mr. Mougey asked you, for
5 example, did Giant Eagle stores do approximately
6 6,000 prescriptions a week.

7 Do you remember that line of
8 questioning?

9 A. Yes, I do.

10 Q. And what's the actual average
11 number of prescriptions filled by Giant Eagle
12 stores?

13 A. Our average prescriptions per
14 store is roughly 23-, 2400, and that's for total
15 prescriptions. Controlled substance
16 prescriptions, all schedules, are less than
17 9 percent of that number.

18 Q. And is that a -- does that
19 percentage mean anything to you in terms of how
20 big or small or right on where it should be?
21 What does that mean, 9 percent? Less than
22 9 percent of Giant Eagle's total prescriptions
23 were controlled substances.

24 MR. GADDY: Objection; form,

1 scope.

2 A. From the DEA view and from
3 experience, a typical pharmacy on controlled
4 substances is roughly 20 percent. So this would
5 indicate that we're half of -- roughly less than
6 half of the normal average that the DEA states
7 is average across registrants.

8 Q. Which is an indication of what to
9 you?

10 MR. GADDY: Object to form.

11 A. That we don't fill -- that we
12 don't fill as many controlled substances as
13 other -- as other pharmacies, and that people
14 that are trying to pass prescriptions as was
15 described, forged prescriptions or other
16 prescriptions, they just don't come to us.

17 Q. All right. But getting back to --
18 so 23- to 2400 average, less than 9 percent are
19 controlled. Do your stores -- how many -- how
20 many on average pharmacists does a typical
21 Giant Eagle pharmacy have on -- under employment
22 working at a pharmacy?

23 A. So at a particular pharmacy,
24 depending on the volume, we could have anywhere

1 from three to six pharmacists on during a day
2 shift.

3 Q. So that workload of 2300 to 2400
4 prescriptions, less than 9 percent are
5 controlled substances, that would be spread out
6 between three to six pharmacists working
7 throughout the day?

8 A. Yes, that's correct. A little
9 less during the weekends, but during the week,
10 full hours, yes.

11 Q. And the other 81 [sic] percent of
12 the prescriptions, besides the 9 percent or so
13 that are controlleds, are these just regular
14 prescriptions like amoxicillin and the
15 run-of-the-mill-type prescriptions?

16 A. They're non-controlled or
17 scheduled drugs.

18 Q. Do controlled prescriptions
19 usually require more time for the pharmacists
20 when they come in -- even if it's only 9 percent
21 or so of their workload, do pharmacists tend to
22 spend more time on controlled substance
23 prescriptions?

24 A. Yes.

1 MR. GADDY: Form, scope.

2 Q. Is a lot of due diligence
3 performed by Giant Eagle pharmacists not written
4 down?

5 MR. GADDY: Objection to form.

6 A. Yes.

7 Q. And why is that? Why wouldn't
8 Giant Eagle require pharmacists to write down
9 each and every thing they consider as part of
10 the due diligence process?

11 A. There's no requirement to document
12 such interactions or documentation, but also
13 it's the professional judgment and the
14 discretion of the pharmacists on if they need to
15 or if they need to communicate something or if
16 they need to -- for example, an insurance reason
17 need to put something in the computer or put
18 something on the hard copy.

19 Q. Do pharmacists have -- as they
20 gain experience, especially at a pharmacy, do
21 they develop relationships with the patients
22 such that they would know what their past
23 history is of prescriptions at the pharmacy and
24 what the condition being treated is?

1 MR. GADDY: Objection to form.

2 A. Yes.

3 Q. And is that something that
4 pharmacists typically write down every time, or
5 is that something they carry in their head and
6 based upon the patient relationship, they
7 already know it and they will fill the
8 prescription knowing that it's appropriate
9 already?

10 MR. GADDY: Same objections.

11 A. Certainly a pharmacist that's at a
12 store, a regular -- you get to know your
13 clientele and your patients, and as a pharmacist
14 myself, you know those patients and you know
15 their history and you know their disease states.

16 Q. You were asked some questions at
17 the last deposition about a so-called manual.
18 This was Exhibit 2 of your first deposition.

19 Do you remember this manual?

20 A. Yes.

21 Q. All right. And I just had some
22 follow-up questions.

23 You've already told us that the
24 DEA manual was used by Giant Eagle throughout

1 this time period in those controlled substance
2 boxes that we went over.

3 This Exhibit 2 I think you
4 testified was never passed or effectuated as a
5 policy at Giant Eagle. Was that due in part to
6 the fact that you were already following the DEA
7 manual?

8 MR. GADDY: Objection to form.

9 A. Yes.

10 Q. And are some or all of the
11 portions of this Exhibit 2 -- were they already
12 in place in other locations at the Giant Eagle
13 pharmacies in other policies, for example, and
14 in the guidelines, things of that nature?

15 A. Yes, they were.

16 Q. Okay. Does it concern you at all
17 that there was a draft of a manual on
18 Giant Eagle's computer system that was never
19 effectuated, or is that something that you've
20 seen before?

21 MR. GADDY: Objection to form.

22 A. No, not concerned and I've
23 definitely seen drafts of things that we
24 started, created, or were not published.

1 Q. Did the DEA or the Ohio Board of
2 Pharmacy ever require that Giant Eagle adopt
3 this manual as its own manual at any time?

4 MR. GADDY: Form.

5 A. No, never.

6 Q. In fact, did they require
7 Giant Eagle to adopt any specific manual at any
8 time?

9 A. No, never.

10 MR. KOBRIN: Bob, can we take a
11 break wherever it's convenient?

12 MR. BARNES: Yeah, we can take a
13 ten-minute break.

14 I probably only have about ten
15 more minutes, Jeff.

16 MR. GADDY: Okay. Thanks.

17 THE VIDEOGRAPHER: Stand by. The
18 time is 1:50 p.m. Off the record.

19 (Recess taken.)

20 THE VIDEOGRAPHER: The time is
21 2:03 p.m. Back on the record.

22 BY MR. BARNES:

23 Q. Mr. Tsipakis, you were asked some
24 questions about a series of exhibits, and I

1 tended to ask you if they were a business record
2 of Giant Eagle.

3 Do you remember all multiple times
4 I asked you those questions?

5 A. Yes, I do.

6 Q. In that regard, I want to break
7 that down. Were the records that you testified
8 to as being business records, were they made at
9 or near the time that they were transmitted by
10 somebody with knowledge of the information
11 contained therein?

12 A. Yes, they were.

13 MR. GADDY: Object to form.

14 Bob, I can't imagine we're going
15 to have a dispute about this. I just --

16 MR. BARNES: Oh, you're not?

17 Okay.

18 MR. GADDY: I don't think we will.
19 I just -- half the time I hadn't gotten
20 the folder open before he was answering
21 the question.

22 MR. BARNES: Well, I'm going to
23 finish.

24

1 BY MR. BARNES:

2 Q. And, Mr. Tsipakis, when you
3 testified that those documents, those exhibits,
4 were business records, were they -- did you mean
5 that these records were kept in the ordinary
6 course of business by Giant Eagle pursuant to
7 regularly conducted business activity of
8 Giant Eagle?

9 MR. GADDY: Object to form.

10 A. Yes, they were.

11 Q. And was it a regular practice of
12 Giant Eagle to keep those records?

13 MR. GADDY: Objection; form.

14 A. Yes, it was.

15 Q. And was that what you meant when
16 you said that they were business records of
17 Giant Eagle?

18 MR. GADDY: Same.

19 A. Yes, it is.

20 Q. You testified in your first
21 deposition about the corresponding obligation of
22 Giant Eagle pharmacists.

23 To your understanding, is that an
24 obligation of the pharmacist or the pharmacy?

1 MR. GADDY: Object to form.

2 A. The pharmacist.

3 Q. And then you also testified
4 regarding the sometimes scanning of hard copy
5 prescriptions.

6 Do you recall that testimony?

7 A. Yes, I do.

8 Q. In what circumstance would a hard
9 copy prescription be scanned or not scanned?
10 What determined those scanning parameters?

11 MR. GADDY: Object to form.

12 A. All the prescriptions, hard
13 copies, are scanned into the computer system.

14 Q. Has that always been the case, or
15 did it start at a certain point in time?

16 A. I'm not sure exactly when it was
17 started. Certainly it was after an enhancement
18 in the pharmacy computer dispensing software
19 allowing images to be stored electronically in
20 the computer.

21 Q. Okay. And I think you said
22 insurers require hard copy scanning for
23 reimbursement; is that correct?

24 A. Yes. I believe what I said is

1 there's certain insurance -- from an audit
2 perspective on insurance, notes need to be
3 physically on the hard copy. It doesn't matter
4 if they're in the computer system. They have to
5 be on the hard copy. So there's occasions that
6 we need to pull the hard copy and document.

7 I believe the example I used on
8 testing strips. So for Medicare, Medicaid, the
9 directions of use, if we get a prescription that
10 says use as directed and we quantify what that
11 means, testing once a day, twice a day, three
12 times a day, that needs to be, in essence, put
13 on the prescription, hard copy.

14 Q. Okay. In these 30 or 40 examples,
15 these exhibits we went over -- I'll call them
16 corporate controls and pharmacy due diligence --
17 was it a regular practice of the Giant Eagle
18 corporate compliance department to respond to
19 pharmacists' inquiries when they had concerns
20 about potentially bad scripts and to do
21 investigations and to help the pharmacies and
22 the pharmacists resolve them?

23 MR. GADDY: Objection to form.

24 A. Yes. Absolutely. These were

1 examples of an ongoing and continual even to
2 this day process, that basically the
3 interactions between corporate resources, the
4 stores, loss prevention and a regular course and
5 normal course of business and oversight.

6 Q. Okay. And over the years, have
7 various personnel been involved in these
8 activities, some of whom are no longer employed
9 by the company?

10 A. Yes, that is correct.

11 Q. And Giant Eagle's record retention
12 policies, would some of those records likely
13 have been destroyed after people left and a
14 number of years had passed since their leaving?

15 MR. GADDY: Form, scope.

16 A. Yes. There's -- the servers
17 automatically -- for example, Outlook will
18 delete after so many days for space reasons and
19 other things. So there is -- there is normal
20 processes that happen that eliminate
21 documentation over the -- especially if the time
22 has lapsed, yes.

23 Q. Okay. And you were asked earlier
24 this morning by Mr. Gaddy of what other controls

1 were there over dispensing besides the threshold
2 reports.

3 Do you remember that line of
4 questioning?

5 A. Yes, I do.

6 Q. And have we covered, to your
7 recollection, the numerous other controls over
8 dispensing that exist at the Giant Eagle
9 pharmacies and existed at these pharmacies
10 throughout the time period, such as inventory
11 controls and software controls and audit
12 controls, and all those other types of controls?

13 MR. GADDY: Objection to form.

14 A. Yes, we have.

15 MR. BARNES: I've got nothing
16 further.

17 - - -

18 RE CROSS-EXAMINATION

19 BY MR. GADDY:

20 Q. Mr. Tsipakis, you were asked some
21 questions earlier by Mr. Barnes about the job or
22 the duty of the pharmacist, and he would talk
23 about the job or the duty of the pharmacist in
24 comparison to maybe other medical professionals,

1 like the doctor.

2 Do you recall that generally?

3 A. Yes, I do.

4 Q. You don't dispute the fact that
5 the pharmacy and the pharmacist have a
6 corresponding responsibility, correct?

7 A. The pharmacist has a
8 corresponding --

9 MR. BARNES: Object to form.

10 A. -- responsibility.

11 Q. Let's look at Exhibit Number 1,
12 which is P-HBC-28, which is the controlled
13 substance dispensing guidelines.

14 Let me know when you have those,
15 Mr. Tsipakis.

16 A. I have it.

17 Q. And you see at the top of the
18 first page -- this is a Giant Eagle policy,
19 right?

20 A. Yes, it is.

21 Q. Okay. And the very first section
22 of this document, it states the purpose,
23 correct?

24 A. Yes.

1 Q. And it says, "The purpose of this
2 document is to provide the guidelines for the
3 proper dispensing of controlled substances that
4 support the corresponding responsibility mandate
5 placed upon pharmacists to exercise due
6 diligence in the decision to fill or not to fill
7 a controlled substance prescription."

8 Correct?

9 A. Correct.

10 Q. And you'll agree that that is an
11 obligation in the decision that the pharmacist
12 has to make every time they're presented with a
13 prescription, correct?

14 MR. BARNES: Object to form.

15 A. Yes. Pharmacists use their due
16 diligence and professional judgment to fill --
17 to decide whether to fill or not fill a
18 prescription.

19 Q. Right. But every time they fill a
20 prescription, they have to make that independent
21 decision of whether or not that prescription
22 should be filled or should not be filled,
23 correct?

24 A. Yes. Correct.

1 Q. When you were talking about the
2 job and the duty of the pharmacist and
3 differentiating it from the doctor, you weren't
4 trying to run away from this corresponding
5 responsibility that the Giant Eagle pharmacists
6 have, were you?

7 A. Absolutely not.

8 Q. That's an obligation and a duty
9 that they have today and that they've had since
10 the time that you first started filling
11 prescriptions as a pharmacist, correct?

12 MR. BARNES: Object to form.

13 A. Yes, that's correct.

14 Q. And as outlined in this Giant
15 Eagle policy, the pharmacist must exercise due
16 diligence in making that decision, correct?

17 A. Due diligence and their
18 professional judgment, yes, correct.

19 Q. Now, Mr. Barnes also asked you
20 some questions about red flags and where some of
21 that language comes from, and he asked you about
22 Ohio regulations and those types of things.

23 Do you recall that generally?

24 A. Yes.

1 Q. Do you recall that the DEA has
2 made clear that pharmacists are supposed to be
3 on the lookout for red flags?

4 MR. BARNES: Object to form.

5 A. The DEA has not changed any of
6 their rules according to -- in relation to red
7 flags. They've published certain memos or
8 putting things on their website. The rules are
9 the same, but certainly they have given -- it's
10 not guidance. It's basically giving information
11 on things to look out for or data points to be
12 aware of.

13 Q. Mr. Tsipakis, do you agree that
14 the DEA has told pharmacies, like Giant Eagle,
15 that there are certain red flags that must be
16 considered as part of due diligence?

17 MR. BARNES: Object to form.

18 A. The DEA has provided certainly
19 examples of red flags to be considered when
20 filling prescriptions, yes.

21 Q. More than just guidance. They've
22 given a list of red flags that must be
23 considered by the pharmacists when filling
24 prescriptions, correct?

1 MR. BARNES: Object to form. He
2 already said it wasn't guidance.

3 A. There is no -- there is no DEA
4 rule that I am aware of that prescribes these
5 red flags and this is what you need to do with
6 these red flags and this is how you need to
7 clear those red flags.

8 Q. Mr. Tsipakis, do you agree that
9 the DEA has told pharmacies like Giant Eagle
10 that there are red flags that must be considered
11 as part of the due diligence process?

12 MR. BARNES: Objection; asking him
13 to speculate about what the DEA might
14 have told other pharmacies.

15 A. Again, the red -- the DEA has put
16 information out on things it considers red flags
17 and things to consider when filling a controlled
18 substance prescription.

19 Q. And you'll agree that pharmacists
20 should be on the lookout for red flags when
21 filling controlled substance prescriptions,
22 correct?

23 A. Pharmacists should be on the
24 lookout of all red flags for all prescriptions,

1 not just controlled substance prescriptions, but
2 for all prescriptions.

3 Q. And, in fact, on the second page
4 of this controlled substance dispensing
5 guideline that Giant Eagle put out in 2013,
6 about two-thirds of the way down the page, Giant
7 Eagle outlines these red flags.

8 Do you see that, where it says
9 "Appropriateness of Controlled Substance
10 Prescriptions"?

11 A. Yes.

12 Q. And it says there in that first
13 line, it says, "The DEA in a written opinion
14 suspending a licensed pharmacy for failure to
15 exercise the appropriate follow-up with regards
16 to the dispensing of controlled substances
17 identified ten red flags that must be considered
18 as part of the due diligence by the pharmacist
19 in evaluating whether to fill a prescription."

20 Do you see that?

21 A. Yes, I do.

22 Q. And do you agree with that
23 statement that Giant Eagle chose to include in
24 their dispensing guidelines in 2013?

1 A. Yes. We included them.

2 Q. And you're not running away from
3 the fact that there are red flags that
4 pharmacists should be on the lookout for and
5 should consider and should dispel before filling
6 prescriptions for controlled substances,
7 correct?

8 A. Correct. I'm not running away
9 from anything.

10 Q. Okay. Now, pharmacists are also
11 required to document any due diligence that they
12 perform in order to dispel red flags, correct?

13 MR. BARNES: Object to form.

14 A. There is no legal requirement that
15 requires a pharmacist to document any due
16 diligence around red flags.

17 Q. Are Giant Eagle pharmacists
18 required to document any due diligence that they
19 perform to dispel red flags?

20 MR. BARNES: Objection; asked and
21 answered. I also object to form.

22 A. Our pharmacists use their
23 professional judgment and discretion on when
24 they need to document things that they need to

1 document, and they do so.

2 Q. Mr. Tsipakis, if we look at the
3 third page of the controlled substance
4 dispensing policy about two-thirds of the way
5 down the page, there's a section entitled
6 "Documentation."

7 Do you see that?

8 A. I'm sorry. Which page?

9 Q. Page 3 of the guidelines.

10 A. Yes, I see it.

11 Q. And do you see there it says, "The
12 pharmacists must document the steps they have
13 taken to verify questionable prescriptions,
14 including any calls to the prescriber,
15 conversations with the patient, medication
16 history review, and notate on the prescription
17 itself or in the computer system utilizing the
18 appropriate notes field."

19 Do you see that?

20 A. Yes.

21 Q. This guideline that Giant Eagle
22 sent to its pharmacists back in July of 2013
23 doesn't say "Use your judgment about whether or
24 not to document your due diligence." It says

1 they must document the steps.

2 Correct?

3 A. That is what it says here, but
4 certainly --

5 Q. And if you have a pharmacist who
6 is --

7 MR. BARNES: Hold on. Hold on.
8 He didn't finish his answer.

9 Q. I'm sorry, Mr. Tsipakis. I didn't
10 mean to interrupt you. Were you still --

11 A. So if you're saying that's what it
12 says on the line, what's implied here is for the
13 pharmacist to document in the areas that we've
14 provided them, whether it's in the computer
15 system, on the hard copy, the items that they
16 deem in their discretion that they need to
17 document, because a red flag -- there is no --
18 there is no -- there's no one size fits all.

19 So certainly a red flag to one
20 pharmacist may not be a red flag to another
21 pharmacist, because I know the patient or I know
22 where they live or I know where they're coming
23 from. I know what the situation is.

24 So there is -- that's where the

1 discretion comes in on what pharmacists need to
2 document or not, depending on the red flag or
3 the situation.

4 Q. Can you point me to where in the
5 documentation section it tells pharmacists they
6 can use their discretion on whether or not to
7 document the steps that they took to verify a
8 prescription.

9 A. In the practice of pharmacy,
10 documentation is a discretion. There's a
11 discretion on where I document things I need for
12 insurance purposes, things I need for refills,
13 things I need to follow up with physicians. So
14 there's discretion that is used.

15 Q. Is there anywhere on this policy
16 where Giant Eagle is telling their pharmacies
17 that it's up to them whether or not they
18 document the steps that they take to verify a
19 prescription, or does this document tell them
20 that they must do that?

21 A. This document simply outlines
22 dispensing guidelines, best practices, and
23 things they should be aware of when filling a
24 prescription for a controlled substance.

1 This does not -- this does not
2 override their professional judgment. This does
3 not override their training. This does not
4 override any of that.

5 This is just certainly a guideline
6 to help them, to point things out, and certainly
7 from a documentation process, they have
8 abilities to document in multiple places within
9 the computer system, the hard copy, dispensing
10 record, et cetera.

11 Q. I'm just a little confused,
12 Mr. Tsipakis.

13 Does it or does it not say that
14 the pharmacist must document the steps they've
15 taken? Does it say that?

16 MR. BARNES: Objection; asked and
17 answered.

18 A. If you're asking me to read what
19 the line on page 3 says, yes, it says, "The
20 pharmacist must document the steps they have
21 taken to verify questionable prescriptions."

22 Q. Okay. And then in the bullet
23 points below, it gives some additional
24 information that it says must be included. It

1 says, "This documentation must include," and it
2 gives some additional information that must be
3 included when they document the steps they've
4 taken.

5 Do you see that? Are we on the
6 same page there?

7 A. Yes. This is no different when we
8 take a new prescription over the phone on who
9 the prescriber was, who the nurse was who called
10 it in, what time did they call it in, what date
11 did they call it in.

12 So this is all very common on what
13 a pharmacist is aware of to document or when not
14 to document.

15 MR. GADDY: Move to strike as
16 nonresponsive.

17 BY MR. GADDY:

18 Q. Now, we see at the bottom of every
19 page the date that this was created, July 22,
20 2013, correct?

21 A. Correct.

22 Q. And you agree there was no written
23 Giant Eagle controlled substance dispensing
24 guideline prior to July 22, 2013, correct?

1 MR. BARNES: Objection; asked and
2 answered.

3 A. The information in this guideline
4 and other information was already available
5 either at the pharmacy on the Internet portal
6 that we have. It was information that was
7 already available.

8 Q. So the answer is no, it was never
9 in written form in a guideline from Giant Eagle
10 prior to January of '13, right?

11 MR. BARNES: Objection; misstates
12 his testimony.

13 A. If you're asking me if there is a
14 document, a four-page document, that -- I
15 guess -- I'm sorry. I'm trying to understand
16 your question.

17 This is a guideline that was
18 provided on 2013 that's information that was --
19 same information that the stores had, were
20 using, and put in a guideline, in a document.

21 Q. This is Version 1, correct?

22 A. I'm not aware of another document
23 that looks like -- if you're asking me -- like
24 this --

1 Q. Okay.

2 A. -- before.

3 Q. Has this version ever been
4 supplemented or edited at any time since July of
5 2013?

6 A. I am not -- I'm not aware of that,
7 yes or no.

8 Q. If all of this information was
9 already available somewhere else, can you
10 explain to us why Giant Eagle took the time and
11 spent the money to put together a formal
12 controlled substance dispensing guideline if it
13 was information that the pharmacist already had?

14 A. It's our attempt as a continuous
15 improvement process and continually top of mind.
16 As was mentioned in my testimony before, we
17 continually talked to our pharmacists through
18 education, through training, and this is an
19 evolution of that continual keeping things top
20 of mind and reminding and supporting our
21 pharmacists, so ...

22 Q. Okay. So this was the first time
23 that you had decided to create a top of mind
24 document regarding dispensing guidelines for

1 controlled substance, July 2013, fair?

2 MR. BARNES: Object to form,
3 misstates testimony.

4 A. This was a document that was put
5 together of information that's already out
6 there. You had mentioned about DEA information
7 that was out there, Board of Pharmacy
8 information. So someone decided and thought it
9 would be a good idea to put some information
10 together and to push it out to the stores. And
11 that's what they did.

12 Q. And you don't know whether or not
13 people have continued to update these guidelines
14 over time as additional information has come out
15 over the last eight years?

16 A. Well, I am sure they have. I just
17 don't know what revisions -- I don't know what
18 revisions, if any, have happened. There's
19 certainly a lot of different training documents
20 and other things that we have that go through
21 regular revisions.

22 So if you're asking me if this is
23 a static document, nothing is static in our --
24 again, it's a continual process of improvement.

1 Every week, every month, every year, there's
2 things that we respond to and help support our
3 pharmacy.

4 Q. Is there an updated version of
5 this document? The only one I have is dated
6 7/22/13, and you're telling me it's continually
7 being updated. I don't have an updated version.

8 Are you telling me there is one?

9 A. You asked me if I know if this has
10 been revised, and I'm testifying that I don't
11 know if it's been revised.

12 Q. You have no knowledge that it has
13 been?

14 A. I have no knowledge that it has
15 been or it has not been.

16 Q. You were asked some questions
17 about the controlled substance manual, the one
18 that I think George Chunderlik put together but
19 was never actually rolled out to the pharmacies.

20 Do you remember that generally?

21 A. Was that the exhibit -- the second
22 exhibit --

23 Q. It was.

24 A. Okay. Yes.

1 Q. Do you remember that generally?

2 A. Yes.

3 Q. Okay. And Mr. Barnes a few
4 minutes ago asked you why, after Giant Eagle
5 took the time and spent the money to put that
6 together, wouldn't it have been rolled out to
7 the stores. And you said something to the
8 effect of because the stores already had the DEA
9 pharmacy manual.

10 Do you remember that generally?

11 A. I said that the pharmacists have
12 the DEA pharmacist manual and other information
13 that they have. The DEA pharmacist manual is
14 one of different pieces of information that they
15 have. And a lot of what's covered in this
16 document is really covering information that
17 they already have, or it's already -- they
18 already have access to or already did have
19 access to or in another form already there.

20 Q. What is the other source of
21 information -- and I'm telling you because I'm
22 looking -- I've flipped through the DEA
23 pharmacist manual, and I'll represent to you
24 it's not in there. You can look, if you like.

1 But what is the other source of
2 information that you're telling us the
3 pharmacists had to see the extensive list of red
4 flags that were outlined in Exhibit Number 2,
5 the controlled substance manual?

6 MR. BARNES: Object to form.

7 A. So I don't have an exact date when
8 this was created or how it was created. What I
9 do know is the data, as you mentioned on the
10 controlled substance guideline that we have, so
11 the pharmacist have had access to that, right,
12 since it was put together.

13 Pharmacists through continuing
14 education, through the red flags videos we
15 talked about earlier from the Ohio Board of
16 Pharmacy -- there's different pieces of
17 information covering red flags and top of mind
18 of red flags that has been discussed with our
19 pharmacists and certainly reinforced with our
20 pharmacists.

21 Q. Is there any -- we'll talk about
22 the video in just a second. But anything other
23 than the dispensing guidelines, which we've
24 already looked at, the video, any other

1 document, any other piece of paper or policy
2 that you can point me to that the pharmacists
3 had access to that had everything in it that
4 that Exhibit Number 2, the controlled substance
5 manual -- I don't want to go back through it
6 again. You went over it in March. But all the
7 different flags that it has for prescribers and
8 for patients and for pharmacists and for stores.
9 I think we counted over 40 red flags that that
10 one listed.

11 What other document or piece of
12 paper can you point me to that the pharmacist
13 had access to that gave you the comfort to not
14 publish Exhibit Number 2, the controlled
15 substance manual?

16 A. So in regards to red flags, I know
17 the discussion of red flags was covered
18 extensively at the different meetings and the
19 continuing education portions of our pharmacists
20 that we had, whether it was at cluster meetings
21 we had, whether it was at our annual meetings
22 that we had. Certainly all of that was top of
23 mind.

24 As far as a written document, this

1 is the written document that we have, that we
2 had put together in 2013.

3 Q. Okay. You're talking about the
4 guidelines?

5 A. Guidelines.

6 Q. Okay. So we have the four-page
7 guidelines, and we have the video, and then we
8 have meetings and training?

9 A. No. You're -- again, you're
10 taking my testimony as there's little snippets
11 or one thing. This was a continuous process of
12 all the responsibility from the pharmacists,
13 certainly the reinforcing of support for our
14 pharmacists. And as the conversations around
15 red flags and propagation of things -- or data
16 points and things to watch out and changes in
17 prescribing habits, all those things were
18 continually discussed and shared and top of mind
19 with our corporate teams, our pharmacy teams,
20 our loss prevention teams.

21 So whether it was in a document or
22 not, it was covered extensively throughout the
23 years.

24 Q. Okay. So meetings, discussions,

1 continuing education, the controlled substance
2 dispensing guidelines, the four-pager, and the
3 video?

4 A. Loss prevention audits. When LP
5 would go audit the stores, certainly these are
6 conversations they had, the pharmacy district
7 managers reinforcing expectations of practice.
8 So, yes, all of that.

9 Q. And all of that is the reason that
10 Giant Eagle kept the 40-page controlled
11 substance manual sitting on the shelf that had
12 all these red flags listed in there; it's
13 because of all those meetings and discussions
14 that Giant Eagle decided they didn't need to
15 give the manual to the pharmacists?

16 A. No, that is not what I'm saying.
17 Up until my testimony in March, I
18 had never seen this manual, Exhibit 1348. It
19 was on one individual's hard drive and have no
20 background on how it was created, the reason it
21 was created, the reason -- I just -- I don't
22 have any background on it.

23 Q. Okay. Well, you understand you're
24 here today as the corporate representative of

1 Giant Eagle, correct?

2 A. Yes. Correct.

3 Q. Okay. Did you learn in your
4 preparation that George Chunderlik was the one
5 who was charged with drafting the controlled
6 substance manual?

7 A. My understanding is he is not --
8 he did not draft this document.

9 Q. Okay. Did you happen to look at
10 any of the portions of his deposition that he
11 gave earlier and any of the performance
12 evaluations where he talked about drafting or
13 putting together the controlled substance
14 manual?

15 A. Are you talking about the
16 dispensing guideline or this manual?

17 Q. No, the manual. He did both of
18 them.

19 A. My understanding in talking to
20 George is this is not a manual that he
21 created --

22 Q. Okay.

23 A. -- speaking with him.

24 Q. And as the corporate

1 representative of Giant Eagle, you don't have
2 any information that you can provide for why
3 Giant Eagle spent the time, money, and effort to
4 put that 40-plus page controlled substance
5 manual together that went through 30, 40 red
6 flags and then didn't give it to anybody? You
7 don't know why that is?

8 MR. BARNES: Object; misstates the
9 record.

10 A. I can tell you my understanding in
11 talking with George, that there was a pharmacist
12 that was helping out in the training department
13 that put this particular document together. And
14 from there, whatever the discussion was at the
15 time, et cetera, that it was never effectuated.
16 So past that, I can't -- I can't speculate on
17 the reasons why it wasn't used or not.

18 Q. So you know you had it. You know
19 it was put together. And you know it wasn't
20 used.

21 Is that all fair?

22 MR. BARNES: Object to form.

23 A. I know that it exists and it was
24 worked on by an individual pharmacist. Past

1 that, correct, I don't know anything else about
2 it.

3 Q. Well, you know it exists. You
4 know it was worked on. And you know it wasn't
5 shared with the pharmacists at Giant Eagle
6 stores.

7 Correct?

8 A. I know that it was never
9 effectuated or distributed to our pharmacists,
10 yes.

11 Q. You talked a little bit about
12 Rick Shaheen in the loss prevention department
13 and the role that they played, and you made some
14 comments along the lines of that because you
15 had -- I think you called it a robust loss
16 prevention department, that that would help
17 prevent diversion.

18 Do you remember that generally?

19 A. Yes.

20 Q. Okay. I want to look at
21 P-HBC-1419, which is going to be tab 16 in your
22 binder.

23 MR. BARNES: Jeff, was this a
24 document that was previously provided?

1 MR. GADDY: Yeah, everything that
2 I've used was sent -- I made my list
3 from last time's list.

4 MR. BARNES: Your list from what
5 list? I'm sorry. I didn't hear that.

6 MR. GADDY: I made my list for
7 today from the list of what Peter sent
8 you in March.

9 MR. KOBRIN: Exhibit 1614,
10 P-HBC --

11 MR. GADDY: 1419.

12 MR. KOBRIN: Thank you.

13 THE WITNESS: And, Mr. Gaddy, I'm
14 sorry. Which tab in your binder?

15 MR. GADDY: 16.

16 THE WITNESS: Thank you.

17 MR. KOBRIN: This is not -- this
18 is not in my box from the last time.
19 1419 is not there, just like the first
20 two that you used this morning are not
21 there.

22 I have 1404 -- P-HBC-1404, and
23 then it goes to PODWAG. That's one set.
24 You guys sent two sets.

1 BY MR. GADDY:

2 Q. Mr. Tsipakis, are you -- did you
3 find it?

4 MR. BARNES: Hold on, Jeff. I'm
5 not going to permit questioning if this
6 wasn't previously provided.

7 MR. KOBRIN: I don't --

8 MR. GADDY: You're looking at it.

9 MR. KOBRIN: I go from P-HBC-1387
10 TO P-HBC-5017. I don't know if they're
11 not in order. I'm willing to flip
12 through and look for it and continue to
13 look for it, but it's not in my set of
14 documents which were retained from the
15 first half of the deposition.

16 MR. GADDY: That's fine, Josh.
17 Bob's got a binder in front of him with
18 the document in it.

19 MR. KOBRIN: Which were sent in a
20 completely untimely manner. They were
21 sent weeks after the deposition opened
22 and not even timely for this second half
23 of the deposition.

24 I mean, proceed if you want to,

1 but I think it's completely excludable
2 as being a complete violation of the
3 protocol.

4 MR. GADDY: I appreciate your
5 thoughts.

6 MR. BARNES: Well, wait a minute.

7 MR. KOBRIN: I don't think they're
8 thoughts. I mean, Bob -- if Bob says is
9 you're not going on about it, you're not
10 going on about it. I think it's --

11 MR. GADDY: Well, then we'll come
12 back and do it again. It's a document
13 that Bob's got in front of him. This is
14 the silliest thing I've ever heard.

15 (Cross-talk.)

16 (Court reporter admonishment.)

17 MR. BARNES: Jeff, hold on. The
18 only reason we're here for a 45-minute
19 follow up was Peter was so upset about
20 not getting documents in the -- pursuant
21 to the protocol, and so we fought it out
22 with Special Master Cohen, and he said
23 you get 45 minutes, but that wasn't the
24 45 minutes to redo your exhibits. It

1 was 45 minutes to go over the documents
2 that were produced. This is not a
3 second bite at the apple.

4 MR. GADDY: And I don't think it
5 is, Bob. I told you I made my list from
6 what he sent last time. I can't help it
7 that Josh doesn't have his stuff in
8 order.

9 (Cross-talk.)

10 (Court reporter admonishment.)

11 I sent you a cull-down list to
12 make this easier for everybody. And why
13 y'all are trying to make it more
14 difficult, I can't fathom.

15 If you want to object about it and
16 you want to raise this later if this
17 ever tries to get used, you're more than
18 welcome to.

19 MR. BARNES: Why don't we talk to
20 the special master, Jeff.

21 (Cross-talk.)

22 (Court reporter admonishment.)

23 MR. GADDY: Josh, stop
24 interrupting.

1 If you want to make an objection
2 and maintain your objection, you're more
3 than welcome to do so.

4 The only reason I'm going to this
5 document, Bob, is because of the
6 questions you asked him on your
7 redirect, so I would have pulled this
8 out anyway new and used it even if it
9 hadn't been sent before, even though it
10 was.

11 But I really don't understand.
12 You've made your record. It's
13 preserved. I got a couple questions
14 about it, and we'll move on and be done.

15 MR. BARNES: Well, Josh, just
16 interpose your objection if you believe
17 it wasn't previously produced, and we'll
18 move to strike it as appropriate,
19 because this is not -- especially after,
20 Jeff, you and Peter, Peter especially,
21 objected so vociferously about not
22 following the protocol.

23 So we're going to insist that the
24 protocol be followed for you just like

1 you insisted that we follow it.

2 So if this wasn't produced, we're
3 going to move to strike it, and that's
4 the objection.

5 MR. KOBRIN: I have a complete set
6 of the documents from the prior
7 deposition which we received. Actually,
8 I have two complete sets which were
9 received in two packages.

10 I've looked in both packages.
11 This document and this file are not in
12 either of the boxes that we received
13 prior to the first half of the
14 deposition.

15 MR. BARNES: And so, Jeff, why are
16 you representing that this is from
17 there? I'm a little bit confused. Why
18 would you say that it was already
19 previously sent if it wasn't previously
20 sent?

21 MR. GADDY: What I did was I
22 pulled a list that was purported to me
23 as having everything that was sent the
24 first time, and I went through that and

1 culled it down to about 17, 18 documents
2 to try to make it easier for everybody.

3 Bob, I think you've got it sitting
4 in front of you. So, again, I'm at a
5 loss for what the prejudice is here.

6 Secondly, this is only coming up
7 because of questions that you just asked
8 him about Rick Shaheen and what he did.
9 So I would have gone to the well and
10 pulled this document out anyway.

11 MR. BARNES: Don't give me the
12 stuff about it's in front of me. All
13 200 of our exhibits were in front of
14 Peter the last time, and he threw a
15 hissy fit about it wasn't received by
16 noon the day before, so ...

17 MR. GADDY: Well, that's because
18 there was a ruling that we were supposed
19 to see what the deponent was relying on
20 in preparation for his deposition 24
21 hours in advance.

22 MR. BARNES: Right. And if this
23 is brand new, that's our --

24 (Cross-talk.)

1 (Court reporter admonishment.)

2 MR. GADDY: So that we could look
3 at them to ask our -- to know what to
4 ask the witness questions about.

5 MR. KOBRIN: You had your time.
6 This is a form over substance situation.
7 You're claiming substance now and we're
8 claiming form. You previously claimed
9 form and we claimed substance.

10 Peter admitted he went through all
11 the documents before. You still got
12 your additional 45 minutes.

13 MR. GADDY: Look, guys, we've been
14 here for four and a half hours for a
15 45-minute depo. Can I please just ask
16 him five questions about this? You've
17 made your record. Can we all just move
18 on? I promise Jim would be a lot
19 happier if we can just go ahead and get
20 this over with. He has no interest in
21 listening to you arguing about this.

22 MR. BARNES: What we're going to
23 do is interpose the objection. You can
24 ask him Jim the questions but over our

1 objection to the extent it wasn't
2 previously produced pursuant to the
3 protocol which you guys insisted be
4 followed meticulously.

5 So that's the objection to your
6 tab 16, but go ahead and ask some
7 questions, but we are going to move to
8 strike your use of any exhibit and your
9 elicitation of any testimony for
10 documents you did not previously
11 provide.

12 BY MR. GADDY:

13 Q. Mr. Tsipakis, do you have tab 16
14 open?

15 A. Yes.

16 Q. I want to start at the bottom of
17 the page and do this chronologically.

18 Do you see it's an e-mail from
19 May 5, 2016?

20 A. Yes.

21 Q. And, again, we're asking -- I'm
22 showing you this document in context to some of
23 the responses that you gave to Mr. Barnes'
24 questioning regarding Rick Shaheen and the loss

1 prevention department and how they played a role
2 in diversion prevention when it came to
3 Giant Eagle pharmacies, but you see this is
4 another HBC suspicious purchasing report.

5 Do you see that?

6 A. Yes.

7 Q. And it says, "One pharmacy
8 exceeding the threshold"?

9 A. Yes.

10 Q. And if we go back up to the next
11 e-mail, it says, "George" -- and this is from
12 Jason Mullen. It says, "George, do you want me
13 to look into 6512's numbers for buprenorphine?
14 I think they're having similar prescriber issues
15 that was hitting the Lancaster store."

16 Do you see that?

17 A. Yes.

18 Q. It goes to say, "This is the
19 fourth straight month that that store has blown
20 through their threshold rather early in the
21 month, although the threshold may be too low."

22 Do you see that?

23 A. Yes.

24 Q. Okay.

1 MR. KOBRIN: Object to form.

2 Q. Now, let's go up to the top
3 e-mail, Mr. Tsipakis.

4 A. Yeah. I'm just reading the --
5 okay.

6 Q. You see we've got another follow
7 up here from Jason Mullen to Mr. Chunderlik?

8 A. I'm sorry. The top of the page?

9 Q. Yes, sir.

10 A. I'm just going to read it one
11 second. I see it. I'm reading it.

12 Q. We can read it together.

13 A. Okay.

14 Q. It says, "I'm still going through
15 the data, but I wanted to give you a heads up
16 there were a couple of flags."

17 Do you see that?

18 A. Yes.

19 Q. It says, "They seem to be getting
20 a lot of the scripts from the health and
21 wellness center. This is the same place that is
22 hitting a lot of other Columbus stores,
23 including Lancaster, that Rick Shaheen went to
24 the DEA about."

1 Do you see that?

2 A. Yes.

3 Q. So what happened in this situation
4 was that Rick Shaheen with Giant Eagle loss
5 prevention had identified a problem prescriber
6 or prescribers and had actually contacted the
7 DEA about them.

8 Do you gather that?

9 A. From what I read there, yes.

10 Q. But despite the fact that he had
11 done that, other stores within the Giant Eagle
12 chain were still filling a lot of scripts from
13 those same prescribers.

14 Do you see that?

15 A. Whether they were filled, it says
16 here "hitting a lot of other Columbus stores."
17 So from what I'm reading here, these
18 prescriptions were showing up at other of our
19 stores.

20 Q. Okay. So even though loss
21 prevention had gone to the DEA complaining about
22 a prescriber or prescribers, these scripts
23 continued to make their way into Giant Eagle
24 stores and to the extent that this particular

1 store blew through their threshold for the
2 fourth straight month, correct?

3 A. So the store -- again, not having
4 any other data or any other data points, I think
5 if you recall in the testimony you and I had a
6 few years ago, the threshold -- the thresholds
7 that are set, there are certain stores that
8 could get caught in that threshold where they
9 were too low.

10 And this is an example of perhaps
11 a store that they're -- based on the chain
12 level, this is the threshold that's set, a
13 particular store based on their volume. It may
14 not be appropriate for that particular store and
15 they hit the threshold. And that's the
16 conversation I gathered that was done in this
17 e-mail string.

18 As far as the Rick Shaheen to the
19 DEA, this is not uncommon for us to talk to the
20 DEA about -- which is part of the collaboration
21 of things we're seeing, things we're concerned
22 about, things that we want to bring to their
23 attention.

24 But at the end of the day, these

1 are lawful prescriptions coming from prescribers
2 that are authorized to prescribe these
3 particular medications. And, again, each of
4 these prescriptions would have been cleared by a
5 pharmacist in their discretion, in their due
6 diligence.

7 Q. So I want to break that down into
8 two pieces, Mr. Tsipakis.

9 The first you said is the
10 threshold might have been too low because of the
11 volume of this store, right?

12 A. I'm only implying that from what
13 is written. I don't know.

14 Q. Sure. Sure. That's one
15 possibility, right?

16 A. Uh-huh.

17 Q. I'm sorry. I didn't hear you.

18 A. Yes.

19 Q. Okay. And that's one of the
20 problems with having a chain-wide threshold,
21 right?

22 A. From a mathematical perspective,
23 that is -- certainly that is something that can
24 happen, yes.

1 Q. You're going to have some stores
2 that maybe trip the threshold maybe more than
3 they should because they're high volume stores,
4 and then you're going to have other thresholds
5 that are maybe never going to trip the threshold
6 because they're such low volume stores; is that
7 fair?

8 A. I think it depends on where you
9 set the thresholds. If you set the thresholds
10 for the lowest common denominator, then other
11 stores -- again, it's a mathematical equation
12 how that works.

13 But in theory, you could have
14 stores on either side of that, but in our case,
15 it's the more conservative, using the smaller
16 number, so I think it would be stores with
17 higher volumes hitting the net more often than
18 the other way around.

19 Q. Well, what you've told us is
20 Giant Eagle uses a chain-wide average, right?

21 A. Correct.

22 Q. Okay. And, again, mathematical
23 problems, some stores are going to flip -- are
24 going to pop more easily than others are just

1 because of the populations that they service,
2 correct?

3 A. The prescription mix, correct.

4 Yes.

5 Q. And that's one of the flaws with
6 having a chain-wide average instead of a
7 store-specific average, correct?

8 MR. BARNES: Object to form.

9 A. This is why we don't just rely on
10 a threshold report or just thresholds. This is
11 one tool of many tools as we've testified -- as
12 we've gone through today in testimony and other
13 testimony, this is one -- one tool. And, again,
14 a tool that's not required by a threshold that's
15 not a required tool by the DEA, but one
16 certainly from a recommendation or at least a
17 good practice we implemented and continued to
18 improve upon it.

19 Q. Okay. Well, it's one that the DEA
20 actually advised you to implement, correct?

21 A. Yes. As it was testified earlier,
22 that was a suggestion, not a requirement. A
23 suggestion. We took that internally. We talked
24 to the stakeholders, thought that was a good

1 idea, and put it into practice.

2 Q. Now, before I get off track, I
3 said I wanted to break this into two parts, and
4 we covered the threshold part.

5 The second part is that -- relates
6 to Rick Shaheen and his conversation with the
7 DEA. So I want to come back to that, okay?

8 A. Okay.

9 Q. So Mr. Shaheen had had
10 conversations with the DEA about this prescriber
11 or prescribers, but despite the fact that
12 Giant Eagle loss prevention had notified -- or
13 excuse me -- had identified an issue with the
14 prescriber or prescribers, this particular store
15 and other stores throughout Columbus continued
16 to receive and fill prescription from those
17 individuals, correct?

18 MR. BARNES: Objection; misstates
19 the document.

20 A. I don't understand how you're
21 linking the two together. As far as if you're
22 asking did we continue to receive prescriptions
23 from this prescriber, yes, we did, as did every
24 other pharmacy, certainly, I'm sure in the area.

1 Q. But would you agree with me that
2 if your loss prevention department has developed
3 such serious concerns about a prescriber or
4 prescribers that they've decided to go to the
5 DEA about them, that maybe that's information
6 that should be passed along to all the
7 pharmacists in the field so that they can
8 evaluate that information as part of their due
9 diligence in making the determination about
10 whether or not to fill a prescription from that
11 prescriber?

12 A. I have no information that says he
13 did or did not pass that information along or
14 what was given or what wasn't. I'm only reading
15 with you this e-mail string.

16 Q. I hear you, and that will be my
17 next question. But my first question is, don't
18 you think he should have or Giant Eagle should
19 have communicated that information to the
20 pharmacists that, "Hey, our loss prevention
21 department has determined that this prescriber
22 or these prescribers at the health and wellness
23 center are so concerning that we went to the DEA
24 about them."

1 Don't you believe that that
2 information should be communicated to the
3 Giant Eagle pharmacists in the field so that
4 they can have that as an arrow in their quiver
5 when they're making a determination about
6 whether or not to fill a prescription?

7 MR. BARNES: Object to form.

8 A. Again, whether that information
9 was or was not communicated, I don't have -- I
10 can't answer that. But from experiences that I
11 have seen in how Rick Shaheen and our loss
12 prevention department and how our corporate
13 department is set up and works, I most assuredly
14 think that information was considered and
15 disseminated in whatever fashion that it was. I
16 have no reason to believe it wouldn't be.

17 MR. GADDY: Okay. Well, I'll move
18 to strike your speculation.

19 BY MR. GADDY:

20 Q. But maybe you just answered my
21 first question towards the end there by
22 implication.

23 But you'll agree that that
24 information should have been passed on to

1 Giant Eagle pharmacists, right?

2 MR. BARNES: Object to form.

3 A. You had asked me if that's
4 information -- again, I'm going back to the
5 question you asked me about Rick Shaheen and the
6 DEA, and I wasn't privy to the conversation
7 between Rick Shaheen and the DEA and what
8 information he did or didn't share.

9 Certainly information around this
10 instance and the stores that are involved, I
11 most assuredly believe that the store and the
12 PDLs and the loss prevention folks involved with
13 Store 6512 would have had conversation.

14 MR. GADDY: Okay. Well, object
15 and move to strike.

16 BY MR. GADDY:

17 Q. You're guessing, Mr. Tsipakis.

18 My question -- I'm going to ask
19 two questions. The first is going to be whether
20 or not it should have been communicated, and the
21 second was whether or not it was.

22 And you've already told me you
23 don't know if it was or not. But I'm still
24 trying to get an answer to my first question.

1 Should this information, should it
2 have been communicated to the Giant Eagle
3 pharmacists that Giant Eagle loss prevention had
4 made a determination that there were concerns
5 about these prescribers, that they went to the
6 DEA. Should that information have been sent to
7 the Giant Eagle pharmacists, yes or no?

8 MR. BARNES: Objection; asked and
9 answered multiple times.

10 MR. GADDY: But not answered yet.
11 Been asked, but not answered.

12 BY MR. GADDY:

13 Q. Should that information have been
14 provided to the Giant Eagle pharmacists?

15 MR. BARNES: You don't like the
16 answer, so you keep hounding him with
17 the same question over and over and over
18 again.

19 One more time, Mr. Tsipakis.

20 A. So information, certainly data
21 points as described here, information again on
22 this particular topic, what was shared or wasn't
23 shared or would it be helpful, it's a red flag.
24 It's a data point.

1 But, again, each pharmacist
2 individually needs to use their judgment and the
3 information that they have whether to fill or
4 not fill a prescription.

5 And, again, these prescriptions
6 that are coming in are coming from a licensed
7 authorized individual to prescribe medication.

8 If the DEA had a concern, an
9 imminent threat to the community and to the
10 counties involved, they would have pulled this
11 person's DEA license.

12 MR. GADDY: Move to strike as
13 nonresponsive.

14 BY MR. GADDY:

15 Q. Should this information have been
16 provided to the pharmacists?

17 MR. BARNES: I think this is about
18 the fifth time you've asked him the same
19 question.

20 MR. GADDY: He hasn't answered it
21 yet, Bob. He's telling me that it might
22 or it might not have been, but he
23 thinks --

24 MR. BARNES: You don't like the

1 answer.

2 MR. GADDY: I'm asking should it
3 have been provided.

4 MR. BARNES: Let's move on. Let's
5 move on. You've asked him five times.

6 MR. GADDY: No, I'm not moving on
7 until I get an answer.

8 BY MR. GADDY:

9 Q. Mr. Tsipakis, should this
10 information have been provided to the
11 pharmacists?

12 MR. BARNES: Objection; asked and
13 answered at least five times.

14 A. Without having been there and
15 understanding what the conversations were,
16 you're asking me to speculate whether this
17 information would have been helpful or not to
18 other pharmacies. The same speculation you just
19 asked me about is the same thing you're asking
20 me to do.

21 I wasn't there. I wasn't part of
22 that conversation. I'm only reading an e-mail
23 conversation in a chain.

24 Q. So your answer is, you don't have

1 enough information to tell us whether or not the
2 fact that Rick Shaheen had gone to the DEA about
3 this prescriber or prescribers should have been
4 communicated to the pharmacists; is that fair?

5 MR. BARNES: Object to form,
6 misstates the testimony.

7 A. What I'm saying is you're asking
8 me if this was data useful or not, and without
9 having the full -- I don't know. I don't know
10 if it would have been helpful or not.

11 Q. Okay. Thank you. You don't know.
12 Do you know definitively, not you
13 think or you guessed, but do you know whether or
14 not this information was given to the
15 pharmacists?

16 MR. BARNES: Object to form.

17 A. I do not.

18 Q. Thank you.

19 Before we went down that trail, we
20 were talking a little bit about the DEA looking
21 at distribution centers. Mr. Barnes asked you
22 about that, and you referenced that they'd made,
23 I think you said, a suggestion about
24 implementing a threshold program.

1 Do you recall that generally?

2 A. Yes.

3 Q. Okay. Did you review the
4 deposition of Agent Colosimo that was taken in
5 this case?

6 A. I did not.

7 Q. Okay. Were you aware -- because
8 you provided some testimony about DEA said that
9 Giant Eagle was in compliance or full compliance
10 or some terms like that.

11 Were you aware that Agent Colosimo
12 indicated that the DEA had expressed concerns
13 regarding Giant Eagle's suspicious order
14 monitoring program?

15 MR. BARNES: Object to form.

16 A. No, I'm not aware of that.

17 Q. Did you review any of the reports
18 of the DEA inspections of HBC or Giant Eagle
19 facilities in preparation for your testimony
20 today?

21 A. I believe those I had reviewed in
22 the first track, in the first -- from the HBC
23 that --

24 Q. We didn't have them then, so -- we

1 got them after 2018. So we got them from the
2 DEA at some point in time after 2018.

3 A. Okay.

4 Q. So you wouldn't have had them to
5 review before that deposition.

6 A. What I did review is our version,
7 right, the -- our inspection report is what I'm
8 saying.

9 Q. Okay. Thanks. That's a good
10 clarification.

11 You haven't reviewed any
12 DEA-authored reports about inspections of the
13 HBC or Giant Eagle distribution facility?

14 A. Correct.

15 Q. Okay. I want to ask a quick
16 question about OARRS to follow up on some
17 questioning that Mr. Barnes had.

18 At your deposition in March, when
19 I read it, I got the impression that you were
20 testifying that a pharmacist could go into OARRS
21 and run a report on a doctor. And then today
22 when you testified, I thought you made it pretty
23 clear that a pharmacist could only run a report
24 on a patient.

1 Do you agree that a pharmacist can
2 only run a report on a patient within OARRS and
3 that they cannot go into OARRS and pull a report
4 on a doctor?

5 A. So -- thank you. Let me clarify.

6 So I believe that was in response
7 to Mr. Mougey's questions about pattern
8 prescribing or using OARRS.

9 From a pharmacy perspective,
10 there's a very limited use case on how you can
11 use OARRS. So by going in and putting a patient
12 and a date of birth, I can get who the
13 prescriptions -- who filled those
14 prescriptions -- what pharmacy filled those
15 prescriptions, the quantity of those
16 prescriptions, and who the doctor that
17 authorized those prescriptions.

18 So from a doctor information, that
19 is what's available and that's what I would
20 have -- that's what I meant. You can't run a
21 doctor report showing me all the prescriptions
22 by Dr. XYZ. That's not a functionality of OARRS
23 or the ability of OARRS. It's an individualized
24 inquiry or query based on a patient level

1 inquiry.

2 Q. Okay. So if a patient came into a
3 Giant Eagle pharmacy and presented a
4 prescription from Dr. Doe and the pharmacist at
5 Giant Eagle wanted to do research on Dr. Doe,
6 based on what you just told me, they cannot go
7 into OARRS, type in Dr. Doe and get a list of
8 every script Dr. Doe has filled; is that
9 correct?

10 A. That is my understanding.

11 Q. Okay. And I think what you also
12 told us last time is that that is something that
13 a pharmacist could do within the dispensing
14 system and get information just for their store
15 for Dr. Doe; is that correct?

16 A. So I believe what you're referring
17 to is the conversation around reports that are
18 available at the store.

19 Q. Yes, sir.

20 A. The store can run a utilization
21 report that shows what prescriptions they
22 filled, what drugs they want to look at, which
23 there is a prescriber report that they can run
24 at store level, yes.

1 Q. Okay. And so at the store level,
2 not the whole chain, but at the store level, a
3 pharmacist could run a report for Dr. Doe and
4 see all the prescriptions that he or she filled
5 or had filled at that store, but not at all the
6 other Giant Eagles, correct?

7 A. Correct. If they had something
8 that they wanted to see broader, they could --
9 they would talk to their PDL, or they would talk
10 to the compliance department. And I think a lot
11 of the reports and the testimony we saw earlier
12 today show examples of corporate running reports
13 across the chain.

14 So if stores had a concern or a
15 question, they would escalate that question,
16 whether it would be to loss prevention, whether
17 it would be to the compliance department,
18 whether it would be to their PDL, and they would
19 get assistance or someone to help them or walk
20 them through whatever they needed.

21 Q. Okay. The last thing I want to
22 ask you about relates to the volume issues that
23 you talked about with Mr. Barnes towards the end
24 of your testimony.

1 You said that the average volume
2 is 2,300 scripts per week per store?

3 A. 23-, 2400 unequivocalized, yes.

4 Q. Okay. How many -- so if we were
5 to -- so if we were to just take 2300, we could
6 multiply that by 52 to get the average number of
7 scripts per year per store; would that be fair?

8 A. Yes.

9 Q. Okay. So I did that and got about
10 120,000. Does that sound about right?

11 A. Sure. Yes. I didn't do the math,
12 but I'm trusting your math.

13 Q. Well, I pulled my calculator on my
14 phone with a calculator. I got 119,600, but
15 I'll round it up to 120,000.

16 A. Okay.

17 Q. How many Giant Eagle stores are
18 there?

19 A. Pharmacies?

20 Q. Yes, sir.

21 A. As of today, 215.

22 Q. So if we multiply the 120,000
23 scripts per year times the 215 stores, I get
24 25.8 million prescriptions filled.

1 Does that sound about right?

2 A. Yes.

3 Q. And that would be per year?

4 A. Correct.

5 Q. Okay. Is that fairly consistent
6 if we keep going back in time the last couple of
7 years, or is it going to go down by a
8 substantial number?

9 A. I couldn't answer definitively.
10 Certainly we've been growing -- or the years
11 that I've been here personally and certainly
12 we've grown year on year. I'd have to go back
13 and look at what our -- I mean, I couldn't
14 definitively tell you if it's materially
15 different than that number or not. I can tell
16 you firsthand in the last four years I've been
17 here that it's pretty consistent.

18 Q. Okay.

19 MR. BARNES: Jeff, I'm going to
20 just interpose an agreement. We had
21 agreed that the witness would be
22 presented on topics 1 through 7.

23 You're now getting into other
24 topics that we had agreed would be

1 provided in writing, including
2 performance metrics, pay, compensation,
3 staffing, promise times, fill times. Is
4 that what you're getting into? I don't
5 understand what this questioning would
6 be about, and it seems to be straying
7 from the agreed topics.

8 MR. GADDY: I'm just following up
9 directly on questions that you asked
10 him, Bob.

11 MR. BARNES: Yeah, I didn't ask
12 him about how many prescriptions the
13 entire chain filled or anything like
14 that.

15 So I'll see where it's going, but
16 I think you're right on the line of
17 going beyond the topics.

18 MR. GADDY: Okay.

19 BY MR. GADDY:

20 Q. Okay, Mr. Tsipakis. So we had
21 about 25.8 million per year for Giant Eagle, and
22 you said that roughly 9 percent of those are
23 typically controlled substances?

24 A. To my knowledge, that's what I

1 believe, yes.

2 Q. Okay. And so I multiplied the
3 25.8 million times 9 percent and I got
4 2,322,000.

5 Does that sound about right for
6 the number of controlled substances that
7 Giant Eagle would have filled last year?

8 A. 25 million, yes.

9 Q. And, again, same answer that you
10 just gave as far as how consistent that would
11 have been going back the last couple of years,
12 you've grown, so it would have been a little
13 lower the last few years looking backwards?

14 A. I mean, I think the numbers are
15 going to be less, because prescribing habits and
16 opiate prescriptions and controlled
17 prescriptions are down year on year. So
18 depending on the class of drug that you're
19 looking at, I expect it actually would be less
20 year on year.

21 Q. Well, if they're less year on
22 year, that means they'd be more as we went
23 backwards, right?

24 A. Potentially, yes.

1 Q. Okay. So 2.3 million last year,
2 maybe about that, maybe a little bit more, maybe
3 a little bit less, depending, but ballpark-wise,
4 you don't have an issue with the 2.3 million
5 controlled substance prescriptions filled on an
6 annual basis?

7 A. No. Again, assuming the numbers
8 that I have looked at, the 10 percent controlled
9 versus total, then that would line up.

10 Q. Okay. And on every one of those
11 2.3 million prescriptions for controlled
12 substances every year, the pharmacist that fills
13 those prescriptions has a corresponding
14 obligation to do their due diligence and make
15 sure that those prescriptions should actually be
16 filled, correct?

17 A. Yes.

18 Q. And they have an obligation to be
19 on the lookout for red flags and to conduct
20 their due diligence to dispel any and all red
21 flags before they fill those prescriptions,
22 right?

23 MR. BARNES: Object to form.

24 Object to form.

1 A. It's not only on controlled
2 substances. I mean, all prescriptions. But,
3 yes, the corresponding responsibility is on the
4 controlled substances.

5 Q. Yeah. And they have an obligation
6 to look out for the red flags and dispel any and
7 all red flags before they make a decision to
8 fill those prescriptions, correct?

9 MR. BARNES: Object to form.

10 A. Correct, in their professional --
11 using their professional judgment and training
12 and patient information, yes, all of that.

13 MR. GADDY: Okay. Thank you,
14 Mr. Tsipakis. That's all I have for
15 you.

16 MR. BARNES: I have a few
17 follow-up questions, Mr. Tsipakis.

18 - - -

19 FURTHER REDIRECT EXAMINATION

20 BY MR. BARNES:

21 Q. I think you told us earlier --
22 going backwards from what you just finished on,
23 you told us earlier that the DEA has said about
24 20 percent controlled substance versus

1 non-controlled substance prescriptions is a
2 normal operating pharmacy; is that correct?

3 MR. GADDY: Objection to form.

4 A. Yes, that is correct.

5 Q. So applying the DEA's math,
6 Giant Eagle should have as an operating --
7 normal operating pharmacy filled about 5 million
8 prescriptions; is that right?

9 MR. GADDY: Objection to form.

10 Q. For controlled substances last
11 year using Jeff's math and the DEA?

12 MR. GADDY: Objection to form.

13 A. Yes.

14 Q. And instead, they're not only
15 less -- they're less than half of that; is that
16 right?

17 MR. GADDY: Form.

18 A. Yes.

19 Q. Now, when you just answered the
20 question about corresponding obligation and red
21 flags, am I correct that as far as you know,
22 neither the DEA or the Ohio Board of Pharmacy
23 has ever advised Giant Eagle that it had to
24 follow any red flags at any time?

1 MR. GADDY: Objection to form.

2 A. That is correct.

3 Q. In the hundreds of inspections by
4 the Ohio Board of Pharmacy and the multiple
5 inspections by the DEA of the warehouses, did
6 they ever at any time suggest or state that
7 there were red flags that had to be followed by
8 the pharmacists when filling prescriptions?

9 MR. GADDY: Form, asked and
10 answered.

11 A. No.

12 Q. And we went through many examples
13 today of Giant Eagle's corporate headquarters
14 sharing information across the chain with
15 pharmacies, including BOLOs and e-mails and
16 looking at specific doctors.

17 Do you remember all those things
18 we went through?

19 A. Yes, I do.

20 Q. Okay. So is it a fair statement
21 that the Giant Eagle's pharmacy compliance
22 department oversaw all the pharmacies and
23 communicated regularly with all the pharmacies
24 out in the field?

1 MR. GADDY: Objection to form.

2 A. Yes. In conjunction with the
3 operations team and the loss prevention team,
4 yes.

5 Q. Okay. With respect to OARRS, is
6 it your testimony that OARRS precludes
7 pharmacists to investigate doctors, to go into
8 their database and say, "I just want to see what
9 Dr. Smith has been up to in the last year. I
10 want to see what prescriptions he's been
11 authorizing for all of his patients."

12 You can't do that, can you?

13 A. That is not a functionality
14 allowed for the pharmacist on our side of the
15 OARRS platform.

16 Q. Right. But on the OARRS side of
17 the platform, they can certainly see it and do
18 it and, in fact, that's the function of OARRS,
19 right, to analyze that data and to look for bad
20 prescribers and bad patients and doctor shoppers
21 and drug abusers? That's what they do with that
22 data; am I correct?

23 A. Yes, that is my understanding.

24 Q. Now, when you say that -- you were

1 asked some questions about whether Rick Shaheen
2 passed on information about a DEA -- contacting
3 the DEA, was it to your understanding Rick
4 Shaheen's normal practice and habit to
5 communicate that type of information to other
6 pharmacies when he had information about bad
7 doctors or bad patients?

8 A. Yes.

9 MR. GADDY: Objection to form.

10 A. Absolutely.

11 Q. Now, you have experience yourself,
12 Mr. Tsipakis, of undergoing State Board of
13 Pharmacy inspections of pharmacies where you
14 were a pharmacist?

15 A. Yes, I do.

16 Q. And have you had the experience
17 from time to time of having information about a
18 potentially bad doctor and communicating that to
19 the board agent and being told what to do or not
20 to do with that information?

21 MR. GADDY: Object to form.

22 Is this individual testimony, Bob,
23 or 30(b)(6)?

24 MR. BARNES: It's 30(b)(6). It's

1 just following up on what you elicited.

2 MR. GADDY: All right. I'll

3 object then.

4 A. I'm sorry, Mr. Barnes. Can you
5 repeat the question for me, please?

6 Q. Yeah. I'll say it in a better
7 way.

8 Do you have knowledge about board
9 agents advising pharmacies to not stop filling
10 prescriptions for doctors under investigation
11 because that's -- the doctor was simply under
12 investigation and hadn't been found guilty of
13 anything?

14 MR. GADDY: Objection to form.

15 A. No, never.

16 Q. Okay. Do doctors in your
17 experience, Mr. Tsipakis, who end up being
18 convicted and having their license stripped
19 away, do they still, nevertheless, have good
20 patients who need good prescriptions filled?

21 MR. GADDY: Objection; form.

22 A. Yes. Absolutely.

23 Q. Do you recall you were asked
24 questions about Giant Eagle's chain-wide

1 threshold system? Do you understand that that
2 threshold system was looked at by the DEA after
3 it was implemented and found to be in compliance
4 with the SOM regulations?

5 MR. GADDY: Objection to form.

6 A. Yes, I am aware of that.

7 Q. In fact, are you aware that the
8 DEA doesn't really provide much guidance, if
9 any, about how to run a threshold system and
10 what formulas to use because it's a
11 facility-by-facility specific factor?

12 MR. GADDY: Object to form, scope.

13 A. Yes, that is correct. The DEA
14 does not provide explicit guidance or
15 suggestions on how to implement or what numbers
16 to use or not. Correct.

17 Q. It's up to the facility to do it
18 based upon what they feel they need to do; is
19 that correct?

20 A. Yes, that is correct.

21 Q. And, to your knowledge, did the
22 DEA ever advise Giant Eagle's warehouses that
23 they're using the wrong formula or should use a
24 different formula?

1 A. No, never.

2 Q. Were guidelines ever required by
3 either the DEA or the Ohio Board of Pharmacy?
4 Did you ever even need to have guidelines?

5 MR. GADDY: Objection; form.

6 A. No. They were never required
7 or -- never required of us.

8 Q. So why even have them? Why even
9 issue anything?

10 MR. GADDY: Objection; form, asked
11 and answered.

12 A. Again, in the continuous process
13 of keeping things combined, supporting our
14 pharmacists information and using them as
15 talking points for all of our continuing
16 education, our meetings, et cetera, it was
17 decided to put it together in a guideline.

18 Q. Okay. But that's not something
19 required by the regulations or the statutes, as
20 far as you know?

21 MR. GADDY: Objection; form.

22 A. No, it is not.

23 Q. Mr. Gaddy represented to you in
24 some questioning that red flags are not in the

1 DEA manual. Do you remember him representing
2 that to you?

3 A. He did say that, yes.

4 Q. And assuming that to be true, what
5 is the significance of the fact that the DEA's
6 own pharmacy manual doesn't require any red
7 flags?

8 MR. GADDY: Objection to form, the
9 scope.

10 A. Again, red flags -- red flags can
11 be different. There is no list of explicit
12 things you have to look out for. It's
13 individualized based on patient and situation
14 and prescription.

15 So certainly these are things
16 for -- data points for pharmacists to use in
17 their professional judgment and discretion on
18 whether to fill or not fill a prescription.

19 But, again, there is no statute or
20 requirement of here's a list of -- either for
21 the Board of Pharmacy or DEA. It's more of a
22 best practice or things to look for or things
23 that are top of mind, a guideline or suggestion
24 only.

1 Q. Right. So if the DEA had felt it
2 was important enough for pharmacies and
3 pharmacists to know about red flags, do you
4 think they would have put it in their own
5 pharmacist manual?

6 MR. GADDY: Objection to form.
7 That's not what that is, but go ahead.

8 A. Yes, I do.

9 Q. The questions you were asked by
10 Mr. Gaddy about the dispensing guidelines,
11 specifically the documentation, these
12 guidelines, under the documentation section, it
13 says, "The pharmacist must document the steps
14 they have taken to verify questionable
15 prescriptions."

16 Do you know what a questionable
17 prescription is?

18 A. Yes.

19 Q. What is it?

20 A. A questionable prescription is
21 when a pharmacist has a concern about either
22 legitimacy of a prescription or a dose on a
23 prescription. I mean, there's many things on a
24 questionable prescription on whether it should

1 be filled or not.

2 Q. All right. But if a pharmacist
3 satisfies his concern, it's no longer a
4 questionable prescription; is that correct?

5 A. Correct. They've cleared the
6 prescription, yes.

7 Q. And, therefore, no need to
8 document anything?

9 A. That's correct.

10 Q. Is it -- from a pharmacist's
11 perspective, and specifically Giant Eagle's
12 perspective, which is more important for
13 Giant Eagle, that pharmacists do their due
14 diligence or they document it because somebody
15 some day might challenge their professional
16 judgment?

17 MR. GADDY: Objection; form,
18 scope.

19 A. For the pharmacist to use their
20 due diligence to take care of the patients.

21 MR. BARNES: I've got nothing
22 further.

23 MR. GADDY: I don't have any more
24 questions for Mr. Tsipakis.

1 I did want to note that we looked
2 into these documents, particularly the
3 one that you were raising an issue with,
4 and apparently that was one that you
5 identified and provided to us late that
6 was the subject of the redeposition.

7 So that document came from the
8 e-mail that -- Josh, I assume it was you
9 e-mailed over the night before the
10 deposition. So that's where that one
11 came from.

12 Mr. Tsipakis, I don't have any
13 more questions for you.

14 MR. KOBRIN: Let me just put on
15 the record real quick. Was that -- when
16 you entered that document -- that's
17 neither here nor there, because you've
18 been -- within the guidelines, you
19 wouldn't have been able to pull the
20 document from the documents we disclosed
21 to you, which we did disclose to you
22 within a timely fashion and keeping the
23 protocols, because you would have had to
24 get the document to us in 48 hours

1 before the deposition, and we disclosed
2 the documents to you the day before the
3 deposition. So I don't know why that
4 has any relevance.

5 Did you mark that as an exhibit or
6 no?

7 MR. BARNES: I don't think he did.

8 MR. GADDY: Yeah, I meant to.
9 Let's mark it. I don't know what number
10 we're on, Bob.

11 MR. BARNES: Why don't you just
12 mark it Exhibit 23, since that's what it
13 already is, so let's have the record
14 reflect that it's Exhibit 23.

15 MR. GADDY: I'm sorry?

16 MR. KOBRIN: It's Exhibit 23.

17 MR. GADDY: There already is a 23.

18 MR. KOBRIN: Yeah, I believe
19 that's your exhibit.

20 MR. GADDY: Oh, the document that
21 you used?

22 MR. KOBRIN: I think so. And I
23 raise this now because that's the one
24 that we're going to replace. So just so

1 you're on notice, we're going to replace
2 that version of it with version that
3 says "Confidential Protected Health
4 Information" at the bottom, so we're
5 going to request that you swap out any
6 others, and we will send a version with
7 CPHI to the court reporter.

8 MR. BARNES: Okay. We can go off
9 the record.

10 MR. GADDY: Hold on. I'm still
11 not following.

12 MR. KOBRIN: With a CPHI legend
13 I'm going to ask the court reporter. We
14 can do this off the record, but I do
15 want the court reporter to know that
16 I'll replace 23. When I send it to her,
17 I will send her a version that has
18 "Confidential Protected Health
19 Information" at the bottom.

20 Okay. We're off.

21 THE VIDEOGRAPHER: Off the video
22 record. Stand by. The time is
23 3:20 p.m. Off the record.

24 (Signature reserved.)

1 - - -

2 Thereupon, at 3:20 p.m., on Wednesday,
3 May 5, 2021, the deposition was concluded.

CERTIFICATION

I, Carol A. Kirk, Registered Merit Reporter and Certified Shorthand Reporter, do hereby certify that prior to the commencement of the examination, JAMES TSIPAKIS was duly remotely sworn by me to testify to the truth, the whole truth, and nothing but the truth.

I DO FURTHER CERTIFY that the foregoing is a verbatim transcript of the testimony as taken stenographically by me at the time, place, and on the date hereinbefore set forth, to the best of my ability.

I DO FURTHER CERTIFY that I am neither a relative nor an employee nor attorney nor counsel of any of the parties to this action, and that I am neither a relative nor employee of such attorney or counsel, and that I am not financially interested in the action.

Carol A. Kirk, RMR, CSR
